GIBRALTAR DAM ADDITIONS, SANTA BARBARA CO.

Bids Rejected (Unit Prices)
Gibraltar Dam Additions and Appurtenant Structures
SANTA BARBARA COUNTY, Calif.
Gibraltar Dam on Santa Ynez River, 8 miles north of Santa Barbara.
Owner—City of Santa Barbara, Faye Canfield, city clerk, City Hall, Santa Barbara, Calif.
Engineer—Leeds, Hill & Jewett, 1000 Edison Bldg., 601 W. 5th St., Los Angeles, Calif.
Includes adding 15 ft. to the height of the existing concrete arch dam, the enlargement of the thrust block at the southerly end of the dam, the addition of a thrust block at the north end of the dam, construction of a new spillway, weir, a gravity section at the left end of the spillway and the installation of three radial gates, 52x21 ft. in size, together with operating mechanisms and appurtenant facilities. A total of about 15,200 cu. yds. of concrete, 325,000 lbs. of structural steel and 142,000 lbs. of reinforcing steel and dowels will be involved in the work.
The work involves:
(1) lump sum, $10,000, access road construction and maintenance;
(2) lump sum, $20,000, camp construction and maintenance;
(3) lump sum, clearing of site and stripping of left abutment;
(4) lump sum, cutting, chipping, sandblasting and removing existing concrete;
(5) 1200 cu. yds. excavation of overburden, rock and concrete;
(6) 800 lin. ft. drilling at unit price of $3 per lin. ft. plus lump sum for drilling holes (exclusive of dowel and anchor bar holes) for pressure grouting in rock and concrete, and furnishing and installing grout pipe and fittings;
(7) 800 sacks cement used in pressure grouting at unit price of $2.50 per sack of cement so used, plus the lump sum for pressure grouting (exclusive of grouting of dowels);
(8) 1300 lin. ft. drilling dowel holes in rock or concrete greater than 10 ft. in depth;
(9) 1900 lin. ft. drilling anchor bar holes in rock or concrete less than 10 ft. in depth;
(10) 29,000 lbs. furnishing, installing and grouting anchor bars and dowels in rock or concrete;
(11) 4200 cu. yds. concrete in south thrust block;
(12) 2650 cu. yds. concrete in spillway piers, parapet walls and outlet tower;
(13) 8350 cu. yds. all concrete not included in items (11) and (12);
(14) 113,000 lbs. furnishing, fabricating and placing reinforcing steel, including gate hinge anchor bars;
(15) lump sum, salvaging, furnishing and installing handrail;
(16) lump sum, furnishing, fabricating and installing structural steel spillway gates, footbridge, trash racks, floor plates and grating, and recorder house support;
(17) 500 sacks cement used in guniting at unit price of $3.50 per sacks of cement so used, plus lump sum for furnishing and placing gunite;
(18) lump sum, furnishing and installing porous concrete tile and connecting drains and other concrete pipe;
(19) lump sum, furnishing and installing gate seals and seal plates and the mechanical assembly for operation of the spillway gates and for testing the completed gates and operating assemblies;
(20) lump sum, salvaging, furnishing and installing pipe, valves and fittings in reservoir outlet structure and removal and reconstruction of water stage recorder structure and reinstallation of facilities therein;
(21) lump sum, furnishing and installing flashboards and cleanup of site of work.

Plans and specifications obtainable from office of the engineers or from the city clerk, Santa Barbara, Calif., upon deposit of $15.

Bids submitted May 15 (all rejected) were as follows:
(A) A. Teichert & Son, Box 1133, Sacramento, Calif., $848,420.
(B) Macco Corp., Clearwater, $898,-160.

English Building

(Continued from Page One)

Wood is a particularly scarce building material in England. The Scandinavian countries have tons of timber that they would gladly trade for coal, which they need badly. However, England hasn't enough coal to supply her domestic needs.

Le Tourneau Building

Some U. S. Army surplus motor cars and trucks located overseas are coming to England, Eckert said. They are sold at auction and bring huge prices. The construction equipment scarcity will be solved in his (the Middlesborough) area, he said, when the Le Tourneau factory being built about four miles from that city is completed and put into operation. Meantime, the particular shortage is just one of many.

Is Housing Official

The gentlemen from Middlesborough serves on several government housing committees, and has been closely associated with the problems of housing in England's people and its industries. One of his especial interests in the construction field is water-works.

Eckert occupied the seat of honor at Monday's board of supervisors meeting. He spoke briefly, contrasting conditions in England with those in the United States.

Further Relaxation

(Continued from Column One)

housing in government, the construction men took a dubious look at this plan for reorganization and indicated they all would turn thumbs down as they did on a similar plan lost year.

The board of directors of the National Association of Home Builders, meeting in Washington this week, announced today that they would resist any effort like that of last year to perpetuate wartime housing controls as proposed in plan No. 3.

NAHB gave these reasons:

1—Because bureaucratic regulation and direction of housing during the last five years has seriously hindered and not assisted the building of homes.

2—The several constituent agencies —particularly the FHA and the NLBA — cannot function to maximum efficiency under the control of a single housing czar.

3—The economy and the federal budget require a government expenditure at this time, and not more.

The construction industry generally was expected to take this attitude.

Official Proposals

NOTICE TO CONTRACTORS

Subject to conditions prescribed by the undersigned, sealed bids are invited for the construction of approximately 1,950 feet of underground electric ducts and manholes in the vicinity of Agricultural Hall on the Berkeley campus of the University of California. Bids will be received until 2:00 P. M., June 10, 1947. Plans, specifications and information will be available at the cashier's office, 103 Administration Building, University of California, Berkeley, California. A deposit of ten ($10.00) dollars is required for each set of plans and specifications issued. Right to reject any and all bids is reserved.

Signed:
THE REGENTS OF THE
UNIVERSITY OF CALIFORNIA
(May 28, 29, June 2, 3, 4, 5, 6, 9, 10, 11, 1947)

INVITATION FOR BIDS
ELECTRICAL EQUIPMENT
AND A.W.W.A. GATE VALVES
CITY OF MARTINEZ

Sealed proposals for furnishing certain items of equipment for the Martinez Filter Plant, addressed to the City Clerk, will be received by the City Clerk, City Hall, Martinez, California, until 8:00 P. M. June 18, 1947, at which time they will be publicly opened and read.

The materials on which proposals are desired are the following:
33 Gate Valves, 18 inch to 4 inch.
1 Electrical Switchboard, complete as specified.
3 Electrical transformers, complete as specified.

Contract documents may be examined at the Office of the City Engineer, 705 Estudillo Street, Martinez, California, and may be obtained by bona-fide bidders from the City Engineer without charge. Prints of the plans, is desired, may be obtained from the City Engineer on the payment of $0.50 per sheet, which is not refundable.

Bidders may bid on any or all items and awards will be made, if made at all, on each item separately.

(Daily Pacific Builder)
(May 28, June 4, 11, 1947)

Construction of Project California F.D. 2N13-D, Tule Creek-Butter Creek, Trinity National Forest

FEDERAL WORKS AGENCY, PUBLIC ROADS ADMINISTRATION, San Francisco, California, June 2, 1947. Sealed bids will be received at the office of the Public Roads Administration, 720 Phelan Building, San Francisco, California, until 2:00 p.m. on **June 19, 1947,** and then publicly opened for furnishing the materials and performing the work for constructing Project California F.D. 2N13-D, Tule Creek-Butter Creek, Trinity National Forest, Trinity County, California. The length of the project is 3.595 miles and the principal items of work are approximately as follows: 5,000 cu. yds. unclassified excavation; 740 cu. yds. unclassified excavation for structures; 20,000 cu. yds. unclassified excavation for borrow; 21,000 sta. yds. overhaul; 8,400 cu. yd. mi. special overhaul of borrow; 2,000 M gals. watering; Lump sum moving, placing and maintaining water plant or plants; 28,600 cu. yds. selected borrow base course; 55 cu. yds. concrete; 3,500 lbs. reinforcing steel; 968 lin. ft. C.G.S.M. culvert pipe; 52 lin. ft. 120 inch metal plate culvert; 315 lin. ft. removing, cleaning and stockpiling or relaying salvaged culvert pipe; 27 timber culvert markers; 3 cattle guards; 5,000 lin. ft. barbed wire fence; Force account remove and reset fence. The minimum wage paid labor employed on this project shall be in accordance with the classified labor rates set forth in the Special Provisions. Plans and specifications may be examined by prospective bidders at the Public Roads Administration offices, 723 Phelan Building, San Francisco, and 515 Pioneer Building, Sacramento, and at Associated General Contractors' offices, 785 Market Street, San Francisco; 707 Architects' Building, Los Angeles, and Reno Golden, Reno. Where copies of plans and specifications are requested a deposit of $10 will be required to cover their return. If these are not returned within 10 days after opening of bids the deposit will be forfeited to the Government. Checks should be certified and made payable to the Treasurer of the United States. Plans, specifications and proposals may be obtained at the office of the Public Roads Administration, 720 Phelan Building, San Francisco 2, California. CHAS. C. MORRIS, Division Engineer.

Commercial Construction Control Is Primary Issue, With Senate Passage of Rent Measure

WASHINGTON.—With the senate passing its own rent control and construction control elimination bill, conferees now are faced with ironing out minor differences between this (the Buck bill) and the Wolcott measure which passed the house weeks ago.

Most important deviation that the conferees must resolve—so far as construction interests are concerned—is that dealing with VHP-1, the restricting order on non-housing construction that has haunted builders since March 26, 1946. But even here the two bodies are not far apart.

Both have voted to end most of the remaining controls on construction. The senate, like the house, decided to wipe uot controls over housing and end rent controls on new construction, newly-rented dwellings and hotel accommodations.

But unlike the house, which would completely abrogate the Patman Housing Act, the senate version seeks to retain federal control over amusement and commercial construction. This course, private industry feels, is only a half-measure in releasing builders from the hampering grip of government regulations. If adopted in conference and passed by the White House, OHE (retained to administer rent control to its death) would be empowered to prohibit the starting of so-called deferrable amusement and commercial structures.

Some observers feel that in such an event the duties of OHE with respect to denials would fall off to near nothing as far as dollar volume is concerned. They say that by far the heaviest share of the approximately two and one-half billion dollar backlog of already deferred jobs represents heavy industrial, institutional and similar work. Also, a fine line of interpretation would develop between the designations "commercial" and "industrial and institutional". It is not feared that the "amusement" provision would lead to so much confusion since the projects in that category are more nearly defined: bowling allyes, race tracks, night clubs, etc.

The conference also will have to determine whether or not the office of housing expediter is retained. The Wolcott bill would have destroyed it in favor of a permanent government agency to administer rent controls.

Still another breach facing conferees lies in the handling of building materials allocations. The Wolcott measure on the house side would wipe the slate clean as far as any allocation controls are concerned. But the senate, on an amendment offered by William F. Knowland of California, reversed the house decision, permitting OHE to keep this authority.

Other important amendments adopted by the senate Monday afternoon included:

1—Proposal by Senator John L. McClellan, Arkansas, exempting county fairs and agricultural exhibits from any construction ban.

2—Proposal by Senator Harry Cain, Washington, assuring veterans their rights under the old Patman Housing Act.

3—Proposal by Senator Guy Gordon, Oregon, to make $25 million available for building access roads to standing timber on government lands. (This amount includes $15 million originally allocated for access roads now slated to be returned to the U. S. Treasury unused, plus an additional $10 million.

The Buck bill was passed on a voice vote, amendments and all, indicating no narrow margin of opinion in its adoption. It extends until next March 31 nationwide rent control under the housing expediter's office.

The two houses were much farther apart on rent provisions than they were on construction controls.

Committee Forwards Metal Subsidy Bill To Floor of House

WASHINGTON.—Ore hungry mills that furnish the material for copper, brass, lead and zinc construction items will be assured of continuing supplies if congress passes H. R. 2455, which the rules committee reported out on voice vote Friday.

Clear sailing through both houses and across the President's desk is predicted for this measure which will authorize use of $80 million of Reconstruction Finance Corporation funds each year for a five year period for conservation payments on these scarce metals.

Whatever funds might be left over from the payments on copper, lead and zinc will be used for other strategic metals which need incentives to hold up production.

Russell of Nevada fostered the measure.

In effect, on passage it will continue the premium price payment plan which was instituted during the war to keep the supply of copper, lead, zinc and a few other necessary metals coming from the marginal western mines that would have closed without the bolstering influence of government subsidies.

Previous authorizations have called for $100 million a year for this purpose but only about $80 million has been used, so the amount was reduced in H. R. 2455.

The wartime premium price payment plan expires June 30, 1947.

If the marginal western metal producers were forced to close because of large eastern competition, they could not go back into production again because of the mine caveins and other natural phenomena that would close off that source of supply permanently, say the experts.

The rules committee granted three hours of debate on the bill in the house—probably next week. A heavy calendar is expected to crowd the bill off the docket this week.

This method of assuring a continuing flow of the vital metals is one more link in the production chain which eventually spells material for housing and commercial and industrial construction.

12 S. F. ARCHITECTS DESIGN MEMORIAL; LOS ANGELES MAN A JUDGE

ST. LOUIS. — Twelve entrants from San Francisco are among more than 500 from all parts of the nation who will compete in the $125,000 architectural contest to secure a design for a $30 million federal memorial on the St. Louis riverfront. The memorial will commemorate Thomas Jefferson and pioneers of the western expansion of the United States.

The list of competitors, increasing daily, now includes the following from San Francisco: Germano A. Milono, Leonard S. Mosias, Robert Nordin, Henry V. Chescos, William W. Wolf, Lloyd Gartner, William Mooser, Jr., Frederck W. Whittlesey, Fritz Kruger, Virginia Kruger, Henry A. Schubart, Jr., and Wm. F. Gunnison.

One of seven prominent architects serving as judges is Richard J. Neutra, Los Angeles, chairman of the California state planning board.

Republicans Question President's Housing Reorganization Plan

WASHINGTON—The President's plan to reorganize the government's housing functions under one administrative head—1947 style—met with a cool reception when it was delivered to Capitol Hill this week.

Congressional resistance to the idea of overhauling the federal housing program with an eye to consolidating fiscal activities under one all-powerful administrative head was more than faintly reminiscent of similar conditions in 1946.

'Too Centralized'

When the President messaged the congress then with a like proposal throwing the variously distributed housing functions into one basket, Senator Taft of Ohio, speaking for republican policy in general, said he feared any plan to place so much authority in one administrative official.

Not using the same words, Taft today was on record as opposing Presidential Reorganization Plan Number 3 for 1947.

Chairman of the senate's GOP policy committee, Taft said he was "not too friendly" to the housing plan. Referring to last year's administration attempt to put thru a similar readjustment, Taft said he still is opposed to giving any overall housing administrator "too much power".

His specific objections are leveled at transfer of powers of the federal home loan administrator and federal works administrator to the top housing official. He predicts the senate will reject the White House reorganization plan.

The American Legion announced it was mailing its own policy statement to all senators and representatives regarding the President's plan for housing. This letter will carry copies of the resolutions adopted by the national executive committee of the Legion which speak volumes in citing veteran opinion.

Would Use FWA

The Legion stands for a Federal Home Loan Bank and federal housing administration set up as separate permanent agencies. Further, it recommends abolishing the federal public housing authority as soon as that temporary agency has finished up its temporary housing projects. The Legion would vest remaining fiscal functions of FPHA in the federal works agency; this is precisely what a recently-reported house bill provides.

CIVIL ENGINEERING EXAMS TAKE IN FIVE MINOR CLASSIFICATIONS

SACRAMENTO. — The California state personnel board announced Tuesday that there will be no further examinations in the classes of junior highway junior bridge, junior physical testing and junior hydraulic engineers.

Persons interested in employment in these fields should take an examination for junior civil engineer to be given July 26, officials said. Final filing date is July 5.

College graduation with major work in civil engineering, or its equivalent, and two years' professional experience is required. Salary range is $260 through $310.

An examination for junior mechanical engineering draftsmen ($250-$310) will be held on July 10. Its final filing date is June 28. College graduation or its equivalent, with major work in mechanical engineering, and two years' professional experience are prerequisites.

Hearing for Retaining Building Controls On Friday, In Committee

WASHINGTON.—Hearings will begin Friday, June 6, before the house judiciary committee on Congressman Mischner's bill (H. R. 3647) which is the legal form of most of President Truman's request for a one-year extension of controls over use and export of scarce materials.

Specifically, the President has asked that congress extend the power to allocate tin and tin products. In his message to congress last week, Mr. Truman also requested continued authority to issue export priorities for key industrial items needed to increase the production abroad of products urgently needed in the United States "as a matter of self interest", in cases certified by the Secretary of State to be of high public importance and essential to carrying out foreign policy.

A good example of the latter—the key industrial item provision—is machine tool or any similar industry product. As the President pointed out in his message to congress on the subject, conceivably a large construction project abroad could be held up or prevented by the absence of the right part at the right time.

#

'300,000 Journeymen And Foremen Needed In Building Trades'

WASHINGTON. — Three hundred thousand more skilled workers and foremen are needed in the construction trades than were employed last summer.

This estimate was voiced by Gino J. Simi, district director of apprenticeship, before the 417st convention of the Maryland State and District Federation of Labor in Baltimore.

Seeking a larger training program, Simi said:

"We are all talking about combating communism. What more effective weapon can you use than apprenticeship?

"You who have skilled trades at your fingertips can look forward to a life of honest work and good wages. You laugh at communism and its illusions."

Meantime, Secretary of Labor Lewis B. Schwellenbach announced the appointment of John Green, president of the industrial union of marine and shipbuilding workers of America, CIO, to the federal committee on apprenticeship.

The federal committee is the national policy - making body for apprenticeship and for the apprentice-training service of the Labor Department, composed of an equal number of representatives of management and labor.

Another membe: of the board is C. J. Haggerty, secretary-treasurer of the California Federation of Labor, San Francisco.

#

MAY HAS 11% GAIN

WASHINGTON—New construction put in place in May 1947 totaled $942 million, a gain of 11.1 per cent over April, the Construction Division, Department of Commerce, announced today.

The May figure represented slightly less than a normal seasonal rise from April, but was a gain of 15.4 per cent over May 1946.

Verbal Spanking Given Builders by Expediter Creedon

WASHINGTON. — **Delegates to the home builders' semi-annual meeting here last week returned home smarting under a verbal spanking** administered by the housing expediter who talked off-the-record in one of the many closed sessions of the National Association of Home Builders convention.

Representing some 12,000 builders throughout the country, those men who attended the Washington meeting heard Expediter Frank R. Creedon say he believed the government had gone as far as it could in helping the housing contractors.

The obvious reference was to VHP-1 which Creedon feels has channeled limitless quantities of building materials into houses that otherwise, could not have been built. The backlog of commercial, industrial and institutional construction jammed up by this one government control now amounts to three and one-half billion dollars. the builders learned from Creedon.

Up Productivity

The OHE executive urged N A H B members to build their houses now while VHP-1 is still on the books for his field office anticipate that this backlog of nonhousing work will burst forth like water through a hole in the dike as soon as VHP-1 is lifted.

He made it plain that he is disappointed with the private industry showing so far this year—an estimated 200,000 privately-financed starts against 206,000 in the same period last year. This is the record, he pointed out, in the face of a cleared track for home construction. "This year you have a clear track without government red lights in your path," Creedon said.

In his opinion, there are no remaining controls which are hindering the building of homes for the mass market.

Creedon's recommendations to the NAHB delegates included a cautioning note. Costs must be reduced, he warned, and greater value given or the public's wrath will be felt in strong measure.

Creedon passed right back to the builders their complaint about the lessened productivity of labor. This is not government's province, he said, but something the contractors will have to work out for themselves.

Codes Local Issue

He was quoted as saying:

"Labor costs should be no higher this year than last. I know wage rates have gone up, but so has productivity. And productivity can go further. But that is not government's job. That is your job.

"Code restrictions add to costs, but this is not a federal problem unless you want to go down the road to federal controls. Codes are a local problem which must be solved at local levels."

#

FAN, UNIT HEATER ORDERS DECREASING

WASHINGTON.—The value of shipments of fans, blowers, unit heaters, and accessory equipment during the first quarter of 1947 amounted to $24 million, according to the bureau of the census. The value of orders booked during this quarter totaled $22.4 million, a decrease of 13 per cent from the $25.8 million reported for the last quarter of 1946.

Manufacturers reporting for this survey represent more than 90 per cent of the industry. For the first quarter of 1947, 78 companies reported data on shipments or orders booked.

Official Proposals

NOTICE TO CONTRACTORS

Subject to conditions prescribed by the undersigned, sealed bids are invited for the construction of approximately 1,950 feet of underground electric ducts and manholes in the vicinity of Agricultural Hall on the Berkeley campus of the University of California. Bids will be received until 2:00 P. M., June 10, 1947. Plans, specifications and information will be available at the cashier's office, 103 Administration Building, University of California, Berkeley, California. A deposit of ten ($10.00) dollars is required for each set of plans and specifications issued. Right to reject any and all bids is reserved.

Signed:
THE REGENTS OF THE UNIVERSITY OF CALIFORNIA
(May 28, 29, June 2, 3, 4, 5, 6, 9, 10, 11, 1947)

Additions to Present School, Mt. Shasta Elementary School, Mt. Shasta, Consisting of a Kindergarten, Four Classrooms, Cafeteria and Kitchen and Connecting Corridors

ADVERTISEMENT FOR BIDS

Sealed bids will be received and publicly opened at 7:30 P. M. on Thursday, June 12th, 1947, at the office of the District Superintendent of the Mt. Shasta Union Elementary School District at the Mt. Shasta Elementary School, Mt. Shasta, California. The bids will be for additions to the present school, consisting of a kindergarten, four classrooms, cafeteria and kitchen and connecting corridors.

Plans and Specifications may be obtained at the office of Howard R. Ferrin, Architect, 1121 Main Street, Klamath Falls, Oregon, upon deposit of $25.00, which deposit will be refunded to the bidder upon return of the Plans and Specifications to the Architect. Plans and Specifications may be exmined at the office of the District Superintendent at Mt. Shasta and at the Builders' Exchange, 666 Mission St., San Francisco, California.

As a condition precedent to received Official Proposal Forms, the bidder must have filled out a Bidder's Pre-qualification Questionnaire and delivered the same to the Architect seven days prior to the opening of bids.

The successful bidder will be required to furnish a Surety Company Bond in full amount of the contract price. He shall be required to carry Public Liability Insurance as specified.

A bidder's bond or certified check in an amount equal to 5% of the lump sum bid must accompany the bid as a guarantee for the execution of the contract.

The Board of Trustees of Mt. Shasta Union Elementary School District, Mt. Shasta, California, reserve the right to reject any or all bids and to waive any informalities.

M. A. BRUSH,
Superintendent.

Peninsula Builders Lash Out at Sheet Metal 'Grey Mart'

SAN MATEO.—The San Mateo County Sheet Metal and Heating Contractors Association has initiated a campaign against the so-called "grey market" prices in sheet steel.

The sheet metal contractors denounced the practice of some building material manufacturers who permit their products to fall into the hands of the "black-market" speculative broker.

"Concerted action on the part of every segment of the building industry is needed if present housing costs are to be reduced to a level which will induce the marginal buyer to, again, become a home-purchaser." This is the opinion that was expressed by Herman Nelson, manager of the Peninsula Builders' Exchange.

Nelson related that some Peninsula contractors had been charged 20c a pound for sheet metal by a Los Angeles organization. He said that eight cents was a normal price, and ten cents a fairly reasonable price at the present time.

"The home-buyer and the entire building industry is being victimized by the lust for a quick profit," Nelson said, "and the action of the sheet metal men, if adopted throughout the industry, will spell a quick end to such dubious methods of merchandising.

"Regularly established material dealers, with heavy investment in plant and equipment serve a very necessary function in the building industry picture.

"However, these legitimate businesses are too often by-passed for the more lush profits to be gained through the 'itinerant' brokers."

President Edward Maloney of the Peninsula Sheet Metal Association, stated that:

"It is the policy of our association to patronize those manufacturers who continue to use the services of established business houses in the distribution of their products and who avoid channelling manufacturers to scarce material profiteers."

STATE'S NON-FEDERAL PUBLIC WORKS TOTAL $37,873,000 IN 1947

WASHINGTON. — California's total non-Federal public works totaled $37,873,000 during the first quarter of 1947, FWA announced today. Some 75 non-residential institutional buildings, (hospital, social and penal) were put under construction at a cost of $8,868,000.

Utilities construction totaled $2,819,000, and involved seventeen projects. Expenditure on 139 highways was $10,629,000; and on two airports, $3,724,000. Forty-one sewer projects were undertaken, costing $2,950,000. Waterworks claimed $6,789,000 and involved twenty-four projects.

The data, released by the federal woks agency, was compiled from reports published in the Daily Pacific Builder and several engineering magazines.

EL CENTRO SITE IS RECOMMENDED FOR TESTING PROJECT

WASHINGTON. — Representative Harry Sheppard, of California, revealed today that a joint armed services committee has recommended location of a long-range guided missile testing project near El Centro, Calif.

The congressman said he received his information from Admiral D. C. Ramsey, vice-chief of naval operations and a member of the joint research and development board. Ramsey was quoted as saying a site survey was made at the direction of the board.

GROOVER AND I

REDSKINS, AND RED FACES

It is well that not everyone reads the Portland "Oregonian". The issue of May 18 would have made too many people mad at one time—or would have caused us to question our moral decency.

☆ ☆ ☆

Re-election economy budget cut has closed the Chemawa Indian Boarding School, the Northwest's only non-reservation Indian boarding school where Indian children are cared for from first grade through High School.

☆ ☆ ☆

This school cares for Indian children regardless of tribe, nation or confederacy—whether an Aleut of Alaska or a Seminole of Florida.

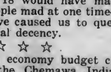
☆ ☆ ☆

A picture of sixth-graders shows twenty odd Americans, neatly and cleanly dressed, bright-eyed and intelligent. It presents a challenge: would the first twenty million run so-called "Americans" offer the same citizenship potential?

☆ ☆ ☆

These sixth graders are presided over by Miss Winona Sunrise, a slim, trim and attractive black-haired daughter of the Comanche tribe. Harry S. Truman, President of the United States, was born on land forcefully taken from Miss Sunrise's ancestors.

☆ ☆ ☆



You can't forget that more than 100 of these students are orphans. They are year-round borders—they have no other homes—there is nowhere to go during vacation. These orphans live at the school until old enough to make their living in the land stolen from their forefathers.

☆ ☆ ☆

We are spending money by the hundreds of millions, 12,000 miles away, to prevent minorities from being pushed around by stronger groups.

☆ ☆ ☆

Think a moment—did the American Indian ever invite us to invade these shores?

SEVEN RENTAL JOBS WIN FHA APPROVAL IN LOS ANGELES AREA

LOS ANGELES. — Approval of seven rental housing projects for World War II veterans in the Los Angeles area, six in North Hollywood and one in Long Beach, was announced Friday by the FHA district office here.

The Long Beach project will be built by Ben F. and Cora Marron and will be known by the name of Mary Murray Apartments. It will be financed by Investors Syndicate, Huntington Park, with a mortgage of $114,900 to be insured by FHA under Title VI of the National Housing Act. It will consist of two-story apartments located at Wardlow and Gaviota Streets, Long Beach, and will provide 20 units of 3½ rooms and one unit of five rooms.

The North Hollywood projects will be built by Meyer-Nash Corporation of Burbank. They will be financed by the Coast Federal Savings and Loan Association of Los Angeles with mortgages totaling $351,800 to be insured by FHA under Title VI. All consist of two-story apartments located at or near the intersection of Cahuenga Blvd. and Oxnard Street. In all, they will provide 56 units of 4½ rooms. The development will be known as Cahuenga Gardens.

Code's Article 23 Is Adopted!

San Francisco board of supervisors voted to incorporate Article 23, the very controversial lateral force section, into the proposed San Francisco building code, late Wednesday. The decision came after pro and con testimony was heard for more than four hours at a special session on the code. The vote was 5-4.

The Vensano section makes mandatory stronger lateral construction on multi-story buildings than is required by state law. Engineers who opposed its adoption declared that the new requirement in the code will rule out construction of such buildings as the Mark Hopkins, the Russ Building and the Telephone Building, as economically impractical.

Vensano's plan, as finally adopted by the supervisors, calls for lateral strengthening on the top floor equal to eight per cent of the weight of the entire building and its occupant load. This would be lowered to four per cent on the bottom floor for buildings of twenty-seven or more stories.

The state requires strengthening equal to two per cent of the total weight, top and bottom.

A letter from the Building Industry Conference Board urging modification of certain "excessive and ill-considered" porions of the code, especially its earthquake provisions, was read into the record at the beginning of the hearing.

BICB Opposed

In presenting the case for strict earthquake regulations, Works Director Harry Vensano reviewed the history of earthquakes in San Francisco, and asserted that had the quake of 1906 occurred at 5 p. m., instead of 5 a. m., at least 30,000 persons would have been killed.

"Today you gentlemen of the board are going to settle on the possibility of saving lives—maybe tens of thousands," he pointed out. "Throughout the nation when the code was first drawn up, no lateral force provisions were included, but the opinions of members of the Structural Engineers Association of Northern California was solicited. He contends that the present form of Article 23 embodies the average of all opinions of all engineers in San Francisco.

Henry C. Collins, architect, represented the Building Industry Conference Board. He stated that the BICB did not oppose inclusion of earthquake provisions in the code, but urged the supervisors not to increase the "already excessively high cost of building" by adopting the legislation proposed by the department of works. Collins stated that present provisions of Article 23 are opposed by nearly all the Structural engineers of San Francisco, and that resulting cost increases would be "prohibitive".

Cites 6% Increase

Structural Engineer H. J. Brunnier estimated that the structural cost of tall buildings in San Francisco "would be pretty close to double" under the provisions urged by the DPW.

Harold Engle, structural engineer for the Board of Fire Underwriters of the Pacific, labeled the arguments presented by the opposition as largely personal opinion, lashing out at Brunnier's cost estimate as "nebulous in the extreme". He cited two cases to prove his point.

One was the Southern California Gas Company building, 150 feet tall, designed for a lateral force of ten per cent of gravity. Engle stated the total increase in cost was approximately 6 per cent over what a normal building of that time would have been. And, he added, had that building been done today, the total increase would have been considerably less, since it was a pioneer building experiment.

Challenge Estimate

R. S. Chew, a member of the Structural Engineers Association who opposed the report of the citizens' advisory committee, spoke emphasizing the need for strict earthquake requirements.

Professor Lydik S. Jacobsen, Stanford University seismologist, also challenged the statement of Engineer Brunnier that frame costs of tall buildings would be upped 100 per cent under the present draft of Article 23.

"The cost increase for earth-

AGC Joins Groups Urging Continuation Of Facilities Bureau

WASHINGTON.—The Associated General Contractors of America announced today that it was lending its unqualified support to the legislative attempt to continue the bureau of community facilities as the government's advance planning agency.

The contractors were careful to include in their statement of policy, based on action at the recent spring board meeting in Seattle, a recommendation that all work so planned with federally advanced loans be executed by contract, "with the contracts being awarded to the lowest responsible bidder after due advertisements."

Decry Curtailment

Issuance of the policy declaration places the AGC on record as favoring continuing appropriations for advance planning and "orderly economical construction" of highways, flood control projects, rivers and harbors, reclamation jobs, soil conservation and rural electrification undertakings, as well as "similar public works".

Taking up first a general explanation of AGC feeling with respect to government handling of public works construction, the statement develops the contractors' viewpoint on financing and purpose of orderly planning in advance of construcion. It reads:

"Future development of communities and of the nation can be retarded by over-drastic curtailment of public works construction. The position of our association has been, and still is, that public works construction projects should be undertaken only to fill a definite need for the physical improvement. To attempt to curtail public works construction below that point will be detrimental to proper development of communities and the national economy."

'Parts Is Costly'

The AGC policy statement also attacks the principle of laying by planned public works for a period of unemployment. Such a course increases costs, it said, in reference to federal-instigated jobs.

$35 MILLION FOR COMPLETING TEMPS

WASHINGTON.—The first of a large number of housing bills in Congress has been signed by the President—S. 854, the measure providing for completion of temporary re-use housing.

This bill authorizes expenditure of $35 million for bringing the veterans' temporary re-use housing program to completion.

#

MORGANS AT WILLAMETT

PORTLAND.—Arthur Morgans, auditor of the West Coast Lumbermen's Association, has resigned and after June 1 will be chief auditor for the Willamette Valley Lumber Company and associated companies. As chief auditor, he will have charge of offices at Corvallis, Portland, Dallas, Foster, and Snow Peak, Oregon.

Heralds Return to Competition As Key To Cost Reduction

CORONADO.—The general increase in efficiency that will return with competitive conditions and not the miracle homes or government decrees will be the major factor in stabilizing building costs David D. Bohannon, past president of the National Association of Home Builders, told the members of the California Real Estate Association today in addressing the annual meeting here.

Bohannon, who is also regional vice-president of the National Association of Real Estate Boards, called attention to each of the various factors that enter into building costs in making the prediction that building costs would be stabilized at a level substantially higher than pre-war and not much under today's prices.

He attributed this primarily to the general shrinkage in the purchasing power of the dollar resulting from war-time suspension of production of civilian goods and generally increasing purchasing power, and particularly to government inflationary policies rising out of financing the war.

History is repeating itself, Bohannon stated, and the fact is that building costs today, high as they are, have risen less proportionately over pre-war levels than after the last war.

One of the factors not often considered that makes today's prices seem excessive, he pointed out, is the functional value that has been added to the modern home. "Today's home is a highly engineered product" designed for easier housekeeping, lower depreciation and greater comfort and convenience than the old type home. Government restrictions on the size of the house that can be built have obviously tended to emphasize the quality and functional value of materials and equipment that goes into it."

In closing, he sounded an optimistic note for the building industry as competitive conditions begin to return, predicting that the final splurge that followed the end of price control is about spent.

#

9,720 HOMES GO UP IN BRITAIN IN APRIL

WASHINGTON. — The British ministry of health has announced that 9,720 permanent new homes were completed in Britain during April. This compares with 6,719 in March and 4,432 in February.

Progress is slower in the construction of temporary housing units. Britain produced 4,947 of these in April compared with 2,256 in March and 2,401 in February.

Due to lack of materials caused largely by lack of shipping potential, England is making slow progress toward housing its bombed out populace.

Hundreds of thousands reportedly were left homeless when enemy air raids concentrated on the islands' heavy industrial centers.

A good share of England's building materials must be shipped in from foreign sources.

OHE PERMITS GRANTED

SAN FRANCISCO.—The Office of Housing Expediter, division of non-residential construction, 1275 Market St., has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area:

June 3, 1947

SHOE STORE, $2,175; owner, Mr E H Cassidy, 121 W 7th Hanford.

OFFICE BLDG, $79,200, 400 Mission San Francisco; owner, Real Estate Associates, 604 Mission, San Francisco, Calif.

ELECTRICAL SHOP, $5,400; Lot 2, Blk 2, Sub 5, Salinas; owner, Charles T Burke, 1433 Wiren, Salinas.

TRUCK SERVICE, $30,000; Atlantic & Almond, Roseville; owner, Carbofino & Macario, 527 Riverside, Roseville.

FARM MACHINERY STORE, evlction, $166,000; Hiway 24, Woodland; owner, Ray D Henderson Co, 433 2nd, Woodland.

OFFICE SPACE, $6,200; owner, Alameda Co Master Plumbers Assoc, 538 24th, Oakland.

WHOLESALE CARPETS, $2,550; owner, Alexander Smith & Sons Carpet Co, 1355 Market San Francisco, Calif.

OPTOMETRIST & BOOK STORE, $11,175; owner, Dr Eugene Laisne' 721 Market, San Francisco.

FOOD MARKET, $18,000; Lots 1, 2, 3, 4, Blk 3, Sequoia Tract; owner, Sam Palladino, 154, Belmont, Redwood City.

JEWELRY STORE, Wiring condemned, $5,026; owner, A Hirsh & Son, Inc, 19 S 1st San Jose.

TO COMPLETE ADDITION to Grocery Store, $400; 41st Ave & Capitola, Santa Cruz; owner, Rossi & Legge, Rt 2, Box 400, Santa Cruz.

WAREHOUSE FOR HARDWARE $4,300; 3rd So of Revere, San Francisco; owner, R Barsotti, 1649 Newhall, San Francisco.

UPHOLSTERING SHOP, $4,155; Lot 3, Blk 6, Sub 1, Truckle; owner, Jim A Baugh, 1107 Tehama, Redding.

FOOD PROCESSING PLANT, $9,200; owner, A M Grube Co, 900 Lenzen, San Jose.

ALTERATIONS TO OFFICE Space, $6000; 620 Market, San Francisco; owner, Crocker Estate, 660 Market, San Francisco.

SANITARY CONVENIENCES at Playfield, $7,000; H F Playfield at 45th, San Francisco; owner, City & Co of San Francisco Park Com, McLaren Lodge, San Francisco.

FIRE EXITS from HOSPITAL, $12,000; 14th & Noe St, San Francisco; owner, The Franklin Hospital, 333 Montgomery, San Francisco.

PAINT WAREHOUSE, $60,200; owner, Morwear Paint Co, 2836 Hannah, Oakland.

JUNE 4, 1947

SHOE Store, $7500; 160 Cleavland, Auburn; owner, J. Gordon Mackay, 164 Cleavland, Auburn.

COMPLETE Dress Shop, $1500; 899

Quake Provisions

(Continued from Page One)

quake safeguards ranges from a few per cent up to five per cent," Professor Jacobsen asserted. He pictured the code as not ideal, and stressed the fact that many concessions had been made.

"What has been left out of that code is a great deal," he told the supervisors. "What has been left in is very little."

Among those urging that the recommendations of the citizens' advisory committee be adopted instead of the DPW-backed regulations, was John Blume, structural engineer.

Chief Administrative Officer Thomas A. Brooks, representing the administrative branch of city government, backed up the department of works in a statement of policy before the final vote was taken.

At the conclusion of the hearing, Supervisor Marvin E. Lewis moved that the report of the citizens' advisory committee, headed by William H. Popert, paid representative of the American Institute of Steel Construction and executive-secretary of the Structural Engineers Association of Northern California, be adopted in its entirety. The motion was refused by a 5-4 vote.

Lewis then attempted to block a motion that the department of works draft be incorporated into the code.

Said Lewis: "This is one of the most important matters that will ever come before this, or any other board of supervisors. It is vital legislation, and I ask that consideration be held over until a full board is present."

Overriding the request for postponement, Supervisor Edward Mancuso moved incorporation of Article 23, with a minor revision modifying regulations for buildings more than 27 stories high, into the code.

This motion carried, 5-4. Eu'dorsing it were Supervisors Colman, MacPhee, Mancuso, J. Joseph Sullivan, and George Christopher.

Nay votes were cast by Dan Gallagher, president of the board; Pat McMurray, Dewey Mead and Marvin E. Lewis. Two supervisors—John J. Sullivan and Fred Meyer—were not present.

It would be a mater of no great surprise should a motion to rescind this action be introduced at next Monday's meeting since there was not a full board present. Such a motion would require only a majority vote, whereas an amendment once the code is passed would require six of the eleven supervisorial votes.

At any rate, reliable sources in the opposition said lateral forces is "far from a dead issue". Should the Wednesday vote be rescinded next Monday, it is extremely likely that a move will be made to exclude all of Article 23 from the proposed code on its final passage, holding it up for further intensive study.

If no attempt is made to rescind action and the code is passed with its earthquake provisions left in, it is very likely that further hearings on amending Article 23 will be started immediately after passage. This disclosure came from a prominent city hall leader late Thursday. This would be on the instigation of the Structural Engineers' Association.

The Associated Home Builders of San Francisco asked revision of a provision limiting to $1,000 the coverage of a surety bond to guarantee that city streets are returned to their original condition after completion of construction projects. By a unanimous vote, the supervisors raised the lid to $2,000. A cash deposit of $30 on each lot may also be made.

Official Proposal

NOTICE TO CONTRACTORS

Subject to conditions prescribed by the undersigned, sealed bids are invited for the construction of approximately 1,950 feet of underground electric ducts and manholes in the vicinity of Agricultural Hall on the Berkeley campus of the University of California. Bids will be received until 2:00 P. M., June 10, 1947. Plans, specifications and information will be available at the cashier's office, 103 Administration Building, University of California, Berkeley, California. A deposit of ten ($10.00) dollars is required for each set of plans and specifications issued. Right to reject any and all bids is reserved.

Signed:
THE REGENTS OF THE
UNIVERSITY OF CALIFORNIA
(May 28, 29, June 2, 3, 4, 5, 6, 9, 10, 11, 1947)

QUICK DELIVERY FROM STOCK PARTS

Spiral STAIRS

. . . occupy minimum area . . . sizes from 4- to 8-foot diameters. Welded steel construction with heavy pipe columns and railings assure adequate strength, while non-skid checkered steel treads provide safety. ARISTON *Spiral* STAIRS are easily erected in new or existing buildings by your workmen or our mechanics. Write or phone for complete information.

LARGEST CONSTRUCTION DAILY IN THE WEST

SECTION TWO FRIDAY, JUNE 6, 1947 PAGE 9

New Home Electrical Marvel

A house designed for modern living is the new home of Mr. and Mrs. Richard Walberg, 16 Spruce Street, San Francisco. Because of well-planned lighting and full use of electrical conveniences, it is an outstanding example of the functional home built for utmost comfort and utility.

Besides providing for the desired electrical installations, Architects J. Francis Ward and John S. Bolles encountered an interesting problem presented by an L-shaped lot. The lot slopes steeply to Pacific Avenue, overlooking the San Francisco Presidio, with a frontage of 45 feet and a depth of 100 feet. At the top is the arm of the "L", on a strip 12 by 80 feet extending to Spruce Street. There was a height limitation on the roof line of 35 feet above Pacific Avenue.

213 Electrical Outlets

The architects' solution was a house designed on three levels, with the entrance at the top of the lot, approached by a stone-walled drive from Spruce Street, and the service entrance at the bottom on Pacific Avenue.

On the top level are the living room, den, guest room, dining room, kitchen, dinette, laundry and garage. A short flight of stairs leads down to the master bedroom with adjacent dressing room and bath, the bedroom of the owners' young son Richard, with connecting bath, and an open-air patio. The maid's bedroom and bath has entrance from the service stairway.

The utility room on the lowest level has provision for a workshop with power tools and the son's electric train in addition to the furnace and other equipment.

Ideally wired, and constructed in every detail with thoroughness and care, the Walberg house will still be modern many years hence, a credit to its builders and a source of pride to its owners. To say that it has no fewer than 213 electrical outlets and plug receptacles, served by 46 circuits, gives an idea of how thoroughly the house has been designed for electrical living, not only now but for the future.

Includes Intercom

Electrical conveniences, personally selected by Mrs. Walberg, contribute to ease of living everywhere in the house. Mr. Walberg, of the construction firm of Swinerton and Walberg, was the builder. The wiring design was laid out by Harold A. Wright, consulting engineer engaged by Architects Ward and Bolles, and the installation was by Victor Lemoge.

The first evidence of the Walberg's planning is automatic operation of the garage door, controlled by a magnetic signal at the touch of a button on the dashboard as the car enters the driveway. The magnet that closes the circuit is sunk in the concrete driveway.

Many steps are saved by voice intercommunication equipment wired throughout the house. Master stations, which permit initiation of calls, are located in the kitchen, living room, den, master bedroom, son's bedroom, and basement workroom. Auxiliary stations are located at the front door, in the guest room, and in the servant's bedroom. Conversations with the latter three stations must be initiated at one of the master stations. The equipment consists of near grilled speakers set flush in the wall and selector switches in panels labeled with the names of the stations.

Ultra-Violet Heat

The heating is by automatic hot water boiler with convectors in the rooms partially recessed. The gas-fired boiler is electrically controlled and required a special circuit. The son's bedroom has an indirect heating system with fan, the air being warmed by passage over hot water coils, and conduit and a switch were provided for future installation of a Westinghouse Precipitron. This will remove dust from the air by electronic precipitation before the air is circulated to the room.

Another measure for cleanliness and health is the installation in the bedrooms of germicidal lamps producing ultra - violet radiation. There are mounted above eye level inside shields that prevent exposure of the occupants to the direct rays.

Five Telephones

For quick warmth on chilly mornings, ultra-violet sun lamps are installed flush in the ceiling of three bathrooms, over the wash basin in two and over the tub in the other.

The kitchen is a model of convenience. Designed for ample working space, it has long food preparation counters lighted both by fluorescent lamps concealed beneath the cabinets and by panels of glass blocks in the wall to admit daylight. Additional light on the work centa is provided by spotlights recessed in the ceiling. Installed under the cabinets is plug-in strip for unlimited use of small electrical appliances. Between the kitchen and dining room is a butler's pantry with auxiliary sink and additional work counters provided with convenience outlets. An outlet near the ceiling was provided for an electric clock.

The main sink is equipped with a General Electric garbage Disposall. The range is vented and there is a fan driven by a quarter horsepower motor for removing fumes. A one inch conduit with three No. 6 wires was laid for the electric range. A kitchen desk is equipped with a telephone. Altogether there are five telephone outlets, the others being in the guest room, master bedroom, son's bedroom, and at a wall desk in the second floor hallway.

Off the kitchen is the laundry, in which the automatic washing machine will later be matched by an electric drier. Opening from the laundry is a large built-in home freezer with wide storage shelves and full-length doors.

Not the least of the electrical features of the Walberg home is the lighting, which was designed to contribute to the room's spaciousness, accent their beauty, and provide adequate levels of illumination for all seeing tasks.

White fluorescent lamps in flush troffers with wide spread Holophane lenses have been employed throughout, supplemented by numerous inset pinhole spotlights. In the master bedroom, spotlights on either side of the bed cast beams at an angle for comfortable reading in bed. Similar reading lights are installed over the bed and over a couch in the son's room. The full wall mirror of the dressing room is lighted on three sides by white fluorescent lamps in coves. The shower stall light is enclosed in a waterproof globe.

Switches Silent

Pin-hole spotlights are used at each end of the fluorescent until over the dining table to accent the table setting. There is a spotlight to light the music on the grand piano in the living room, and another over the card table in the den. A built-in bar in the den is equipped with fluorescent lighting, hot water, and a remotely controlled refrigerator.

All closet lights are operated by door switches. There are numerous three and four-way switches. All wall switches are of the mercury type, which are silent and can never wear out. A drop of mercury rolls into place to make electrical contact when the lights are switched on. When lights are off, the switch plates are visible in the dark, lighted by small neon glow lamps. At the front door is a keyhole light. The driveway is lighted by incandescent lamps set into the stone wall, and the house number in the end of the wall is lighted.

Precludes Obsolescence

One of the good features of the wiring is the use of Class 1 circuit breakers in place of fuses. There are three panels, the main one in the basement having 8 circuits and those on the first and second floors 12 and 26 respectively. The distribution circuit is No. 12 or larger, carried in flexible steel conduit and metallic tubing. The main feed is underground and consists of 3 conductor No. 4/0 wire insulated with varnished cambric and sheathed in lead. This exceptionally heavy feed provides capacity for future additional electrical appliances and lighting. The house has 129 outlets, 84 plug receptacles, and 94 switches.

With such wiring and with the careful attention given to all the other details of the house, it is certain not to become electrically "outgrown" in any near future, as is the fate of too many houses now being buit.

ASPHALT ROOFING IS AT ALL-TIME RECORD

WASHINGTON. — Shipments of asphalt roofing established an all-time high of six million squares in April, according to preliminary figures released today by the bureau of the census. Shipments in April were almost 900 thousand squares more than in the corresponding month of last year, 750 thousand squares greater than March shipments, and 260 thousand squares above shipments in January, 1947, the previous peak.

Shipments of asphalt sidings in April amounted to 463 thousand squares, a slight increase over March but an 18 per cent gain over shipments in the corresponding month of last year. Shipments of saturated felt rose slightly above the March level; 30,277 tons were shipped in April compared with 28,408 tons in March, a gain of 7 per cent.

#

INSURED $10 BILLION

WASHINGTON. — The federal housing administration has now insured more than $10 billion of loans under various phases of its program, it was announced today by Raymond M. Foley, FHA commissioner. More than half of this amount has been repaid or amortized, he said.

TEC Labs Develop New, Better Uses For Wood Products

WASHINGTON.—Research facilities for the lumber and wood using industries and other industrial users of wood are described in a new publication released today by the Timber Engineering Company, an affiliate of the National Lumber Manufacturers Assn.

Investigations in TEC's wood products development laboratory include such developments as laminated industrial parts, quick setting room temperature adhesives, cigarette burn-proof and alcohol-proof furniture tops.

The company's chemistry laboratory deals in wood chemistry, including problems pertaining to pulp, plastics, wood sugar, lignin and other wood derivaties.

Special attention is given to utilizing wood waste. Present investigations on hardwood waste show a wide range of promising new commercial products, according to Carl A. Rishell, director of research.

#

A petition is being circulated in East Ely to determine if a sewer system is favored in that area.

CREEDON ESTIMATES HOME BUILDING AT A MILLION IN '47

WASHINGTON. — At least 1,000,000 dwelling units of all types, of which about 750,000 will be new permanent homes, will be completed this year if controls on residential construction are continued for a few more months, Housing Expediter Frank R. Creedon said Friday. It will be the best year on housing completions since the middle twenties, he added.

"This is the first time since I was appointed housing expediter last December that I have been willing to make a statement as to the number of houses that I expect to be built this year," Creedon said. "As an engineer, I have been interested in facts, not guesses. I now have sufficient facts before me to base an estimate—not a prediction — on the number of houses that will be made ready for occupancy in 1947."

#

EXPAND MEMBERSHIP

WASHINGTON.—The community builders council of the Urban Land Institute, previously limited to twenty-four of the outstanding land developers in the country, is opening its membership to all those responsibly engaged in land development, Seward Mott, executive director of the Institute, announced today.

Use of Underground Cav Vital Industries Gets Eng

WASHINGTON.—"Protective Con are expected to crop up increasingly i and engineers.

"They describe a new science in ground caverns for locating essential

Attention has been turned on the of mines ordered by the U. S. Army corps of engineers and a private engineer, Guy B. Panero of New York City.

Head of the Guy B. Panero engineering firm, the New Yorker has been retained to complete a $150,000 survey of the man-made caverns.

Review Past Plans

Panero has emphasized three new approaches to architectural problems brought about by the decision to study underground plant sites. These will prove essential in any completed plans, he said:

1—Wider use of new materials.
2—Use of new methods of construction.
3—Use of a new structural approach to construction.

He adds this note of warning: any past plans held over from prewar days, that any individual industrialist might now consider, should be re-studied carefully to take advantage of specialized knowledge gained by the advanced engineering studies.

Previous surveys on the availability of mines for the location of essential plants have proved the need for additional investigations in this field, Panero said. All vital industries are being given consideration as the new studies move forward, he explained. Several additional consultants have been placed on his staff to assist in the work. Complete analysis of all technical problems involved is planned.

This "protective engineering" or "protective construction" as the army designates it, marks a new beginning, an important phase of engineering work which will have to be recognized and taken up by industry, Panero declared.

His background fits him for such an undertaking. He has studied and reported to American officials on underground installation of factories in Sweden, Germany and France. Some of these were in operation as early as 1938.

According to Lieut. Gen. R. A. Wheeler, chief of engineers, the "protective construction" program is being undertaken to develop information for potential protection of essential war plants against aerial raids such as wrecked enemy industry in the last war. The overall program, he added, will entail investigations in both this country and Europe, and will include cost, as well as technical data on existing foreign underground installations, insofar as practicable.

Natural Caves Out

Considerations in this country will be directed toward existing mines, such as gypsum, copper, lead, zinc, limestone, marble, salt, sandstone and, to a lesser degree, other type mines scattered over half the 48 states.

While military secrecy precludes detailed announcement of results of surveys made to date, the army did say that the availability of several hundred million square feet of usable underground sites in existing mines can be revealed.

"The current investigations," army adds, "will be to determine the feasibility and cost of constructing and operating plants and storage depots in this type of underground site. To be considered, a mine has to have in excess of 20,000 square feet of usable floor space, a roof height of not less than eight feet, and a reasonably level floor.

"Natural caves are not being considered at this time as they are, in general, relatively small, irregular in character, and at a considerable distance from suitable transportation. Because a majority were formed through erosion by water and have high humidity, they are difficult to modify for plant use."

Make Industrial Study

The army's statement continues: "The second type of site to be considered under the current investigation is the underground chamber purposely excavated to suit the requirements of the plant or storage facilities involved. This type of site calls for an investigation of geological formations best adapted to this purpose.

"The current, over-all program entails the potential future use of any new construction and construction methods that may be developed by the corps of engineers. It also entails an above-ground and underground comparison of the cost, construction and operation of a chemical processing plant, involving large tanks and appurtenances, the generation of large amounts of heat and noxious gases, and having certain explosive hazards.

"The same line of investigations will be followed in regard to pre-

Electrical conveniences, personally selected by Mrs. Walberg, contribute to ease of living everywhere in the house. Mr. Walberg, of the construction firm of Swinerton and Walberg, was the builder. The wiring design was laid out by Harold A. Wright, consulting engineer engaged by Architects Ward and Bolles, and the installation was by Victor Lemoge.

The first evidence of the Walberg's planning is automatic operation of the garage door, controlled by a magnetic signal at the touch of a button on the dashboard as the car enters the driveway. The magnet that closes the circuit is sunk in the concrete driveway.

Many steps are saved by voice intercommunication equipment wired throughout the house. Master stations, which permit initiation of calls, are located in the kitchen, living room, den, master bedroom, son's bedroom, and basement workroom. Auxiliary stations are located at the front door, in the guest room, and in the servant's bedroom. Conversations with the latter three stations must be initiated at one of the master stations. The equipment consists of near grilled speakers set flush in the wall and selector switches in panels labeled with the names of the stations.

Ultra-Violet Heat

The heating is by automatic hot water boiler with convectors in the rooms partially recessed. The gas-fired boiler is electrically controlled and required a special circuit. The son's bedroom has an indirect heating system with fan, the air being warmed by passage over hot water coils, and conduit and a switch were provided for future installation of a Westinghouse Precipitron. This will remove dust from the air by electronic precipitation before the air is circulated to the room.

Another measure for cleanliness and health is the installation in the bedrooms of germicidal lamps producing ultra-violet radiation. There are mounted above eye level inside shields that prevent exposure of the occupants to the direct rays.

Five Telephones

For quick warmth on chilly mornings, ultra-violet sun lamps are installed flush in the ceiling of three bathrooms, over the wash basin in two and over the tub in the other.

The kitchen is a model of convenience. Designed for ample working space, it has long food preparation counters lighted both by fluorescent lamps concealed beneath the cabinets and by panels of glass blocks in the wall to admit daylight. Additional light on the work cents is provided by spotlights recessed in the ceiling. Installed under the cabinets is plug-in strip for unlimited use of small electrical appliances. Between the kitchen and dining room is a butler's pantry with auxiliary sink and additional work counters provided with convenience outlets. An outlet near the ceiling was provided for an electric clock.

The main sink is equipped with a General Electric garbage Disposall. The range is vented and there is a fan driven by a quarter horsepower motor for removing fumes. A one inch conduit with three No. 6 wires was laid for the electric range. A kitchen desk is equipped with a telephone. Altogether there are five telephone outlets, the others being in the guest room, master bedroom, son's bedroom, and at a wall desk in the second floor hallway:

Off the kitchen is the laundry, in which the automatic washing machine will later be matched by an electric drier. Opening from the laundry is a large built-in home freezer with wide storage shelves and full-length doors.

Not the least of the electrical features of the Walberg home is the lighting, which was designed to contribute to the room's spaciousness, accent their beauty, and provide adequate levels of illumination for all seeing tasks.

White fluorescent lamps in flush troffers with wide spread Holophane lenses have been employed throughout, supplemented by numerous inset pinhole spotlights. In the master bedroom, spotlights on either side of the bed cast beams at an angle for comfortable reading in bed. Similar reading lights are installed over the bed and over a couch in the son's room. The full wall mirror of the dressing room is lighted on three sides by white fluorescent lamps in coves. The shower stall light is enclosed in a waterproof globe.

Switches Silent

Pin-hole spotlights are used at each end of the fluorescent until over the dining table to accent the table setting. There is a spotlight to light the music on the grand piano in the living room, and another over the card table in the den. A built-in bar in the den is equipped with fluorescent lighting, hot water, and a remotely controlled refrigerator.

All closet lights are operated by door switches. There are numerous three and four-way switches. All wall switches are of the mercury type, which are silent and can never wear out. A drop of mercury rolls into place to make electrical contact when the lights are switched on. When lights are off, the switch plates are visible in the dark, lighted by small neon glow lamps. At the front door is a keyhole light. The driveway is lighted by incandescent lamps set into the stone wall, and the house number in the end of the wall is lighted.

Precludes Obsolescence

One of the good features of the wiring is the use of Class 1 circuit breakers in place of fuses. There are three panels, the main one in the basement having 8 circuits and those on the first and second floors 12 and 26 respectively. The distribution circuit is No. 12 or larger, carried in flexible steel conduit and metallic tubing. The main feed is underground and consists of 3 conductor No. 4/0 wire insulated with varnished cambric and sheathed in lead. This exceptionally heavy feed provides capacity for future additional electrical appliances and lighting. The house has 129 outlets, 84 plug receptacles, and 94 switches.

With such wiring and with the careful attention given to all the other details of the house, it is certain not to become electrically "outgrown" in any near future, as is the fate of too many houses now being buit.

ASPHALT ROOFING IS AT ALL-TIME RECORD

WASHINGTON. — Shipments of asphalt roofing established an all-time high of six million squares in April, according to preliminary figures released today by the bureau of the census. Shipments in April were almost 900 thousand squares more than in the corresponding month of last year, 750 thousand squares greater than March shipments, and 200 thousand squares above shipments in January, 1947, the previous peak.

Shipments of asphalt sidings in April amounted to 463 thousand squares, a slight increase over March but an 18 per cent gain over shipments in the corresponding month of last year. Shipments of saturated felt rose slightly above the March level; 30,277 tons were shipped in April compared with 28,408 tons in March, a gain of 7 per cent.

#

INSURED $10 BILLION

WASHINGTON. — The federal housing administration has now insured more than $10 billion of loans under various phases of its program, it was announced today by Raymond M. Foley, FHA commissioner. More than half of this amount has been repaid or amortized, he said:

TEC Labs Develop New, Better Uses For Wood Products

WASHINGTON.—Research facilities for the lumber and wood using industries and other industrial users of wood are described in a new publication released today by the Timber Engineering Company, an affiliate of the National Lumber Manufacturers Assn.

Investigations in TEC's wood products development laboratory include such developments as laminated industrial parts, quick setting room temperature adhesives, cigarette burn-proof and alcohol-proof furniture tops.

The company's chemistry laboratory deals in wood chemistry, including problems pertaining to pulp, plastics, wood sugar, lignin and other wood derivaties.

Special attention is given to utilizing wood waste. Present investigations on hardwood waste show a wide range of promising new commercial products, according to Carl A. Rishell, director of research.

#

A petition is being circulated in East Ely to determine if a sewer system is favored in that area.

CREEDON ESTIMATES HOME BUILDING AT A MILLION IN '47

WASHINGTON. — At least 1,000,000 dwelling units of all types, of which about 750,000 will be new permanent homes, will be completed this year if controls on residential construction are continued for a few more months, Housing Expediter Frank R. Creedon said Friday. It will be the best year on housing completions since the middle twenties, he added.

"This is the first time since I was appointed housing expediter last December that I have been willing to make a statement as to the number of houses that I expect to be built this year," Creedon said. "As an engineer, I have been interested in facts, not guesses. I now have sufficient facts before me to base an estimate—not a prediction — on the number of houses that will be made ready for occupancy in 1947."

#

EXPAND MEMBERSHIP

WASHINGTON.—The community builders council of the Urban Land Institute, previously limited to twenty-four of the outstanding land developers in the country, is opening its membership to all those responsibly engaged in land development, Seward Mott, executive director of the Institute, announced today.

Use of Underground Caverns for Locating Vital Industries Gets Engineers Attention

WASHINGTON.—"Protective Construction" are two words which are expected to crop up increasingly in the vocabularies of architects and engineers.

They describe a new science in engineering—the use of underground caverns for locating essential industries.

Attention has been turned on the new work by an investigation of mines ordered by the U. S. Army and to be undertaken by the corps of engineers and a private engineer, Guy B. Panero of New York City.

Head of the Guy B. Panero engineering firm, the New Yorker has been retained to complete a $150,000 survey of the man-made caverns.

Review Past Plans

Panero has emphasized three new approaches to architectural problems brought about by the decision to study underground plant sites. These will prove essential in any completed plans, he said:

1—Wider use of new materials.
2—Use of new methods of construction.
3—Use of a new structural approach to construction.

He adds this note of warning: any past plans held over from prewar days, that any individual industrialist might now consider, should be re-studied carefully to take advantage of specialized knowledge gained by the advanced engineering studies.

Previous surveys on the availability of mines for the location of essential plants have proved the need for additional investigations in this field, Panero said. All vital industries are being given consideration as the new studies move forward, he explained. Several additional consultants have been placed on his staff to assist in the work. Complete analysis of all technical problems involved is planned.

This "protective engineering" or "protective construction" as the army designates it, marks a new beginning, an important phase of engineering work which will have to be recognized and taken up by industry, Panero declared.

His background fits him for such an undertaking. He has studied and reported to American officials on underground installation of factories in Sweden, Germany and France. Some of these were in operation as early as 1938.

According to Lieut. Gen. R. A. Wheeler, chief of engineers, the "protective construction" program is being undertaken to develop information for potential protection of essential war plants against aerial raids such as wrecked enemy industry in the last war. The overall program, he added, will entail investigations in both this country and Europe, and will include cost, as well as technical data on existing foreign underground installations, insofar as practicable.

Natural Caves Out

Considerations in this country will be directed toward existing mines, such as gypsum, copper, lead, zinc, limestone, marble, salt, sandstone and, to a lesser degree, other type mines scattered over half the 48 states.

While military secrecy precludes detailed announcement of results of surveys made to date, the army did say that the availability of several hundred million square feet of usable underground sites in existing mines can be revealed.

"The current investigations," army added, "will be to determine the feasibility and cost of constructing and operating plants and storage depots in this type of underground site. To be considered, a mine has to have in excess of 30,000 square feet of usable floor space, a roof height of not less than eight feet, and a reasonably level floor.

"Natural caves are not being considered at this time as they are, in general, relatively small, irregular in character, and at a considerable distance from suitable transportation. Because a majority were formed through erosion by water and have high humidity, they are difficult to modify for plant use."

Make Industrial Study

The army's statement continues:

"The second type of site to be considered under the current investigation is the underground chamber purposely excavated to suit the requirements of the plant or storage facilities involved. This type of site calls for an investigation of geological formations best adapted to this purpose.

"The current, over-all program entails the potential future use of any new construction and construction methods that may be developed by the corps of engineers. It also entails an above-ground and underground comparison of the cost, construction and operation of a chemical processing plant, involving large tanks and appurtenances, the generation of large amounts of heat and noxious gases, and having certain explosive hazards.

"The same line of investigations will be followed in regard to precision manufacturing plants requiring exact temperature and humidity control. The physiological effect on workers also will be studied.

Long Range Plan

"In addition to his own highly trained staff and the full resources of the office of the chief engineers, Panero will have access to design, construction costs, and operating experience records of several major firms engaged in plant design, construction and operation during World War II.

"The studies are a part of a long-range program and are being developed under the policy direction of the army-navy munitions board."

Jap Establishment Of Underground Plants Was Rapid

DAYTON, Ohio.—Studies made by analysts at army air forces headquarters in Washington and at air material command headquarters at Wright Field, Ohio, have disclosed that the Japanese achieved some remarkable results in their resort to underground manufacturing of aircraft and component parts to escape American bombs.

The analysis of foreign manufacturing experience is a part of the current army air forces industrial preparedness planning program.

The Japs started dispersal of the Nakajima Aircraft Plant No. 3 of the Ota Works in 1945 due to the destruction caused by B-29's of the 20th Air Force. The major portions of the dispersal sites were existing stone quarries in the Oya area.

The Otome plant for fabrication of sheet metal parts was put into an underground installation consisting of 12 parallel tunnels driven through a hill so as to be open at both ends. In general, this plant was similar to the German plan for the horizontal type plant.

Stone quarries in close proximity to each other and varying in size from a few thousand square feet to 98,000 square feet were utilized by the Japs. Entrance was gained by means of vertical shafts and inclined ramps apparently depending upon the topography of the locale. One outstanding feature of this group of underground sites was the utilization of existing tunnels connecting the various plants to form a network of underground installations. The actual floor space used in 19 plants was 196,342 square feet, and additional space was proposed to bring this area to 647,584 square feet.

This network of plants was engaged in the manufacture and assembly of airframe and engine components. However, the Japs experienced an excessive amount of corrosion of machine tools and machine parts due to the high humidity of the quarries. This condition was due to the lack of air conditioning with the exception of crude fan installations.

AMC officials were astonished to find the short period between the beginning of construction and the date when production commenced. In this particular undertaking, construction facilities began in January and aircraft components were produced in February, a period of only one month. Production was pretty well advanced by April, and more machine tools were being installed until the end of the war.

In an underground engine plant, the actual production rate was 24 Ha-45 engines per day while the scheduled rate was 300 per day. However, large stock piles of castings, forgings, machined parts and sub-assemblies indicated that the actual rate would soon be accelerated.

The Japs included rail transportation and some utility provisions within the plants that were evidently independent of outside sources.

#

TELL INNOVATIONS

WASHINGTON.—New products for use in construction are featured in the May issue of Construction Industry Report, which is prepared by the construction division of the Commerce Department. Copies may be obtained upon written request to the Department of Commerce, Washington 25, D. C.

Engineering Section

(Continued from First Section)

31-32—WATER SUPPLY & SEWAGE DISPOSAL PLANTS

6/6/47 31
Contract Awarded
Water Storage Tank Cost $32,250
YUBA CITY, Calif., Sutter County.
Owner — City of Yuba City, Anita Owen, city clerk, City Hall, Yuba City, Calif.
City Engineer—George Reed, City Hall, Yuba City, Calif.
150,000-gallon water storage tank.
Contractor—Pittsburgh-Des Moines Steel Co., Rialto Bldg., San Francisco, Calif.

6/6/47 32
Preliminary Plans in Progress
Sewage Treatment Plant Enlargement Cost $75,000
REEDLEY, Calif., Fresno County.
Owner—City of Reedley, city clerk, City Hall, Reedley, Calif.
Engineer—Quinton Engineers, Ltd., 816 S. Figueroa St., Los Angeles, Calif.

33— BRIDGES

6/6/47 33
Owner Taking Bids—Due June 25, 11 A. M.
Girder Bridge
SANTA MARIA RIVER, Arizona. Across the Santa Maria River on the Wickenburg-Kingman Highway approx. 40 miles northwest of Wickenburg.
Owner — Arizona State Highway Commission, 17th Ave. and Jackson St., Phoenix, Ariz.
Plans by engrg. dept. of owner.
7 - span continuous girder bridge (steel girder or alternate, concrete box girder).
Specifications obtainable from the above office upon payment of $6.50.

6/6/47 33
Owner Taking Bids—Due June 18, 11 A. M.
Bridge (Removal)
BAKERSFIELD, Calif., Kern Co. Oak Street.
Owner—State of California, Division of Highways, E. T. Scott, district engineer, Fresno, Calif.
Plans by engineering department of owner.
Remove existing old concrete girder bridge on concrete piers.
The work involves:
(1) remove existing concrete bidge;
(2) 44 lin. ft. laminated guard railing.
Specifications obtainable from the above office.

6/6/47 33
Low and Only Bidders
Bridges, Grading and Surfacing Cost $1,210,040
KERN COUNTY, Calif. Between Bakersfield and Snow Road.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 3.6 miles grading, paving with portland cement concrete and with asphalt concrete and plant-mix surfacing on portland cement concrete base and on crusher run base and constructing four reinforced concrete bridges and two steel girder bridges.
Low Bidder—Griffith Co., 1060 South Broadway, Los Angeles, Calif., $1,210,040.
Work involves:
(1) 21C cu. yds. remove conc.;
(2) 2,600 cu. yds. remove pavement;
(3) clear and grubb;
(4) 150,600 cu yds. rdwy. excav.;
(5) 2,900 cu. yds. struct. excav.;
(6) 4,250 cu. yds. struct. excav. bridges;
(7) 190 cu. yds. ditch and channel excav.;
(8) 105,000 sq yds. compact original ground;
(9) 1,150 lin. ft. trench excav. for rodent barrier;
(10) 67,000 cu. yds. import borrow, type A;
(11) 122,000 cu. yds. import borrow type B;
(12) 2,720,000 sta. yds. overhaul;
(13) 9,000 sq. yds. prepare slopes, slope erosion protection;
(14) 18,000 sq. yds. prepare class C and Class D subgrade;
(15) develop water supply and furnish water equip.;
(16) 17,500 M. gals. apply water;
(17) 190 sta. finish rdwy.;
(18) 6,000 tons crusher run base;
(19) 61,000 sq. yds. mix and compact cement treated subgrade;
(20) 2,450 bbls. port. cement cement treated subgrade;
(21) 15,000 tons min. agg. plant mix surface;
(22) 75 tons liq. asph. SC-2 prime coat;
(23) 625 tons liq. asph. SC-4 plant mix surface;
(24) 130 tons liq. asph. SC-6 plant mix surface;
(25) 125 tons asph. emulsion paint binder, curing seal and seal coat;
(26) 1,600 tons asph. conc.;
(27) 1,550 lin. ft. asph. conc. raised bars;
(28) 3,425 cu. yds. port. cem. conc. base;
(29) 14,000 cu. yds. port .cem. conc. pavement;
(30) 10,000 each pave. tie bolt assemblies;
(31) 316 lin. ft. timber bridge railing;
(32) 4,364 cu. yds. class A port. cem. conc. structs.;
(33) 640,000 lbs. furnish bar reinf. steel;
(34) 640,000 lbs. place bar reinf. steel;
(35) 160 lin. ft. rubber water stop;
(36) 1,028,400 lbs. furnish struct. steel;
(37) 1,028,400 lbs. erect struct. steel
(38) 1,476 lin. ft. steel railing;
(39) 1,800 lin. ft. furnish steel railing;
(40) 4each steel piles splices;
(41) 2,400 lin. ft. furnish treat doug fir piles;
(42) 96 each drive piles;
(43) 830 cu. yds. port. cem. conc. curbs and gutters;
(44) 200 each curb dowels;
(45) 130 each right of way monuments;
(46) 2,750 lin. ft. metal plate guard railing;
(47) 230 each culvert markers and guide posts;
(48) 80 each move and reset culvert markers and guide posts;
(49) 1.9 miles new property fence;
(50) 2.0 miles remove and reconstruct exist property fences;
(51) 426 lin. ft. 12 in. reinf. conc. pipe;
(52) 98 lin. ft. 18 in. reinf. conc. pipe;
(53) 563 lin. ft. 24 in. reinf conc. pipe;
(54) 416 lin. ft. 8 in. CMP 16 gage;
(55) 154 lin. ft. 18 in CMP 16 gage;
(56) 690 lin. ft. 24 in. CMP 14 gage;
(57) 120 lin. ft. 30 in. CMP 14 gage;
(58) 48 lin. ft. 36 in. CMP 12 gage;
(59) 3 each field joints for siphons;
(60) 42 lin. ft. 8 in. perf. M P underdrains, 14 gage;
(61) 4 cu. yds. filter mtl.;
(62) 40 lin. ft. 24 in. perf M P 14 gage;
(63) 35 cu. yds. rock backfill mtl. sumps;
(64) 6 each cast iron frames and covers;
(65) 1,150 lin. ft. C M rodent barrier;
(66) 12 each spillway assemblies;
(67) 332 lin. ft. 8 in. CMP. downdrains, 16 gage;
(68) 101 lin. ft. salvago exist pipe culverts;
(69) 249 lin. ft. salvage exist 8 in. spillway assembly downdrains
(70) 28 lin. ft. relay salvaged C M pipe;
(71) 240 lin. ft. relay salvage 8 in. CMP downdrains;
(72) 11 each salvage exist spillway assemblies;
(73) 11 each install salvaged spillway assemblies;
(74) 85 each red reflectors;
(75) 40 each expansive anchor bolts
(76) 2,200 sq. yds. waterproofing track span;
(77) 34 lin. ft. 4 in. galv. iron pipe underdrain;
(78) 1,940 lin. ft. furnish timber piling Shoofly trestle;
(79) 66 each drive piles Shoofly trestle;
(80) 19,000 lbs. erect steel beams, Shoofly trestle;
(81) 32 M. ft. b. m. lbr. and timber, Shoofly trestle;
(82) misc. items;
(83) 30 each center line monuments;
(84) 10 each access opening markers;
(85) 1 each, move and reset palm trees;
Water Supply and Sprinkler System
(86) 200 lin. ft. drill water well;
(87) 60 lin. ft. perf. well casing;
(88) pump house;
(89) water, pump and assembly;
(90) 1,036 lin. ft. 4 in. galv. steel pipe, supply lines;
(91) 1,703 lin. ft. 3 in. galv. steel pipe, supply lines;
(92) 2,393 lin. ft. 2½ in. galv. steel pipe, supply lines;
(93) 1,680 lin. ft. 2 in. galv. steel pipe, supply lines;
(94) 183 lin. ft. 1½ in. galv. steel pipe, supply lines;
(95) 200 lin. ft. 1¼ in. galv. steel pipe, supply lines;
(96) 921 lin. ft. 1 in. galv. steel pipe, supply lines;
(97) 407 lin. ft. ¾ in. galv. steel pipe, supply lines;
(98) 62 each control assemblies;
(99) 1,014 lin. ft. 1¼ in. galv. steel pipe nozzle lines;
(100) 5,697 lin. ft. 1 in. galv steel pipe nozzle lines;
(101) 4,911 lin. ft. ¾ in. galv. steel pipe nozzle lines;
(102) 46 each sprinkler connections;
Landscaping
(103) 26 each plants No. 1;
(104) 470 each plants No. 2;
(105) 16 each plants No. 3;
(106) 33 each plants No. 4;
(107) 1,620 each plants No. 5;
(108) 1,750 each placing plants No .6;
(109) 50,000 each placing plants No. 7;
(110) 5,750 each placing plants No. 8;
(111) 5,000 each plants No. 9;
(112) 20,000 each placing plants No. 10;
(113) 83 each plants No. 11;
(114) 37,900 sq. yds. grass;
(115) 2 tons commercial fertilizer;
(116) 10 tons straw;
(117) preparatory underground traffic signal work.
The State will furnish steel beams for the Shoofly trestle, brass plates for center line monuments, sprinklers and plants Nos. Y, 7, 8, and 10.
Total bids May 28 were:
(A) Griffth Co., $1,210,040.00.
(B) Morrison and Knudsen, San Francisco, $1,334,418.00.

Reinforcing Steel Work (including welded mesh)—San Jose Steel Co., 195 N. 30th St., San Jose, Calif.
Structural Steel Work and Miscellaneous and Ornamental Iron (including all carpentry iron)—Soule Steel Co., 1750 Army St., San Francisco, Calif.

Official Proposals

FIRST PUBLISHED TODAY

Highway Improvement—Colusa, Glenn, Placer, Sacramento, Sutter, Yolo and Yuba Counties

STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock P. M., on July 2, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with the Specifications therefor, to which special reference is made, as follows:
Colusa, Glenn, Placer, Sacramento, Sutter, Yolo and Yuba Counties at various locations in District III, a net distance of about forty-one (41.0) miles, seal coat to be applied.
Bids are required for the entire work described herein.
In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate Per Hour
Asphalt plant dryerman or fireman	$1.90
Flagman (Colusa, Glenn, Placer, Sutter and Yuba Counties)	1.15
Flagman (Sacramento and Yolo Counties)	1.25
Laborer (Colusa, Glenn, Placer, Sutter and Yuba Counties)	1.15
Laborer (Sacramento and Yolo Counties)	1.25
Oiler distributor bootman	1.275
Oiler power shovels or cranes	1.90
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Roller operator	1.95
Tractor driver	1.95
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.225
Any classification omitted herein not less than	1.15
Overtime—one and one-half (1½) times the above rates.	

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.
No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)
The Department of Public Works reserves the right to reject any or all bids.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock P. M., on July 2, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with the Specifications therefor, to which special reference is made, as follows:
Sacramento County, between Sutter Street in Folsom and 3.7 miles east of Folsom (111-Sac-11-Fol, A), about four and two-tenths (4.2) miles in length, plant-mixed surfacing to be placed over existing pavement an imported borrow to be placed on shoulders.
Bids are required for the entire work described herein.
In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate Per Hour
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Flagman	1.25
Laborer	1.25
Motor grader operator	2.10
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Roller operator	2.25
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Laborer	
Concrete vibrator operator	1.375
Jackhammer operator	1.275
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.23
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.
The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.
The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.
The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.
Overtime—one and one-half (1½) times the above rates.
Sundays and holidays—one and one-half (1½) times the above rates.
The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.
The attention of bidders is particularly directed to the provisions of Section 1, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 6 articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.
Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.
No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.50
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Oiler power shovels or cranes	1.60
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.4075
Truck driver (less than 4 cubic yards water level capacity)	1.2625
Unskilled Labor	
Flagman	1.25
Laborer	1.25

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.875 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.25 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.25 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays — one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer, and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvements
San Mateo Co. on Canada Road

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m., on June 18, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing Highway in accordance with the Specifications therefor, to which special reference is made, as follows:

San Mateo County, on Canada Road, between 2.5 miles north of Woodside and Ralston Avenue (IV-SM-104B), about four and seven-tenths (4.7) miles in length, to be graded and surfaced with crusher run base and armor coat applied thereto.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Carpenter	1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity and paving type)	1.90
Concrete vibrator operator	1.375
Flagman	1.15
Jackhammer operator	1.15
Laborer	2.10
Motor grader operator	1.50
Oiler power shovels or cranes	1.50
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.16
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Pile driver man	1.86
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Any classification omitted herein not less than	1.15
Overtime—one and one-half (1½) times the above rates.	

Sundays and holidays—one and one-half (1½) times the above rates.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m., on June 18, 1947, at which time they will be publicly opened and read in the Assembly Room of said building for constructing highway in accordance with the specifications therefor, to which special reference is made, as follows:

Modoo County, across South Fork of Pit River, at Likely (II-Mod-73-C), a reinforced concrete bridge to be constructed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Carpenter	$1.75
Cement finisher	1.875

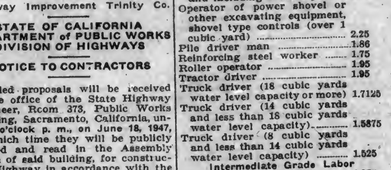
Hoists and Winches For Your Jobs

COFFING HOISTS



Models F-G, F-T-G, Z-G and W-G in stock. From 1½ ton to 15 ton capacity. These famous "Safety Pull" hoists cannot slip or drop load. Special stops prevent handle from spinning in case operator's hand slips off.

COFFING ELECTRIC HOIST

Plug in any AC or DC outlet. Heavy duty motor . . . ball bearing, high starting torque, single or three phase. Top and bottom hooks treated to stand 300% over rated capacity. Fool-proof safety limit switch. 86% mechanically efficient.

BRADEN-TULSA WINCHES

Famous original oil field winches. Models from 6000 lb. to 100,000 lb. line pull. Timken bearings, oil cooled safety brakes, minimum weight. Complete and ready for installation. 2 and 1 P.T.O.

Model M6-15B—12,000 lb. line pull.

Model M12-18B—25,000 lb rating.

See our complete stock of hoists and winches for every industrial and construction use. Stop in tomorrow.

"When We're Working in Close Quarters We TRAXCAVATE"

says Mr. J. E. Nelson of the firm of Johnson & Nelson, Marin County Contractors. "Our IT4 TRAXCAVATOR is the ONLY RIG for close-in work around foundations and concrete forms, and that's only one of the many jobs it does for us. It's one machine that keeps busy."

TRAXCAVATE for PROFIT

All over the country contractors are calling the Traxcavator "the busiest machine on the job," and here's why: They use it for land-clearing and for leveling; they use it for excavating and for truck loading; they use it for backfilling and for cleanup work. From the time the job is started 'til the earthwork is completed the Traxcavator is busy. That spells *profit* for the contractor because the profitable machine is the one that keeps busy. That's why we say

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on June 25, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Placer and Yolo Counties, at Sheridan, on the Yolo Causeway and through Loomis (III - Pla,Yol - 3,6,17-B,B,A), a net distance of about three and six-tenths (3.6) miles to be resurfaced with plant-mixed surfacing.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Flagman (Placer County)	1.15
Flagman (Yolo County)	1.25
Laborer (Placer County)	1.15
Laborer (Yolo County)	1.25
Motor grader operator	2.10
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Operator of power shovel or other excavating equipment, shovel type controls (up to and including 1 cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over 1 cubic yard)	2.25
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Any classification omitted herein not less than	1.15

Overtime — One and one-half (1½) times the above rates.
Sundays and holidays—One and one-half (1½) times the above rates.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvements—Fresno County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on June 25, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Fresno County, between 400 feet south of Fresno City limits and San Benito Avenue at Broadway in Fresno (VI-Fre-4-B,Fre), about one and two-tenths (1.2) miles in length to be graded, paved with Portland cement concrete pavement and plant-mixed surfacing on cement treated base and grade separation structures to be constructed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per Hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Carpenter	1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity and paving type)	1.90
Derrick operator	2.10
Electrician	1.875
Mechanical tamper and finisher operator (concrete or asphalt)	1.95
Motor grader operator	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Painter (brush)	1.75
Painter (spray)	1.80
Pile driver man	1.86
Plumber	1.875
Reinforcing steel worker	1.75
Roller operator	1.95
Structural steel worker	2.00
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Headerboard man	1.50
Jackhammer operator	1.375
Oil distributor bootman	1.275
Oiler, power shovels or cranes	1.50
Truck driver (4 cubic yards, and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—One and one-half (1½) times the above rates.

Sundays and holidays—One and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Copyright 1947 by F. W. Dodge Corporation

PLANS and Speculations

It may be necessary to call a special election to determine the site for contemplated expansion of the Live Oak union high school at Morgan Hill.

oOo

A new city hall, land acquisition for a civic center, street improvements, two branch libraries, extra municipal shops, sewer improvements, a new group of fire houses, and street improvements are among major improvements included in a $10 million program for San Jose.

oOo

A special committee of the city planning commission was chosen recently to study possibility of a new Palo Alto city hall.

oOo

War assets administration announced the high bidder on the recreation building at the Chico army air field was the Salvation Army of Oakland with an offer of $1500.

oOo

A modern manufacturing plant in Bakersfield, built in 1945 at a cost to the government of $362,168 is for sale or lease by the war assets administration. The plant was erected to produce guayule rubber and includes six buildings on 31½ acres of government owned land. Bids will be received up to 10 a. m. on June 30, at the WAA office of real property disposal, 1182 Market Street, San Francisco.

oOo

Appropriations sufficiently large to keep construction on the Pine Flat Dam going through 1947-48 will be the goal of a delegation of Californians who plan to attend senate hearings on allocations June 9 and 10 in Washington, D. C. The group is recommending appropriations totaling $3 million during 1947.

oOo

Governor Earl Warren today vetoed S. B. 309, which would have permitted counties to use State funds for projects which Warren said are of "purely local nature." The measure would have amended the 1946 Construction and Employment Act giving cities and counties $90 million for highways and local projects in which the state has an interest.

oOo

The senate water resources committee approved and sent to the finance committee today, the Crittenden Bill to provide an additional state appropriation of $24,076,000 to defray local costs of public agencies of California participating in federal flood control projects.

oOo

An "airline highway" cutting hours from the driving time between San Francisco and Los Angeles will be proposed to the legislature next week.

oOo

A new drive for enactment of the 1½-cent-a-gallon increase in the State gas tax by the current legislature was begun in the assembly today.

oOo

The first break in the price of foreign produced copper was reported today by trade sources who said the British Ministry of Supply bought several thousand tons at a price equivalent to 23¼ cents a pound at New York, a drop of ½ cent a pound.

#

GIVE STATE BOARDS

The California board of architectural examiners has scheduled a written examination to be given simultaneously at the University of California in Berkeley, and the University of Southern California in Los Angeles, June 16-19. The architectural design examination is of twelve hours, and the title of the problem for that examination is: "A County Departmental Building".

Lumber Ordered for Delta-Mendota Job; Cost Was $62,647

SACRAMENTO. — Lumber for use on the Delta-Mendota Canal of the Central Valley Project in California has been ordered by the bureau of reclamation in a contract amounting to $62,647, Commissioner of Reclamation Michael W. Straus announced today. The contract was awarded to the Niedermeyer - Martin Company, Portland. Shipment of the lumber must begin in 30 days and be completed within four months.

The lumber will be used for permanent bridges, railings and cattle guards on a section of the Delta-Mendota Canal and on Westley Wasteway, which are under construction in the vicinity of Patterson, Calif.

Major construction now in progress on the Central Valley Project is on the canal system. The canals will total more than 400 miles in length, and will carry irrigation water to more than 2,100,000 acres of land requiring a full or supplemental supply.

The longest canal in the system is the Friant-Kern Canal, which will be 156 miles long. It will extend from Friant Dam, near Fresno, to Bakersfield. The Delta-Mendota Canal, extending from the headworks and pumping plant located about nine miels northwest of Tracy and traversing three counties to Mendota Pool, will be 120 miles long.

#

SPEAKS ON COUNTY BUILDINGS TONIGHT

Michael Goodman, a member of the faculty of the University of California school of architecture, will address the educational committee of the San Francisco Architectural Club meeting at Builders' Exchange, on Monday evening, at 7:30 p. m.

GROOVER AND I

HIJACKING OURSELVES

It has been officially stated that the United States, with 6 per cent of the world's population, is carrying 90 per cent of the relief load for the world.

☆ ☆ ☆

In idle curiousity I am wondering just who is carrying the other 10 per cent—perhaps the Man in the Moon.

☆ ☆ ☆

We pay a subsidy for producing more potatoes than we can use—and then further decrease our short petroleum supply by buying kerosene with which to destroy this surplus.

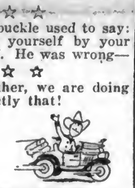
☆ ☆ ☆

We keep prices up by paying support subsidies.

☆ ☆ ☆

We appropriate money running into billions for the purchase of relief supplies to be given to the hungry of the world.

☆ ☆ ☆



A half-dozen uncoordinated agencies, with unlimited money, rush into the market and, regardless of price, compete with each other—further bidding up already inflated prices.

☆ ☆ ☆

My Uncle Arbuckle used to say: "You can't lift yourself by your own bootstraps". He was wrong—

☆ ☆ ☆

Brother, we are doing exactly that!

Home Builders Clamp On Boycott in First Concerted Action to Trim Building Costs

Bay Area builders acted last week to remove a parasitic growth born of shortages—the speculative broker—from the building scene.

The newly-formed Construction Employers' Council registered a sharp protest on price gouging when its members set up a strict boycott against building materials dealers whose charges are substantially above the manufacturer's list price.

This policy — the most positive concerted action to be taken yet by home builders in meeting their many postwar difficulties — was adopted by member builders of San Francisco, San Mateo, Santa Clara, Alameda, Contra Costa, and Marin Counties, despite the fact that it may take longer to build a home until the measure takes effect.

Milton Morris

At its formal organization meeting at the Palace Hotel on Thursday, the Construction Employers' Council asked cooperation of union labor and the established materials dealers, whose price increases have been in line with the general trend.

Dealers were warned that they cannot remain in business long if manufacturers are permitted to deal largely with the high-priced operators who handle virtually any type of building material. Union leaders were told that building trades craftsmen will be jobless if the buyers' strike against increased prices continues.

Members of the CEC further pledged to eliminate overtime work on their jobs to members of building trades that have established a six-hour work day. Included are the plasterers, lathers, bricklayers and hod carriers, who all receive double time after the sixth hour. The prime contractors have urged the sub-contractors to follow suit.

Milton W. Morris, executive secretary of the Council of California Builders, assailed the speculative or "black market" brokers as one unethical group that is boosting the cost of homes farther and farther upward.

"The illegitimate operators, who apparently pyramid profits among themselves by selling through two or three middlemen, want $87.50 per 1000 square feet for sheet rock compared to the wholesale price of $32," he said.

"They demand we pay from $9.11 to $9.35 per key of nails where the price until recently was not nearly $5. And their price is $232 per 1000 square feet of hardwood flooring, compared to the prewar price of $90.

"If we accept each of those gouges, we have, without half trying, added $1000 to the cost of our house and our selling price."

In response, the group voted not to pay more than $50 per 1000 square feet for sheetrock, $6 a keg for nails and $170 for hardwood flooring.

Modernization of local building codes in order that efficiency of materials and methods may be increased is another function of the Construction Employers' Council. All Northern California builders and sub-contractors are eligible for membership in the CEC.

Increase in Sub-Contractor Items in First Quarter of 1947 Reveals Postwar Progress

WASHINGTON.—A routine release from the Department of Commerce on wholesalers' sales, inventories and credits, today told a heartening story concerning the movement of sub-contractor items during the first four months of 1947.

Comparing the first four months of 1947 with corresponding months of 1946, the census bureau said dollar sales were up more than 50 per cent in the following trades:

Paints, full-line electrical merchandise, electrical wiring supplies and construction materials, electrical appliances, plumbing and heating and lumber.

The report states that no trade allied with the construction industry has shown a smaller dollar volume in sales this year than last. Full line electrical goods wholesalers are reporting dollar sales increases in April, 1947, over April, 1946, of more than 100 per cent.

Other trades that reported increases of 40 per cent or more for the same monthly period included paints, electrical wiring and construction, electrical appliances and lumber.

The total electrical group, full-line, wiring supplies and electrical construction materials distributors, appliances and specialties, all showed increased sales for April, 1947, over March, 1947. The three sub-divisions of this group were up to 12 per cent, nine per cent and 14 per cent, respectively.

Trends Irregular

April over March figures for the hardware group followed a similar trend. General hardware was up five per cent, sales of industrial hardware supplies rose four per cent and sales of plumbing and heating supplies rose six per cent, according to the wholesalers' index.

Paint and varnish sales jumped one per cent in the same period, and all metals two per cent.

Trends in inventories since April 30 of last year have been irregular, the census bureau said. Highest increases, equalling 100 per cent or more, have been shown by two trades — full-line electrical goods and lumber. This is figured in dollar volume valued at cost.

The following dollar inventory percentages, comparing April 30, 1947, with April 30, 1946, were given:

Wiring supplies and construction materials up 92 per cent.
Electrical appliances, up 87 per cent.
Plumbing and heating, up 91 per cent.

April, 1947, sales reported by 56 firms in the wholesaling business, totaled $7,268,000. This was 57 per cent more than April of 1946, and seven per cent more than for March, 1947.

All Periods Boom

For the four months of 1947 through April, total sales reported by these concerns was $33,169,000, or 71 per cent more than for the first four months of last year.

Thirty wholesale lumber and building material firms showed "at cost" inventories of $3,411,000 on April 30, 1947. The percentage change, April over April, this year and last, was given as plus 133, while the April increase over Mar., 1947, was seven per cent.

The stock-sales ratio for lumber and building materials for Apr. 1947, was 83; for April, 1946, 57, and for March, 1947, 84.

Except for a five per cent drop reported in April sales over March by retail heating and plumbing equipment dealers, the retail picture also showed an encouraging brilliance in the census figures.

Here is the retail picture for the whole lumber - building - hardware group for April, latest date on which compiled figures are available:

April, 1947 over April, 1946, retail sales up 20 per cent.
First four months, 1947, over first four months, 1946, retail sales up 20 per cent.

Equipment Dealers Hold Last Meeting Until Fall Monday

The Construction Equipment Distributors Association will hold its regular monthly meeting at 6:30 p. m., Monday evening, at the St. Julian Cafe, 140 Battery St.

The session is the last meeting until fall, and the evening will be devoted to general discussion of such subjects as rentals, credits, discounts, factory relations, etc.

Two movies will be presented through Pacific Telephone & Telegrapuh Company. The first, entitled "The Echoes of War and Peace", treats radar and sonar use in underwater telephone communications. The second depicts the difficulties in bringing telephone communications into wild territory of Wyoming.

'MUST IMPRESS NEED FOR URBAN PLANNING'

WASHINGTON. — Future attempts at urban development will lead to a desperate tug-of-war between those who wish to maintain established property rights and those who would sacrifice such rights, wherever necessary, to create more desirable social environment, Kenneth C. Black, member of the board of directors of the American Institute of Architects, said yesterday.

Black called on the nation's architects to help the need for urban planning on the American people.

#

PRESIDENT'S PLAN HEARING ON MONDAY

WASHINGTON. — Hearings on the President's reorganization plan number three, that dealing with amalgamation of all government housing activities under one permanent head, was to be held before the house committee on expenditures in the executive departments Monday, it was announced today.

As was the cast last year, the legislators will try to confine the hearings to one day's session.

#

HEATING CONTRACTORS MEET IN CINCINNATI

CINCINNATI. — New trends in house heating equipment, with particular emphasis on economies in installation, will be discussed at the 59th annual convention of the Heating, Piping and Air Conditioning Contractors National Association here, June 11 to 14. An open forum discussion of the latest developments in panel heating will be one of the features of the convention.

#

CARPENTERS TURN DOWN 15c INCREASE

The carpenters' union, American Federation of Labor, has rejected the 15c hourly increase offered by Associated General Contractors of Northern California. More than 100,000 Northern California carpenters are represented by the union.

There is no immediate danger of a strike. The union has agreed to an extension of the present terms to cover the negotiation period.

Owner Taking Bids—Due June 16
Paving
PLACER COUNTY, Calif. Between Clipper Gap and Colfax.
Owner—County of Placer, John A. Shields, county engineer, Courthouse, Auburn, Calif.
Plans by Engrg. Dept. of Owner.
10.8 miles paving with a coating of plant mix surfacing 2-in. in depth and 18-ft. in width.
Specifications obtainable from the above office.

6/9/47 40
Low and Only Bidders (Unit Prices)
Grading and Surfacing Cost $728,566
SAN LUIS OBISPO COUNTY, Calif. Between San Luis Obispo and Cuesta Grade.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 2.7 miles grading, placing asphalt concrete pavement on crusher run base and placing plant mix surfacing on shoulders and other areas.
Low Bidder—Frederickson & Kasler, 212 13th St., Sacramento, Calif., $728,566.
The work involves:
(1) 141 sta. clearing and grubbing;
(2) 1200 cu. yds. remove concrete;
(3) 229,000 cu. yds. roadway excavation;
(4) 6100 cu. yds. structure excavation;
(5) 500 cu. yds. ditch and channel excavation;
(6) 49,000 tons imported borrow;
(7) 3300 cu. yds. imported top soil;
(8) 930,000 sta. yds. overhaul;
(9) 25,000 sq. yds. compact original ground;
(10) develop water supply and furnish water equipment;
(11) 9200 M gallons apply water;
(12) 141 sta. finish roadway;
(13) 19,500 tons crusher run base;
(14) 165 tons liquid asphalt SC-2 prime coat;
(15) 6250 tons minimum aggregate plant-mixed surfacing;
(16) 350 tons liquid asphalt SC-5 or SC-6 plant-mixed surfacing;
(17) 4500 sq. ft. place plant-mixed surfacing slope drains;
(18) 300 tons screenings seal coat;
(19) 55 tons asphaltic emulsion paint binder and seal coat;
(20) 310 lin. ft. raised bars;
(21) 6700 tons asphalt concrete leveling course;
(22) 6000 tons asphalt concrete, type A, surfacing course;
(23) 2700 cu. yds. class A portland cement concrete structures;
(24) 387,000 lbs. bar reinforcing steel;
(25) 200 lbs. steel angles curb inlets;
(26) 10 each cast steel frames and covers for drop inlets;
(27) 900 cu. yds. sacked concrete riprap;
(28) 375 cu. yds. class A portland cement concrete curbs and gutters;
(29) 70 each monuments;
(30) 8000 lin. ft. metal plate guard railing;
(31) 840 lin. ft. 8-in. CMP, 16-gage;
(32) 1020 lin. ft. 18-in. CMP, 16-gage;
(33) 40 lin. ft. 24-in. CMP, 14-gage;
(34) 40 lin. ft. 30-in. CMP, 14-gage;
(35) 150 lin. ft. 36-in. CMP, 12-gage;
(36) 70 lin. ft. salvage existing pipe culverts;
(37) 70 lin. ft. relay salvaged CMP culverts;
(38) 20 each spillway assemblies;
(39) 16 each pipe anchors;
(40) 35 each access opening markers;
(41) 100 each culvert markers and guide posts;
(42) 5.5 miles new property fence;
(43) 15 each drive gates;
(44) 18 each red reflectors;
(45) 81,000 each mesembryanthemum edge plantings.
City Water Lines
(46) 6930 lin. ft. 10-in. welded steel pipe;
(47) 750 lin. ft. 14-in. welded steel pipe;
(48) 370 lin. ft. 18-in. CMP conduit, 16-gage;
(49) 610 lin. ft. 18-in. CMP conduit, 16-gage;
(50) 500 lin. ft. 1¼-in. galvanized steel pipe;
(51) 300 cu. yds. structural excavation conduits.

"built-in telephone outlets are inexpensive"
A plan that includes built-in telephone facilities is practical for even modest building budgets. Conduit installed during construction adds little to building cost...and enhances future value. Even though only one telephone is needed immediately, others may be added later without tearing up the flooring or bringing wire in along baseboards. Your clients will approve your foresight in planning built-in telephone outlets. You are welcome to call on our Architects' and Builders' Service for any needed help at no cost.

Official Proposals

NOTICE TO CONTRACTORS

Subject to conditions prescribed by the undersigned, sealed bids are invited for the construction of approximately 1,950 feet of underground electric ducts and manholes in the vicinity of Agricultural Hall on the Berkeley campus of the University of California. Bids will be received until 2:00 P. M., June 19, 1947. Plans, specifications and information will be available at the cashier's office, 103 Administration Building, University of California, Berkeley, California. A deposit of ten ($10.00) dollars is required for each set of plans and specifications isued. Right to reject any and all bids is reserved.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA
(May 28, 29, June 2, 3, 4, 5, 6, 9, 10, 11, 1947)

LS-384—Erection of Steel Tanks

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the East Bay Municipal Utility District, 512 Sixteenth Street, Oakland, California, until 5:30 P.M., **Wednesday, June 18, 1947,** and will at that hour be opened and read, for the erection of one bolted steel tank having a capacity of 100,000 gallons and two bolted steel tanks having capacities of 200,000 gallons each. Erection sites are all in Contra Costa County.

The general prevailing rate of per diem wages in the locality in which the work is to be performed, for laborers and each craft or type of workman and mechanic needed to execute the contract, and the general prevailing rate for legal holiday and overtime work specifically set forth in the plans and specifications on file with the Secretary of the District, are referred to and incorporated herein.

Specifications No. LS 384 covering this work may be obtained upon application at Room 406 of the office of the District.

DANIEL READ,
Secretary.

Construction of Boiler House, Heating Plant and Distribution System at the Nevada State Hospital for Mental Diseases, near Reno.

NOTICE TO CONTRACTORS

(1) Sealed proposals will be received at the office of the Nevada State Planning Board, Carson City, Nevada, until 11:00 A. M. on the **8th day of July, 1947,** for the construction of a Boiler House, Heating Plant and Distribution System at the Nevada State Hospital for Mental Diseases, near Reno, Washoe County, Nevada. Such sealed proposals as are received will be publicly opened and read in the Chairman's office, State Highway Building, Carson City, Nevada, at the above hour and date.

(2) Proposals are invited separately on the following portions of the work:

Proposition I: Boiler House and General Construction work.

Proposition II: Heating Plant and Distribution System.

(3) Prevailing wage rates for the Reno area shall be paid for all classifications of labor as required by the laws of the State of Nevada.

(4) Plans and Specifications may be examinted at the offices of the Nevada State Planning Board, Carson City, Nevada; the Associated General Contractors, Golden Hotel, Reno, Nevada; the Associated General Contractors, 416 Sharon Building, San Francisco, California; and may be examined and obtained by bonfide bidders on prime contract work at the offices of Blanchard, Maher & Lockard, Architects and Engineers, 232 West First Street, Reno, Nevada. A deposit of $25.00 will be required for the first set of plans and specifications issued to a bonfide bidder and a deposit of $20.00 for each additional set of plans and specifications issued to such bidder. Upon the return of the plans and specifications, in good condition, to the office of the Architects and Engineers, the deposit on the first set will be returned to the bidder and $10.00 for each additional set will be returned to the bidder.

(5) Contractors desiring to bid on this work shall be contractors licensed under the Nevada State Contractor's Law, and shall file with the State Planning Board at Carson City, Nevada, a complete statement of experience and financial condition not later than five (5) days prior to the date of bid opening. Requests for plans may not be made later than two (2) days prior to the date of bid opening.

(6) The right is reserved to reject any or all proposals or to accept the proposal or combination of proposals which is deemed by the State Planning Board to be in the best interests of the State of Nevada.

PLANS and Speculations

The Morton Air Academy, near Blythe, Riverside County, including an adjoining housing project, will be converted into an educational establishment to relieve overcrowded conditions in the Blythe school area.

oOo

Approximately sixteen structures classified as surplus war housing will be offered for off-site removal at the Gila River Relocation Center, Rivera, Ariz., beginning Thursday, June 12, by the bureau of land management, which acts as a disposal agency for the war assets administration.

oOo

Merced may hold a special election to vote on a bond issue calling for construction of an underpass at both the Santa Fe and Southern Pacific crossings, retention of parking meters, and switching to a city manager form of municipal government.

oOo

Rec bureau officials say they expect to be able to release Millerton Lake water into the first 71 miles of the 156-mile Friant-Kern Canal by spring of 1949.

oOo

Work has started on the long-awaited $972,000 electrification plan for the Trinity River valley. Nearly 500 homes in northeast Humboldt County are to be served.

oOo

Richard A. McGee, state director of corrections, has recommended that the state select a 730-acre site two miles south of Vacaville, for construction of a $7 million prison medical institution.

oOo

Shasta Dam of the Central Valley Project was the federal reclamation bureau's third largest power revenue producer last year with a yield of $3,753,223 from the sale of 1,500,000,000 kilowatt hours.

oOo

Kern County supervisors yesterday adopted a resolution requesting a $1 million federal appropriation to begin work on the proposed Isabella Dam.

oOo

Paving of the entire length of Buena Vista Drive and Quinine Avenue was voiced at the Pinole city council meeting this week.

oOo

The assembly has passed a bill directing the state finance directors to sell the site and buildings of the Fresno State College and buy a new location.

oOo

An agreement calling for one pay boost now and another in October for 250 electricians in Fresno, Madera, Kings and Tulare Counties was announced yesterday. The men will receive $2.20 an hour as of April 1, 1447, and $2.25 after October 1, 1947.

oOo

Northern California projects included in a $127,800,000 public works program submitted to congress by the navy were: Alameda Air Station, test cells for turbine engines; Ammunition Depot, Mare Island, vacuum system housing; Postgraduate School, Monterey; Radio Station, Skaggs Island, Sonoma, addition to operations building; Supply Annex, Stockton, acquire three acres.

AIA TO MEET FRIDAY ON BERKELEY CAMPUS

The Northern California chapter of American Institute of Architects will meet Friday, June 13, at 5:45 p. m., in the Faculty Club on University of California campus.

Following a dinner, the AIA will hold its annual meeting with students of the "Ark", and their exhibit will be shown.

Presentation of the American Institute of Architects medal and other awards will be made.

Australian Company Producing Mortarless Brick; Saves Labor

WASHINGTON.—New technical developments in the building materials field are being announced almost daily, but one of the latest, with a more practical turn, is a "mortarless brick" which originated with an Australian manufacturer.

Credence is lent to the announcement by a review of the new product by the Department of Labor.

Manufacturer of this odd product is Hunter Interlocking Brick Company.

Known by the trade name "Hibco Block", the unit measures 12 by 6 by 6 inches.

According to the Labor Department description, the block is designed with a large lug on the underside, a small one on the upper side, and lug holes at each end.

A structure of these bricks is made by putting lugs into the lug holes, and obvious procedure which simplifies construction by this method. The lugs are said to deviate slightly from the perpendicular so that when a section of a wall is completed, none but the last brick can be removed. This makes it possible to dismantle an entire structure without damaging a single brick.

(This is not unlike the principle involved in block toys.)

The inventor specifies sand and cement or mining slag for making the bricks, but it is suggested that if this form can be handled economically by clay plants, it would make a far more perfect wall from clay material.

Labor says that with this type brick, 20-foot unsupported suspensions are possible.

One of the most important factors resulting from any widespread adoption of this building principle, would be that of time-saving and labor-saving. It is claimed that in an eight-hour day an unskilled laborer can lay 14,400 of these bricks giving 800 square yards of wall. The ordinary rate is about 600 conventional bricks, making 15 square yards. It also is said that if a home owner does his own work (as well he could with such a simple process), he could reduce his brick construction costs up to 50 per cent by using these blocks.

Besides home construction, the bricks are said to be suitable for such purposes as lining tunnels, irrigation channels, building farm silos, and a host of other uses.

#

BUILDERS' EXCHANGE GIVES ITS UNQUALIFIED ENDORSEMENT TO 2117

The California State Builders' Exchange recently gave unqualified endorsement to A. B. 2117 which would permit private architects to be commissioned to do state work.

She Exchange represents state organizations of master painters, plumbers, electrical contractors and sheetmetal contractors, the California Council of Architects, several chapters of the Associated General Contractors, and others.

In an official resolution, it was stated that the recruitment program now being carried on by representatives of the state personnel board and the Department of Public Works " . . . is deemed to be not in the best interests of this state and opposed to recognized practices in the construction industry.

Ernest Born, San Francisco architect, denounced the contemplated expansion of personnel in the state division of architecture as "quite inconsistent with the development of basic democratic principle of having private citizens of the country do the principal services for it", in a letter to Senator Gerald J. O'Gara recently.

AGC Joins In Move To Force Materials Prices, Costs Down

Giving new impetus to the drive to check the inflation in home and general building costs, the Northern and Central California chapters, Associated General Contractors, Monday announced a program to stop price gouging of vital materials and to maintain labor costs on an even keel.

"Our hundreds of members," declared T. Y. Johnston, spokesman for the contractors in the forty northern California counties, have undertaken an analysis of prices of lumber, steel, nails, cement and every other material used in construction. It is our aim to keep the ultimate costs of homes, office buildings, bridges, freeways and industrial plants at reasonable figures.

"Simultaneously, we have insisted that wage increases, where required, shall be kept in line with the national pattern of 15 cents an hour for the members of the building trades crafts.

"Over the past several days we have signed contracts with the cement finishers, laborers, operating engineers and teamsters for a $1.20 per day increase. We feel that this amount will impose heavy and unfair penalties on the home buyer, business and industry, since they ultimately pay the bill. The carpenters of a like offer of $1.20 declined to arbitrate the issue. We hope this problem will be solved in the next few days so that the state of California can proceed on the most active building program in its history."

Winfield H. Arata, executive-secretary of the Northern California chapter, disclosed Monday that since the carpenters' union has refused arbitration, and the 30-day period of grace for negotiation has expired, the old agreement "is out".

Whether or not there would be a strike by the carpenters was not known late Monday.

#

ATTEMPT TO FORCE VA TO ACCEPT WAR HOSPITAL FORESEEN

WASHINGTON.—Storm clouds may be approaching over the forthcoming attempt to force the Veterans Administration to accept for its own use the Schick surplus Army hospital at Clinton, Iowa.

A congressional committee has been investigating the Clinton installation which was war-born. Its imminent report is said to recommend that VA take over the Schick buildings as expansion of its own crowded facilities around the country.

VA doesn't want to do this.

First, the agency fears such action would create a precedent, requiring similar actions in the future.

Second, and perhaps more important, VA believes the army hospitals are not designed suitably for its own operations. Architecturally, VA says, they are not readily adaptable to purposes which VA medical treatment must serve.

#

$942 MILLION RECORD

WASHINGTON.—New construction put in place in May 1947 totaled $942 million, a gain of 11.1 per cent over April, the construction division, Department of Commerce, announced today.

The May figure represented slightly less than a normal seasonal rise from April but was a gain of 15.4 per cent over May 1946.

Oregon Congressman Urges Central Power Administration for Columbia and Tributaries

WASHINGTON.—Representative Angell of Oregon this week placed himself on record as favoring amended legislation that would exclude the entire Columbia river basin from War Department control of power generated at dams constructed by the army engineers.

At the same time, he urged the creation of one central administration to have complete control of the distribution of power from present and future dams on the Columbia River and its tributaries.

In his statement before the house public lands committee, the western congressman said the bill requiring that the War Department sell the power at the dam would lead to monopoly.

'Is Monopolistic'

Rep. Angell said:

"The past and present policy of the federal government is o dispose of power in such a manner as to encourage its widespread use and to prevent its monopoly.

"The sale of power at the bus bar (a power installation at the dam) is utterly inconsistent with the policy determined by congress.

"Limited use and monopoly are inherent in bus bar sales. Only the largest privately-owned utilities and industrial customers can afford to make the heavy investment in transmission lines and facilities which will permit them to connect their systems and plants with the dams."

He told the committeemen that bus bar sales rates should be lower than those needed if transmission lines are constructed, but bus bar sales, he claimed, would soon eliminate all purchasers but a few major privately owned utilities and industrial consumers.

Fights Interest Clause

"The government would have no opportunity to get power elsewhere," Angell said. "And the few monopolists who wee able to take delivery of the power at bus bar would dictate the price they would pay for power. It would be a grevious mistake, from the standpoint of management, as well as economy, for the federal government to market power from these projects or attempt to do so through an independent system while, at the same time, it owned and maintained the Bonneville network of transmission facilities covering the entire area that would be served by these new projects.

At the same time, Representative Lemke (ind.) said he would press his fight against legislation that would require interest payments to the Treasury on money appropriated for reclamation projects including dams.

The congressman's statement was prompted by a public lands subcommittee vote on the Rockwell bill which would make the interest payments mandatory. At present, an interest charge levied against the power appropriations is used to help repay costs or irrigation features of projects.

Lemke was to offer substitute legislation for the Rockwell bill and said he was ready to carry his fight to the full committee if necessary.

Exempts Flood Features

The Indian congressman's alternative plan would provide for interest charges to be diverted for repayment purposes as it is now the case, unless congress should order otherwise within sixty days after a project proposal is submitted to it. The substitute Lemke-Ecomine proposal also would relieve reclamation project water users from repaying money spent for recreational, flood control and wildlife conservation features of a project.

'HOUSING KEPT ALIVE FOR ELECTION ISSUE'

INDIANAPOLIS.—The administration's legislative tactics are pounding away desperately to keep housing and rent control an emergency issue in the coming presidential elections, Calvin K. Snyder, secretary of the realtors' Washington committee of the National Association of Real Estate Boards, told the Indianapolis Real Estate Board at a luncheon meeting today.

June Is Spending Deadline for All Government Agencies

WASHINGTON. — This is the "season" when the various government agenies and departments are hustling to obligate any funds they might have remaining in their respective budgets. The idea is to close the fiscal year (June 30) without any balance of money appropriated from congress for the fiscal year just closing.

Much of this late expenditure is going for a variety of construction projects. Army and navy are the heaviest spends in this category with the wind up disbursements of each expected to go well into the millions in their various construction activities.

At this time of year—fiscal year—it is not unusual for either of the military branches to announce contract awards running into the hundreds of thousands of dollars individually.

Other agencies are active, but not on such a grand scale. Federal works, for instance, winds up the fiscal year with virtually all of its appropriated funds allocated or spent.

#

'AFL CALLING FORTH UNDUE PRESSURE ON LABOR LEGISLATION'

WASHINGTON. — Senator Wm. F. Knowland of California, this week made public a letter he said was written by American Federation of Labor officials of California in an effort to influence him to sustain a Presidential veto of the labor bill.

Read to the senate, the letter urged union members to "forward to Senator Knowland a sufficient number of telegrams, letters and telephone calls" to gain his vote against the bill.

President Truman, in a press conference earlier this week, would give no indication of his action, determined or otherwise, on the labor legislation. "I must get the bill and analyze it first," he said. "Then I will act as soon as I can." This would indicate he will not let it become law by his ignoring it.

#

FHA INSURANCE OKAYED FOR SANTA MONICA JOB

LOS ANGELES.—Approval of a 10-unit rental housing project in Santa Monica was announced today by District Director John E. McGovern of the Los Angeles office of the federal housing administration.

The Len Building and Realty Company will build the project in Santa Monica, south of Pico, and east of Lincoln Blvd. It will be financed by Banker's Life Company, Beverly Hills, with a mortgage of $64,800 to be insured by FHA under Title VI of the National Housing Act. All ten units will be 4½ rooms.

#

EAST BAY ARCHITECTS MEET NEXT WEDNESDAY

The East Bay Architects will hold their last dinner meeting before fall on Wednesday, at 6:30 p.m., at the Roma Restaurant, 5036 Telegraph Avenue, in Oakland.

The evening will be spent informally. There will be one guest speaker, Edwin M. Wetmore, safety engineer, formerly with the Key System, who will deliver a humorous lecture.

INSTANTANEOUSLY DRIVES STUDS 3 INCHES INTO CONCRETE

DRIVES ✓
...with a 50,000-lb. wallop. Anchor studs 3 inches into concrete...NO SLOW DRILLING!...NO expansion shield required! More HOLDING POWER...studs driven into ordinary concrete by "DRIVE-IT" withstand direct pull up to 4000 lbs.

PUNCHES ✓
...a neat hole ¼-in. to ½-in. in diameter through steel plate up to ¾-in. in thickness.

RIVETS ✓
...steel plates.

STUDS, PUNCHES AND RIVETS Used With "DRIVE-IT"

STRIKES 25-TON BLOW— BUT ABSOLUTELY SAFE

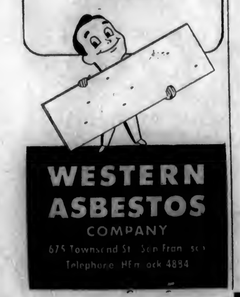
The "DRIVE-IT" POWDER-POWER TOOL, which cannot be used as a gun, derives its force from a small powder charge encased in a standard cartridge which drives a stud, rivet or punch with a 20-ton blow through ⅜-in. steel plate or penetrates concrete as much as 3 inches.

"DRIVE-IT" is a light hand tool weighing only 7 pounds ...ABSOLUTELY SAFE! Unless pushed forcibly against work the "DRIVE-IT" will not function. There is absolutely NO RECOIL SHOCK.

APPLICATION UNLIMITED!

"DRIVE-IT" affords a swift, modern method for anchoring to steel or concrete and brick masonry.

A stud, either threaded or plain, driven into average concrete by this Powder-Power Tool withstands a direct pull in excess of 3000 pounds. When driven into steel, withstands a direct pull exceeding 12,000 pounds.



Typical "DRIVE-IT" Application in one of Portland's leading Banks. Threaded studs driven into concrete wall.

Used by... ELECTRICAL CONTRACTORS ...for anchoring switch boxes, outlets, conduits, etc.
PLUMBING CONTRACTORS ...for hanging pipes, brackets, punching holes in steel hangars, straps, etc.
SHEET METAL CONTRACTORS ...for hanging vent and circulating pipes to concrete ceilings.
GENERAL CONTRACTORS ...for anchoring wood sleepers to concrete floors or walls, for fastening steel windows and door frames to concrete.
AND HUNDREDS OF OTHER APPLICATIONS: ...bolting machinery to floors, hanging signs, anchoring stop buttons, tacking steel plates, marine repair, etc.

This handbook of residential wiring design for single family dwellings has been prepared especially for the use of architects, engineers, builders, electrical contractors and lending institutions.

It is not a handbook on how to *install* wiring . . . it is one on how to *plan* wiring It sets forth . . . room by room . . . outlet and circuit requirements for an efficient, convenient and useful home wiring system . . . a system which will help avoid electrical obsolescence.

If you have not received your copy of this free handbook . . . or if you wish additional copies . . . contact your local utility office or this Bureau.

Construction and Installation of Laboratory Furniture

"ADVERTISEMENT FOR BIDS

"Subject to the conditions prescribed by the undersigned, sealed bids are invited for the construction and installation of Laboratory Furniture for the Chemistry Laboratory Wing Addition on the Berkeley Campus, University of California. This project has been granted C.P.A. authorization under VPH-1. Plans and specifications will be issued to intending bidders upon the deposit of twenty-five ($25) dollars per set. No bids will be received after 2:00 P.M. July 15, 1947. Plans, specifications and information will be available starting June 10, 1947, at the Cashier's Office, 103 Administration Building, University of California, Berkeley, California. The right to reject any and all bids is reserved.

"THE REGENTS OF THE UNIVERSITY OF CALIFORNIA."

(Daily Pacific Builder)
(June 10-11-12-13-16-17-18-19-20-23, 1947.)

FIRST PUBLISHED TODAY

Construction of Ward Bldg at Nevada State Hospital for Mental Diseases, near Reno

NOTICE TO CONTRACTORS

Sealed proposals will be received by the State Planning Board State of Nevada at their offices, in care of the Chairman, Carson City, Nevada, until 2:00 o'clock P. M. on the 8th day of July, 1947, for the construction of Ward Building, at Nevada State Hospital for Mental Diseases near Reno, Washoe County, Nevada. Such sealed proposals as are received will be publicly opened and read in the Chairman's office in the State Highway Building, Carson City, Nevada at the above hour and date.

Prevailing wage rates for the Reno area shall be paid for all classifications of labor.

Plans and specifications may be examined at the office of the State Planning Board, Carson City, Nevada, the Associated General Contractors of America, 216 Pine Street, San Francisco, California, the Associated General Contractors, Golden Hotel, Reno Nevada, and the office of Edward S Parsons, Architect, 210 West Second Street, Reno, Nevada. Plans, specifications and proposal forms may be secured by qualified bidders at the office of Edward S. Parsons, 210 West Second Street, Reno, Nevada.

Bidders will be required to deposit $25.00 for the first set of drawings and specifications, which amount will be refunded upon return of the drawings and specifications in good condition to the Architect not later than fifteen days after award of contract.

Additional copies may be had at the rate of $15.00 per set, with a refund of $5.00 upon the return of the same in good condition not later than fifteen days after award of contract.

Checks in payment of plan drawings and specifications shall be made payable to the Architect.

Bids will be taken as follows:

(1) lump sum, one bar screen, shredder, detritor and Parshall flume structure constructed complete with all mechanisms, accessories and appurtenances;
(2) lump sum, one primary and secondary clarifier structure constructed complete with all mechanisms, pumps, weirs, railings, accessories and appurtenances;
(3) lump sum, one filtration unit constructed complete with mechanism, underdrain system, filter media, accessories and appurtenances;
(3) lump sum, one digester structure constructed complete with floating cover, roofing, supernatant selector gauge, sight glass and sampler, valve pit, accessories and appurtenances;
(5) lump sum, one control building constructed complete including all materials, equipment, accessories and appurtenances;
(6) lump sum, furnish and install complete all electric power, light and control circuits, switch board, motor starting equipment, lighting equipment, switches, receptacles and other accessories and appurtenances required to complete the electrical work;
(7) lump sum for one lot of plant piping located in and around structures and plant site constructed complete including all piping, valves, fittings, accessories and appurtenances required to complete the pipe work except for 15 lin. ft. 18 in. and 24 in. vitrified clay pipe sewer, standard manholes and reinf. concrete sludge header;
(8) 50 lin. ft. 15 in. vitrified clay pipe sewer complete;
(9) 485 lin. ft. 18 in. do;
(10) 333 lin. ft. 24 in. do;
(11) 6 standard manholes with frames, covers, dust pans and rungs constructed in sewers complete;
(12) lump sum, reinf. concrete header construcfed complete on sludge lines of existing Imhoff tank;
(13) lump sum, one lot plant painting;
(14) lump sum, one lot plant grading, including the removing, stock piling, and placing of top soil, cleaning and filling old sludge bed, grading of new sludge beds, driveway, walks, and grading of plant area to the finished grades;
(15) lump sum, paving of driveways and walks, including furnishing and placing of surfacing and header boards.

Specifications obtainable from office of the city clerk or from the office of the consulting engineer upon deposit of $25 refundable.

33— BRIDGES

6/10/47 33
Contract Awarded
Overhead and Undercrossings and Grading **Cost $377,209.60**
SAN BERNARDINO COUNTY, Calif. Between Tiwanda Ave. and Mulberry Ave.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 0.9 mile grading and paving with portland cement concrete, constructing a reinforced concrete overhead crossing at Kaiser Spur and a steel beam span undercrossing at Kaiser Road.
Bids opened in the State Bldg., Los Angeles, Calif.
Contractor—George Herz, Box 191, San Bernardino, Calif.

6/10/47 33
Contract Awarded **Cost $194,700**
Bridge
TULARE COUNTY, Calif. Across Kings River, approximately 5.5 miles west of Dinuba.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Reinforced concrete girder bridge.
Contractor—Carl N. Swenson Company, Inc., Box 556, San Jose, Cal.

6/10/47 33
Contract Awarded **Cost $3,966.53**
Bridge (Repair)
CALAVERAS and AMADOR COUNTIES, Calif. At Mokelumne River bridge, about four miles south of Jackson.
Owner—State of California, Division of Highways, Paul O. Harding, district engineer, 1200 N. Center St., Stockton 9, Calif.
Plans by engineering department of owner.
Repair existing bridge.
Four steel girders will be furnished free of cost to contractor.
Contractor—Charles Scott, 936 La Follette, Stockton, Calif.

6/10/47 33
Bids Rejected
Clearwater Memorial Bridge
LEWISTON, Idaho. Nez Perce Co. Across the Clearwater River.
Owner—Idaho State Highway Department, James Reid, state highway director, Boise, Idaho.
Plans by engineering department of owner.
1352.2 ft. long steel and concrete.
As previously reported, Paul Jarco Co., Inc., 1070 W. Ewing St., Seattle, Wash., at $955,167 submitted the low bid

6/10/47 33
Contract Awarded
Bridge **Cost $7,996.70**
MARIN COUNTY, Calif. Across Lagunitas Creek in Samuel P. Taylor State Park.
Owner—State of California, Division of Highways, F. W. Panhorst, Bridge Engr., Room 338, Public Works Bldg., Sacramento, Calif.
Plans by Engrg. Dept. of Owner.
Structural steel and timber bridge.
Contractor—C. M. Allen, Box 463, Fairfield, Calif.

34— DAMS, RESERVOIRS & DREDGING

6/10/47 34
Contemplated—Included in Bond Election in Amount of $739,000 Set for July 22
Reservoir **Cost $64,000**
HAYWARD, Calif., Alameda County. Southeast Hayward.
Owner — City of Hayward, C. W. White, City Attorney, City Hall, Hayward, Calif.
City Engr.—John Mancini, City Hall, Hayward, Calif.
1,000,000-gal. tank and other facilities.

6/10/47 34
Low Bidders
Earthwork and Structures—Spec. No. 1811) **Cost $349,416**
ALTUS PROJECT, Okla. Situated in the vicinity of Altus, Okla.
Owner—Dept. of Interior, Bureau of Reclamation, Walker R. Young (Chief Engineer.), U. S. Customs House, Denver, Colo.
Construction of earthwork and structures, Ozark laterals, 1.5 to 3.5, and Altus laterals 13.2 to 21.0 and sublaterals.
Low Bidder — Stigler Construction Co., and Jack Durrett, Sigler, Okla., $349,416.
Other low bids June 2 were Stamcy Constr. Co., Hutchinson, Kansas, $373,690.
James & Phelps Construction Co., Oklahoma City, Okla., $408,946.

6/10/47 34
Contract Awarded
Combe-Ophir Canal **Cost $132,997.50**
NEVADA COUNTY, Calif. About five miles north of Auburn.
Owner—Nevada Irrigation District, Thomas Mulcahy, president; Elizabeth P. Frey, secretary, Grass Valley, Calif.
Engineer—Blackie & Wood, 544 Market Street, San Francisco, Calif.
Complete by December 15, 1947.
Contractor — H. Earl Parker, 12th and F Sts., Marysville, Calif.

6/10/47 34
Contract Awarded
D-S Canal Extension Siphons **Cost $18,812**
NEVADA COUNTY, Calif. About 3 miles east of Grass Valley.
Owner—Nevada Irrigation District, Thomas Mulcahy, president; Elizabeth P. Frey, secretary, Grass Valley, Calif.
Engineer—Blackie & Wood, 514 Market Street, San Francisco, Calif.
Includes two 48-in. steel siphons with total length of 1195 feet, together with concrete inlet and outlet structures, concrete piers at creek crossing and all appurtenances.
Contractor—Pacific Pipeline & Engineers, Ltd., 2128 San Pablo Ave., El Cerrito, Calif.

6/10/47 34
Contract Awarded
D-S Canal Extension Structures **Cost $21,968.75**
NEVADA CO., Calif., About 3 miles east of Grass Valley.
Owner—Nevada Irrigation District, Thomas Mulcahy, president, Elizabeth P. Frey, secretary, Grass Valley, Calif.
Engineers — Blackie & Wood, 514 Market St., San Francisco, Calif.
Contractor—D. M. Piburn, 201 Athol Ave. ,Oakland, Calif.

6/10/47 34
Owner Expects To Ask Bids This Month
North Unit Main Canal
DESCHUTES PROJECT, Ore. North Central Oregon near Madras.
Owner—U. S. Bureau of Reclamation, Denver, Colo.
Plans by engrg. dept. of owner.
Earthwork and structures for North Unit Main Canal, Sta. 3010 plus 50 (Willow Creek siphon) to sta. 3562 plus 30; 230 days completion time.
Work includes 196,000 cu. yds. canal excav., 12,000 cu. yds. excav for structures, 150,000 lbs. furnish and place reinf. steel, 25,500 lbs. install gates and misc. metal work, 1,600 cu. yds. concrete.

6/10/47 34
Owner Expects to Ask Bids About June 16
Boysen Dam
MISSOURI BASIN PROJECT, Wyo. North Central Wyoming, 15 miles south of Thermopolis.
Owner—U. S. Bureau of Reclamation, Denver, Colo.
Plans by engrg. dept., of owner.
Earthfill dam, concrete powerplant and appurtenant works, relocation of C. B. & Q. railroad; 1400 days completion time.
Work involves:
Dam and Appurtenant Works
(1) 1,150,000 c.y. excavation, borrow;
(2) 1,000,000 c.y. excavation, structures;
(3) 1,500,000 c.y. embankment;
(4) 50,000 c.y. concrete;
(5) 4,700,000 lbs. reinf. steel;
Railroad Relocation
(6) 2,000,000 c.y. excavation, roadway;
(7) 40,000 c.y. excavation, structures;
(8) 140,000 c.y. excavation, tunnel;
(9) 50,000 c.y. concrete, tunnel;
(10) 13 miles, railroad track.

6/10/47 34
Contract Awarded
Cherry Creek Outlet Works **Cost $1,748,037**
ARAPAHO COUNTY, Colo., About 6 miles southeast of Denver and ½ mile upstream from the existing Kentwood Dam on Cherry Creek.
Owner—U. S. Government, District Engineer's Office, Col. Craig Smyser, district engineer, 200 Railway Exchange Bldg., 909 17th St., Denver, Colo.
Private plans.
Includes concrete intake structure, a cut and cover concrete conduit and concrete stilling basin; 400 days for completion.
Contractor—Johnson Construction Co., 608 Foshay Tower, Minneapolis, Minn.

36— PARKS, AIRPORTS & PLAYGROUNDS

6/10/47 36
Owner Taking Bids—Due June 17, 2 P. M. (Unit Quantities)
Paving and Floodlighting System
SAN FRANCISCO, Calif., North Beach Playground, between Mason and Powell Sts., and Lombard and Greenwich Sts.
Owner — Recreation Commission of the City and County of San Francisco, Josephine D. Randall, superintendent, 370 City Hall, San Francisco, Calif.
Plans by owner.
Work involves:
(1) 1475 lin. ft. paving;
(2) 57,051 lin. ft. spray asphaltic emulsion and lay asphalt cover-ing, soft bail field;
(3) 2414 lin. ft. paint court lines;
(4) 28,516 sq. ft. repair surface, court areas and apparatus area and apparatus area walk;
(5) lump sum, misc. items, react 2 catchbasins, cover one vent, 2 volleyball, sockets.

Specifications obtainable from the above office upon deposit of $5 refundable.

37— RAILROADS, SUBWAYS & TUNNELS

6/10/47 37
Owner Expects To Ask Bids This Month
Tunnel
ROCKTEE FALLS, Ore. 50 miles east of Roseburg.
Owner—California - Oregon Power Co., John C. Boyle, General Mgr., 216 South Main St., Medford, Ore.
Plans by Public Engrg. Service Corp., 231 LaSalle St., Chicago, Illinois.
5000-ft. reinforced concrete tunnel of 12-ft. diameter with concrete lining as first unit of a $4,000,000 3-unit power development program on the North Umpqua River in Eastern Douglas County.
The work will further involve the construction of a diversion dam with the main earthfill section having a 250-ft. crest and 45-ft high. Construction will be of sand and gravel with a steel pipe cutoff, and some reinforced concrete. A short concrete gravity dam and concrete overflow spillway section with concrete lined channel leading to the river below the dam to flank the main section on one bank will be constructed.
The power house and substation will have a concrete foundation with steel frame and brick superstructure, and will house two vertical generating units, electric control and switching equipment; capacity 40,000 kv. An electric bay two stories high will house switchboard, switching gear and control equipment. Construction work on the dam and the power house will be undertaken simultaneously.
The transmission line will be located on the north side of the North Umpqua River and will be about 47 miles in length, extending from the power plant to the existing 125 kv substation at Dixonville, near Roseburg; H-frame type with wood poles, 125,000 kv. with 250,000 CM conductor.

39—SEWERS

6/10/47 39
Hearing of Protests Set for June 26, 9 A. M.
Sewers; Res. 176-D
FRESNO, Calif., Fresno Co. Blackstone Ave. tract No. 1 and Princeton Heights.
Owner—City of Fresno, D. E. Roughton, City Clerk, City Hall, Fresno, Calif.
City Engr.—A. Segal, City Hall, Fresno, Calif.
Sanitary Sewers.

40— STREETS AND HIGHWAYS

6/10/47 40
Plans in Progress
Street Improvement **Cost $108,000**
FAIRFIELD, Calif., Solano Co.
Owner—City of Fairfield, Mayor W. W. Woodard, City Hall Fairfield, Calif.
Engineers—Solano Engineers Associated, 1806 Capitol St., Vallejo, Cal.

6/10/47 40
Low and Only Bidders
Sidewalks, Curbs and Gutters
ALAMEDA, Calif., Alameda County.
Owner — City of Alameda, J. P. Clark, City Clerk, City Hall, Alameda, Calif.
Plans by owner.
Repair and/or construct portland cement concrete sidewalk, curbs and gutters for fiscal year July 1, 1947 to June 30, 1948.
Bids were submitted June 3 as follows:
M. O'Keefe, Alameda, (1) $0.25; (2) $0.35; (3) $0.40; (4) $1.50; (5) $0.40;
F. Ferrero, Alameda (1) $0.32; (2) $0.40; (3) $0.50; (4) $1.50; (5) $0.50.

6/10/47 40
Hearing of Protests Set for June 20, 8 P. M.
Street Improvement; Res. 2621
SACRAMENTO, Calif., Sacramento Co. Broadway from westerly boundary of Elmhurst to westerly boundary of 51st St.
Owner—City of Sacramento, H. G. Denton, City Clerk, City Hall, Sacramento, Calif.
City Engr. — Fred Klaus, City Hall, Sacramento, Calif.
Includes grading, pipe sewer, asphaltic concrete pavement 5½ in. thick.

6/10/47 40
Low and Only Bidders
Grading, Bridges, Etc.
STATE OF WASHINGTON.
Owner—State of Washington, Clarence B. Shain, director of highways, Olympia, Wash.
Plans by engineering department of owner.
Projects include:
(1) Constructing light bituminous surface treatment, modified bituminous macadam and non-skid single seal treatment on 26.66 miles of PSH No. 12 (5 sections) in Wahkiakum and Pacific Counties and 1.05 miles of SSH No. 12-B in Pacific County. D & H Paving Co., Vancouver $102,-746.50.
(2) Grading, draining, surfacing and constructing a bituminous surface treatment "road mix" type Class B on 4.45 miles of SSH No. 10-A, Armstrong Meadows to Disaulet, Section 2 in Okanogan County, FAS No. S-41 (4).
Low Bidder—M E. Nelson Construction Co., Ephrata, $148,493.09.

6/10/47 40
Hearing Set for June 27, 10:30 A. M.
Street Improvement; Spec. 26,019
SAN FRANCISCO, Calif. portions of 43rd and 44th Aves. betw. Wawona St. and Sloat Blvd.
Owner — City and County of San Francisco, Dept. of Public Works, Rm. 282, City Hall, San Francisco, Calif.
City Engineer—Ralph Wadsworth, City Hall, San Francisco, Calif.
Includes asphaltic concrete on rock sub - base pavement, unarmored concrete curb, 8 in. V.C.P. side sewer and water services.

6/10/47 40
Surfacing **Cost $48,424**
SISKIYOU COUNTY, Calif. Between Fort Jones and 2.2 miles east of Moffett Creek.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 7.5 miles repairing with plant mix surfacing and constructing shoulders of imported borrow on portions of the project.
Contractor—Sheldon Oil Co., Main St., Suisun, Calif.

6/10/47 40
Owner Taking Bids—Due June 17, 9 A. M.
Highway and Bridge Improvements

Official Proposals

NOTICE TO CONTRACTORS

Subject to conditions prescribed by the undersigned, sealed bids are invited for the construction of approximately 1,950 feet of underground electric ducts and manholes in the vicinity of Agricultural Hall on the Berkeley campus of the University of California. Bids will be received until 2:00 P. M., June 10, 1947. Plans, specifications and information will be available at the cashier's office, 103 Administration Building, University of California, Berkeley, California. A deposit of ten ($10.00) dollars is required for each set of plans and specifications issued. Right to reject any and all bids is reserved.

Signed:
THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

UNIONMELT WELDING MACHINES AND PARTS
• • Including Industrial Vacuum Cleaners
For Sale June 13 at Administration Bldg., Richmond Shipyard No. 2 $252,000 Stock of Used Equipment

The phenomenal "ft. per man" averages made by Unionmelt machines in wartime shipbuilding can be profitably duplicated wherever large scale, flat welding operations are involved. Parts on sale can be profitably used in the construction of special welding or other equipment for your particular needs. Industrial vacuum cleaners offered have many "clean-up operations" uses. Inspect now, then take advantage of this sale.

Inspection Invited 8:30 A.M. - 3:30 P.M. to Sale Date

10 LOTS combine Type S. Welding Heads with small size AC welding transformers that require no control box. Heads mfg. by Linde Air Products; transformers by Westinghouse and Glenn Roberts. $1,115.30 per lot.
9 LOTS combine Type CA Welding Heads with Intermediate Transformers. Welding heads have air motor and reel. Some parts missing on heads; ammeters missing on most of transformers. $1,151.90 per lot.
24 LOTS comprised of Type "U" Welding heads, heaviest size welding transformers and Control Panels. Some parts missing on most units. Lots priced at $1,741.89.
19 LOTS offer Model 09V10 Linde Air Control Panels and type "U" Welding Heads. Most panels are without ammeters, some minus other parts. $885.00 per lot.
22 LOTS contains Industrial Vacuum Cleaners—200 cu. ft. per min. 110 V, AC/DC motors. $50.00 each.
27 LOTS offer Industrial Vacuum Cleaners—200 cu. ft. per min. Mainly Arco Wand with 1 HP., 3 phase, 220/440 V, AC/DC motors. $175.00 each.
Other lots contain parts, and are priced according to contents and condition.

Fixed Price Sale
June 13 - 10 A.M. - 12 Noon
Orders Filled in Priority Sequence
Competitive Bid Sale on Remaining Stocks
1 P.M. - 5 P.M. - June 13.
No Priorities Recognized.

All Sales Subject to WAA Standard Conditions of Sale. Payment must accompany all offers to purchase.

GUESS what part of your cost-of-living dollar goes for GAS and ELECTRICITY

Relative Importance of the Major Groups of Items priced for the San Francisco Consumers' Index as of December 15, 1946.

All Items . . . 100 cents
Food . . . . . 44.7 cents
Clothing . . . 12.4 cents
Rent . . . . . 11.5 cents
House furnishings . 3.7 cents
Miscellaneous 25.6 cents
* Fuel, Electricity and Ice . . 2.1 cents

That is a good question and you should know the answer. It is only a small part of each dollar you pay out to run your home and feed and clothe your family.

And the reason is that gas and electricity are among the very few cost-of-living items you still buy today at way-below pre-war prices. (Since 1939 the cost of electricity has gone *down* 16% and the cost of gas has gone *down* 33%).

The chart to the left, which is based on an official government report from the Bureau of Labor Statistics, shows that the costs of gas and electricity are mere fractions of each dollar you spend to maintain home and family.

Gas and Electricity are the outstanding bargains in the home today!

**just 9/10 of a cent goes for GAS*
**just 8/10 of a cent goes for ELECTRICITY*

NOW You Can Get that "EXTRA" building You've Wanted!

ALL-STEEL "QUONSETS" AT LOW-COST
Versatile, rugged— Easy to use and maintain

Yes, an economical, durable "Quonset" is the answer to your building problem. In its simplest form with an open front, it makes a fine loafing barn for livestock, or a roadside stand; equipped with sliding doors, the fire-resistant, weatherproof "Quonset" provides protection for implements and vehicles; fitted with a solid front panel, it becomes a sturdy toolroom, workshop, or warehouse. If additional space is needed, the building is easily extended by adding as many 12-foot sections as you wish.

California's Douglas Attempts to Force Hearing of T-E-W

WASHINGTON—Representative Helen Gahagan Douglas of California, for one, is demanding congressional action on the Taft-Ellender-Wagner long-range housing bill.

Disturbed over Congressman Jesse P. Wolcott's statement recently that the T-E-W bill would not be acted on by his banking and currency committee this session, the Californian has introduced a resolution discharging the house committee from this legislation. By this action she seeks to by-pass the committee altogether and get the bill before the house as an immediate order of business.

Tuesday Deadline

If Mrs. Douglas' resolution is not acted on by the house rules committee to which it was referred by Tuesday, and if Mrs. Douglas can obtain 818 signatures of house members(one more than half) then the controversial issues of the revised Wagner-Ellender-Taft bill of 1946 will automatically come up for debate in the house.

The legislation is being sponsored in the house by Representative Jacob Javits, New York republican.

(According to house rules if the rules committee has not acted on Mrs. Douglas' petition by Tuesday, it will be placed on the speaker's desk to receive signatures.)

The Taft-Ellender-Wagner bill, 1947 version, is of paramount importance to the construction industry. It provides for government subsidies for building housing for the low income groups. It carries in its pages financial arrangements designed to induce money from the large investors into the construction of rental housing. It also provides for private home builders to take advantage of certain broad financing policies outlined in the measure.

Decries Inactivity

"This country needs housing," Congressman Douglas said. "If the house committee will not consider the bill, we will try other means to get it before the house."

California opinion on the need for such a law seems to be sharply aimed at full endorsement. Representative Holifield of the west coast branded it as "a dead duck" in this session. Although it was reported out favorably by a slim majority from the senate banking group, he said, it will be ignored by the appropriate committee in the house. He decried lack of action to bring out the long-range bill to provide housing "not only for veterans but for all the people of America who are in the sub-income brackets and who need housing. We see nothing done about that."

Bellflower Resolution

The other day Representative Bradley of California extended his remarks to include a resolution of the Harry T. McLane Post 1387, Veterans of Foreign Wars, Bellflower, Calif., endorsing the measure.

ASK MAINTENANCE OF TIN SMELTING

WASHINGTON.—To bolster the home supply of finished tin, Senator Bricker of Ohio has introduced a resolution which was referred to the committee on banking and currency.

Acting for himself and Senators Cain of Washington and Robertson of Virginia, Senator Bricker said the legislation would strengthen the common defense and meet industrial needs by providing for the maintenance of a domestic tin-smelting industry.

OPENING OF BIG CVP BID.—Seen here at the bureau of reclamation's Antioch office during Tuesday's bid opening for the Tracy Pumping Plant at James S. Butler of Stolte, Inc., one of the low-bidding firms, and Lorraine Greene, reporting for the Daily Pacific Builder. Stolte, in a combined bid with United Concrete Pipe, Ralph A. Bell and Duncanson-Harrelson, was low at a total of $5,888,695 for the two schedules. Joe Odgers, veteran on the "Builder" staff, (extreme right) was in charge of coverage.

Many States Spend Billions in Highway Funds on Other Work

WASHINGTON—Arthur C. Butler, director of the National Highway Users Conference, charged today that billions of dollars intended for highway construction have been diverted to other uses by many states.

He called for a "continging campaign" to win more states away from spending highway revenues for non-highway purposes.

State highway revenues taken away from road budgets and assigned to other purposes since 1925, now approximate two and one-half billion dollars, Butler said.

Much of this money has been collected from gasoline taxes.

In the last non-war year for which figures are available, 1941, the amount of funds thus diverted reached a record peak, NHUC said, stretching to $215,039,000.

Butler claims that in many states these diverted funds, if used for their originally intended purpose, road building, would have meant the difference between present inadequate highway systems and the adequate roadways they might now have.

Nineteen states, including California, Oregon and Washigton, he pointed out, have constitutional amendments requiring highway revenues to be used for highway purposes. This includes registration and license fees. The first was voted by Minnesota in 1920. No state ever has repealed an amendment once voted.

BRICK DESIGNS FOR ECONOMY HOUSES TO BE IN MODULAR SIZE

WASHINGTON.—The industry engineered houses developed by the Producers' Council and the National Retail Lumber Dealers Association will be designed in brick and tile by the Structural Clay Products Institute and the plans will be made available to builders and others through usual channels.

"New modular sizes of brick and tile which are perfectly adapted to the engineered homes are now available in all sections of the country and soon will be produced by all manufacturers," Roy A. Shipley, president, declared.

#

FAVOR TRUMAN PLAN

WASHINGTON.—Following out a mandate of last year's 47th annual encampment, Louis E. Starr, national commander-in-chief of the Veterans of Foreign Wars, today offered support of the V.F.W. for President Truman's plan to consolidate government housing agencies.

$600,000 Presidio Project Is Awarded By Army Engineers

Colonel S. N. Karrick, district engineer, San Francisco district, corps of engineers, today announced the award of a government contract to Erbentraut & Summers, San Francisco general contractors, for the construction of twenty frame and stucco buildings in the Presidio of San Francisco, at a total cost of approximately $600,000.

Each building will contain four apartments and each of the eighty apartments has two bedrooms, a living room with dining alcove, and a kitchen. The contractor will start construction in a few days and the work should be completed within six months.

This new construction, along with the conversion of military structures to family housing now in progress and the construction of three more apartment buildings for which bids will be opened in a few days, is part of a program to reduce off-post housing demands for army personnel in the Bay Area.

#

VOTES $70 MILLION IN DEFICIENCY FUNDS FOR FLOOD CONTROL

The house, by voice vote, has allotted an additional $12 million to the War Department for discriminating use by army engineers on emergency flood control work. This was put through as part of an urgent deficiency bill appropriating $70 million for several government departments. The house tacked the $12 million for emergency flood control onto the $58 million for all deficiency appropriation passed by the appropriations committee. In a separate bill, the house authorized $15 million for repair of flood-damaged flood control facilities.

Scrapping of Timber Roads Fund Harmful To Small Companies

WASHINGTON. — Senator Wayne Morse of Oregon believes that conference action in knocking out the construction and rent control bill amendment providing $10 million for building access roads into remote timber stands will have a damaging effect on the lumber producing industry.

To offset this decision to deny an appropriation for this important work, Morse has introduced a senate resolution to provide for "a suitable and adequate system of timber access roads" to and into the national forests of the nation. This legislation calls for appropriation of $25 million with which to build these roadways for the purpose of reaching now inaccessible raw lumber supplies.

The deletion of his amendment from the construction and rent control bill on which conferees wound up their deliberations over the week-end, constituted an aid to the large lumber concerns in "squeezing out" the smaller companies, Morse asserted. He added:

"The representation that the access roads appropriation is not wanted by lumber companies in the Pacific northwest does not conform with enthusiastic reports about the amendment from many lumber companies of that region who urged Senator Condon and myself to introduce the amendment."

#

ARBA EXPERTS URGE STATE AIRPORT AID

WASHINGTON. — "States and counties must help their municipalities to finance public airports if the aviation industry is to progress, and if the country is to be assured a strong aircraft industry to preserve a long peace," Walter R. Macatee, manager, Airport Division of the American Road Builders' Association, said in an airport conference here today.

Mr. Macatee suggested that the federal government pay 50 per cent, the state 25 per cent, and the sponsor 25 per cent of the costs of an airport construction project. If a municipality and a county divide the sponsor's share, each should assume 12½ per cent of allowable costs.

#

SACRAMENTO RENTAL PROJECT ANNOUNCED

Approval of a 15-unit rental housing project in Sacramento for World War II veterans and their families was announced today by District Director D. C. McGinness at the San Francisco office of the Federal Housing Administration.

Willard A. and Burnece Houser of Del Paso Heights will build the project at the northwest corner of "S" and 26th Streets, Sacramento. It will be financed by the Prudential Insurance Company of America with a mortgage of $76,400 to be insured by FHA under Title VI of the National Housing Act. The project will be known as Wilbur Apartments and will consist of one- and two-story structures providing 13 units three rooms and two units of four rooms.

#

URGE APPRENTICESHIP

WASHINGTON. — Under Secretary of Labor Keen Johnson, speaking before the Vermont Apprenticeship Council this weekend, urged skilled labor groups to see to it that there is a sufficient number of apprentices in training at all times to take care of replacements and to provide needed industrial expansion.

The skilled groups, he said, thru the use of apprentice training can develop the future labor leaders of the country; leaders who will have, by reason of training and experience, the necessary qualifications to assume these responsibilities.

Construction-Rent Bill's Final Vote To Be Wednesday

WASHINGTON. — Senate and house conferees placed their final approval on the construction and rent control bill Friday. It came out of conference substantially as it went in, stipulating decontrol of non-housing construction except for amusement and recreation structures.

It still carried the general 15 per cent "voluntary" rent increase provision.

Representative Jesse P. Wolcott of Michigan predicted the bill would reach the White House next Thursday. He said the house would take a final vote on the bill Wednesday and send it over to the senate the same day.

Conferees have been reported to have agreed tentatively on the removal of building restrictions on all types of construction except amusement and recreational.

Eliminates VHP-1

The legislators' interpretation of amusement types was said to embrace theatres, bowling alleys, night clubs, billiard parlors, skating rinks, and similar structures. Such an intent would permit the unrestrained construction of other commercial buildings including stores, small shops, filling stations and all manufacturing types. It now is a safe conclusion that VHP-1 influence over all industrial building will be removed when the bill goes through congress.

If the office of housing expediter is retained to enforce the remnants of the construction control order and to carry on rent control, more funds for its operation will have to be provided. The house earlier this week denied OHE all monies except enough to liquidate before June 30, 1948.

Veto Likely

The weekend announcement brought encouragement to the construction industry which has feared the conferees might change some of the wording of the measure with regard to non-residential controls. With the provisions generally the same as when the bill went to conference, its chances for more rapid house and senate approval will stand up.

There was growing talk on Capitol Hill, however, of the possibility of a veto by President Truman. He aws not expected to look with kindness either on the 15 per cent increase adjustment — which some senators described as the equivalent of an "across the board boost" —or the decontroling phases.

May Override Veto

Others argued Mr. Truman would sign the bill reluctantly as the lesser of two evils since without the legislation the country would be without rent control after June 30. At this moment enough strength is indicated to override any veto.

#

BUILDING INSPECTORS TO HOLD CHICAGO MEETING JUNE 30TH

CHICAGO.—Several hundred building inspectors from various sections of the country are expected to attend a four-day school sponsored jointly by the Building Officials Conference of America, Inc., the Midwest Conference of Building Officials and Inspectors and the Illinois State Inspectors' Association at the Drake Hotel here from June 30 through July 3.

The building inspectors will direct their attention to four mail classes of subjects: building department organization and procedure, building code improvement, advances in construction methods, and special problems relating to fires and other hazards in buildings.

Your New ELECTRIC
REFRIGERATOR
. . . how to select it!

SOON you will be able to get delivery on the particular make and style of electric refrigerator you have been waiting for. But regardless of what refrigerator you buy there is ONE MOST IMPORTANT question you should ask. That question is—"What size should I buy?" • To fit the size of electric refrigerator to your family's needs follow these simple rules. First of all, allow 2 cubic feet for each member of the family—an 8-cubic-foot refrigerator for four. Allow more room, too, if you have several children who need lots of milk. If you eat three meals a day at home or entertain quite a bit, that also calls for plenty of space. Finally, remember your old refrigerator which did not have that extra space for a watermelon or the turkey carcass. • You will find that the new refrigerators in larger sizes give you greater value, greater usability and lower operating cost.

Remember the first frozen food you tried? It was probably a package of peas and you exclaimed with delight when you saw their garden-green color and later enjoyed the garden-fresh flavor. Today there are dozens of fine frozen foods and many more delights are yet to come. You will be buying them. You will be freezing your own fruits and vegetables. Right now you can see many fine home freezers on display in stores. Plan to buy and use one in your home this year.

Where can you profit by using one of these NEW, IMPROVED
QUONSETS FROM PCA?

The Low-Cost Solution for **PERMANENT BUILDINGS** *with 257 uses!*

"QUONSETS" are the most rugged, durable, low-cost solution to your building problem. Framed and sheathed with steel to give you a permanent return on your building investment, the "Quonset" is fire-resistant, weatherproof, rot and vermin-proof, and fills a steadily increasing demand for low-cost, all-purpose structures. These sturdy "Quonsets" are easily erected . . . the Strand-steel framing system permitting the simple addition of sections or the demounting of the building for re-erecting elsewhere. Whatever the need, the "Quonset" is the quick, economical way to obtain more building space.

Official Proposals

Construction of Ward Bldg at Nevada State Hospital for Mental Diseases, near Reno

NOTICE TO CONTRACTORS

Sealed proposals will be received by the State Planning Board, State of Nevada at their offices, in care of the Chairman, Carson City, Nevada, until 2:00 o'clock P. M. on the 8th day of July, 1947, for the construction of Ward Building, at Nevada State Hospital for Mental Diseases near Reno, Washoe County, Nevada. Such sealed proposals as are received will be publicly opened and read in the Chairman's office in the State Highway Building, Carson City, Nevada at the above hour and date.

Prevailing wage rates for the Reno area shall be paid for all classifications of labor.

Plans and specifications may be examined at the office of the State Planning Board, Carson City, Nevada, the Associated General Contractors of America, 216 Pine Street, San Francisco, California, the Associated General Contractors, Golden Hotel, Reno Nevada, and the office of Edward S .Parsons, Architect, 210 West Second Street, Reno, Nevada. Plans, specifications and proposal forms may be secured by qualified bidders at the office of Edward S. Parsons, 210 West Second Street, Reno, Nevada.

Bidders will be required to deposit $25.00 for the first set of drawings and specifications, which amount will be refunded upon return of the drawings and specifications in good condition to the Architect not later than fifteen days after award of contract.

Additional copies may be had at the rate of $15.00 per set, with a refund of $5.00 upon the return of the same in good condition not later than fifteen days after award of contract.

Checks in payment of plan drawings and specifications shall be made payable to the Architect.

Contractors desiring to bid on this work shall be licensed under the State Contractor's License Law and shall file with the State Planning Board at Carson City, Nevada a complete statement of experience and financial conditions not later than five days prior to the date of bid opening. Requests for plans and proposal forms shall be received in the office of the Architect not later than two days prior to date, of bid opening.

The right is reserved to reject any or all proposals or to accept the proposal deemed best for the interest of the State of Nevada.

W. T. Holcomb, Chairman,
STATE PLANNING BOARD,
Carson City, Nevada.

LARGEST CONSTRUCTION DAILY IN THE WEST

Vol. 57—No. 117 SECTION ONE SAN FRANCISCO, WEDNESDAY, JUNE 18, 1947

Copyrighted 1947 by F. W. Dodge Corporation

PLANS and Speculations

The San Bruno Athletic Club has endorsed a proposal to install night lighting in the city's municipal park.

oOo

Burlingame probably won't have a bond election. Charles A. Shattuck, chairman of the citizens' recreation committee, has asserted that major improvements could be effected from regular tax funds.

oOo

Completion of an employment agency office building at a cost of $10,183, by L. J. Ferry, of Vallejo, has been approved by facilities review committee of OHE.

oOo

FWA will lend $1,850 to the village of Wagon Mound in New Mexico for plans for a sanitary sewer system and treatment plant to cost $60,000; and $8400 to the Kane County school district for construction of an $128,000 elementary school at Kanab.

oOo

Facilities review has approved the $42,000 Hillside Presbyterian church and Sunday school project in Oakland.

oOo

Carson City builders are complaining because that city lacks a building code.

oOo

The facilities review committee of the OHE has approved construction of an $11,000 theater at Kelseyville. Frank Garcia was the applicant.

oOo

FWA has allocated surplus structures to Pasadena College for physics labs, and to Sacramento College for classrooms and labs.

oOo

Construction of a $23,500 furniture warehouse by Burnham Bros. of Stockton, was given approval of the facilities review committee recently.

oOo

Rural electrification administration has approved loans to Quinault Light Company, Quinault, Wash., o $43,000 for system improvements for twelve miles of lines; and a second for $775,000 for 500 miles of new lines for Public Utility District No. 1 of Klickitat County, White Salmon, Wash.

oOo

Completion of the central office building of PT & T, at 25th and Capp Sts., San Francisco, at an estimated cost of $920,000 has been approved by the facilities review committee of the office of the housing expediter.

oOo

Funds for the maintenance and upkeep of Fresno county roads will be increased this year from $480,000 to $550,000.

$36 MILLION RETURNED TO WESTERN PROJECTS

WASHINGTON. — The senate has restored the $54 million which the house had slashed from the Interior Department's fiscal 1948 supply bill. Included in this addition was $3,116,288 more for the Central Valley Project.

The amended bill has been returned to conference with the house, and conferees were instructed to stick firmly by the $215 million restoration.

A total of $36 million was restored to westen reclamation projects.

#

SCRAP CITY SALES TAX BY 5-5 VOTE

The proposed city "sales tax" was defeated by the San Francisco board of supervisors this week by a 5-5 vote. Approval was given by Supervisors Christonher, Colman, Lewis, Mancuso and J. Josenh Sullivan. Dissenting were Gallagher, McMurray, Mead, Meyer and John J. Sullivan. Supervisor MacPhee was not present.

House Extends OHE to 1948!

Carpenters and Plumbers Trades Get Wage Boosts

After a month-long period of negotiation, the Central California chapter of Associated General Contractors, with the Northern California chapter cooperating, announced tentatively Monday that a 25c hourly wage increase would be granted the carpenters.

The offer was made with the proviso that all other features of the old contract should remain in effect. The union announced Tuesday that it would hold out until other demands relating to overtime and working conditions be met. No contracts have been signed, and no date has been set pending further negotiations.

At the same time, the Northern California Conference of the Plumbing and Heating Industry announced in Sacramento that a new agreement had been signed with plumbers and steamfitters unions.

Effective June 23 the new rate shall be $25 per hour. In return for this increase, the journeymen have agreed to modify many of their working conditions, and to further increase efficiency by establishment of refresher schools for journeymen, as well as apprentices.

#

Overstocking May Bring On Fall In Price, Says Farr

The tendency of refrigeration contractors to overstock on some items may result in a glutting of the market and consequent breakdown of the price structure, Warren Farr, president of the National Association of Refrigeration Contractors told an overflow meeting of the Northern California association Monday night. He urged the contractors to take steps to bring their inventories into line as soon as possible.

Farr discussed that the industry association has completed plans to set up materials testing laboratories at two major universities. Two preliminary tests of copper tubing and driers, already have shown the materials to be substandard. Both members and manufacturers will be given the results of the tests.

Local president James Scatena presided, and Lee Shirar, national director, introduced the guest speaker.

#

Cost Accountants Elect Jorgensen

Richard C. Jorgensen, Berkeley executive, is the newly - elected president of the San Francisco chapter of the National Association of Cost Accountants.

The new president announced that the organization has selected San Francisco as the site of a Pacific Coast Conference to be held in 1948. This will mark the first time that such a conference has been held in this city.

Other new officers of the organization include Frank L. Muncy, Moritz E. Pape, John N. Veale, G. S. Brown, Arthur L. Bolton, Sherman Peterson, Harry K. Roberts, Roger Rush, Ole K. Wasge, Elmer C. Gunther, Michael J. Stack, Barrett F. McFadon, Herold H. Nehls.

The retiring president, Douglass Barrows, El Dorado oil company executive, was elected to serve on the national board of directors.

FPHA Sheltered California Reds, Say Congressmen

WASHINGTON.—The house appropriations committee has published its comprehensive confidential report on the federal public housing authority.

Among other things, the report charged that 31 per cent of all tenants of public housing units are "totally ineligible for public assistance."

Accounts of the FPHA were found to be in such bad shape, the investigators aid, that a nationally known accounting firm refused to audit them because "the fiscal facts could not be ascertained from these records."

Diverted Prefabs

It also charged that provisions of the U. S. Housing Act calling for elimination of one slum dwelling unit for every dwelling unit built by government "has been almost completely ignored and the slums have continued to develop and grow."

The agency sold to France early in January, 1946, new prefabricated housing units numbering 8,110, the committee report states. This was the critical time in the postwar period when veterans were seeking housing by the hundreds of thousands. The report also touches on the "propaganda material" uncovered in FPHA storerooms designed to influence the passage of public housing legislation.

Solicit Contributions

In one instance, in the San Francisco area, allegations were made that building materials were fraudulently given to private builders by the FPHA employees; that political contributions were solicited and obtained by FPHA; that regional offices gave lucrative contracts for servicing surplus material to individuals who had no facilities and took no responsibility.

In San Diego, employees of the FPHA use their official position to intimidate the local housing authorities into giving preferred treatment to CIO strikers, the report charged.

Carried Propaganda

Many FPHA bulletin boards carry progapanda urging pressure on congress on behalf of the CIO unions and castigating congress for its attempts to shackle labor. In some instances, communists, including one communist newspaper editor, were found housed in public housing despite the fact that they were not veterans.

GROOVER AND I
TOVARICH

Henry A. Wallace says the way to have peace with Russia is to give Russia any and everything she wants.

☆ ☆ ☆

Henry is as wrong as a three-dollar bill.

☆ ☆ ☆

If Russia were offered everything she wants, she would immediately veto the proposition.

☆ ☆ ☆

Russia may not want war, but Russia does not want peace.

☆ ☆ ☆

To exist, a dictatorship must have war or threat of war even though the threat be artificial or synthetic.

☆ ☆ ☆

It is only through scare of an outside bogey-man that dictated people may forget the burdensome yoke they bear from within.

House Adopts Rent Control Bill Tuesday; Thwarts Move to Return It to Committee

By ERNEST J. MICKEL

WASHINGTON.—The building industry Thursday stood one step closer to a complete deliverance from hamstringing government controls after the house adopted a conference report on the rent control bill. The standing vote was 163 for and 73 against.

A few minutes before, a determined democratic move to have the matter recommitted to the house banking and currency committee — which would have killed the measure this session—was defeated 114 to 87.

Liquidate by '48

Now ready for senate consideration, which is predicted for later this week, this measure removes federal restrictions from all non-housing construction except amusement and recreational typos. If the senate adopts the report, as did the house, the bill will go to President Truman.

If the senate passes and the President signs, the office of the housing expediter will be extended until February 29, 1948. It will "administer and liquidate existing obligations . . . with respect to market guarantee agreements and premium payment regulations, including a premium payment regulation for merchant pig iron" which remains in effect until the end of calendar 1947.

Other important provisions of the legislation as it now stands include a government-insured 90 per cent loan to the manufacturers of industrial housing — prefabs. The loan provision will have the same effect as the present guaranteed market law, a national housing agency spokesman said.

Four types of housing are removed from rent control in an effort to stimulate the construction of rental housing. These are:

1—Hotels.

2—Motor courts and tourist homes.

3—Housing completed on or after February 1, 1947 (new and converted).

4—Housing not rented "as housing accommodations" between Feb. 1, 1945, and Jan. 31, 1947. The dates are inclusive.

'Most Unhappy Choice'

The house concurred in a senate change in the original Wolcott Bill specifying that new housing decontrolled would be that completed on or after February 1, this year. The house had provided that new housing decontrolled by the measure would be that completed after the act was passed.

The report was not adopted without opposition. A number of congressmen talked strongly against it, principally on its 15 per cent "voluntary" rent raise provision. The methods in decontrolling housing drew some fire, with Mike Moroney of Oklahoma, calling it "one of the most uphappy choices ever before us". He favored the bill, however, as "better than no bill at all."

Wolcott, introducing the conference report, said all controls on materials—allocation powers—that go into any building except amusement and commercial types, would be removed if and when the bill becomes law. "This is the most important part of the bill," he said. "It gives industry a free hand and enables it to go out and lick the housing shortage."

Creedon In Charge

Frank R. Creedon, housing expediter, would continue under the measure only for the purpose of administering "this act", Wolcott promised.

The appropriations committee will determine how much money OHE needs for this purpose.

Rent control would be continued by the proposed law through February 29, 1948.

Reclamation Officials Disclose Allocation Of Restored Funds

SACRAMENTO, Calif., June 17. —Regional headquarters of United States bureau of reclamation in Sacramento today announced a breakdown of how the proposed $10 million appropriation for the Central Valley project will be spent if congress approves the bill.

The measure, cut originally from $20 million down to $8,900,000 by the house, was adjusted by the senate to provide for $10,016,288 in new money for the CVP. The bill now is in joint conference.

"In increasing the house figure, the senate restored $2,160,000 for the construction of the so-called "west-side power transmission lines from Shasta to Delta.

The rest of the $10 million, reclamation officials said, would be spent on the following basis:

Joint facilities, $690,000; Irrigation facilities, $5,622,028.

Power facilities: Shasta power plant, $427,800; Keswick dam $100-840; Keswick power plant, $218,-040; Shasta-Delta line, via Oroville-Sacramento, $256,680; Contra Costa canal extension, $118,000; Keswick tap line, $160,000; Sacramento to Antelope line, $170,000; Contra Costa substation, $48,000; Antelope substation, $45,000.

Kings River project (Pine Flat Dam), $100,000.

Reclamation officials pointed out the money is in addition to about $19 million carried over from last year's books and already committed on existing work. These jobs include construction of 45 miles of the Friant-Kern canal, 23 miles of the Delta-Mendota canal, and a Costa canal system.

Former Key Officer Proposes to Lease And Operate Muny

J. L. Haugh, former Key System president, proposed to lease for thirty years and rebuild the municipal railway this week.

In a letter to the San Francisco board of supervisors, Haugh offered to organize a company to be known as San Francisco Rapid Transit Lines, which would take over all physical properties of the present system, but not assume its present obligations such as outstanding retirement to employes and judgments against the system.

The SFRTL company would pay two per cent on the gross revenue, which Haugh declares will pay the city $700,000 a year revenue. At present, the lines are run at a $350,000 a year loss.

Includes reinforced concrete Imhoff tank and sludge drying beds.

6/18/47 31
Owner Taking Bids—Due July 10, 10 A. M.
Pumping Plant, Etc.
PROVO RIVER PROJECT, Utah.
Jordan Narrows pumping plant, siphons, penstock, discharge pipes and wasteway; Spec. 1276.
Owner—U. S. Bureau of Reclamation, Provo, Utah.
The work is situated six miles northwest of Lehi, Utah.
The principal items of work and the estimated quantities involved are as follows:
(1) unwatering foundations for the siphon and penstock, lump sum;
(2) unwatering foundations for the pumping plant site, lump sum;
(3) 8000 cu. yds. excavation for the pumping plant structures;
(4) 11,000 cu. yds. excavation for pipeline and wasteway structures;
(5) 13,000 cu. yds. excavation for pipe trenches;
(6) 2200 cu. yds. excavation for the wasteway channel;
(7) 10,000 sta. cu. yds. overhaul;
(8) 15,000 cu. yds. backfill;
(9) compacting 7,000 cu. yds. backfill;
(10) compacting 10,000 cu. yds. embankments;
(11) 70 sq. yds. dry-rock paving;
(12) 1100 cu. yds. riprap;
(13) 90 cu. yds. gravel surfacing;
(14) furnishing and handling 5000 bbls. cement;
(15) furnishing 450,000 lbs. reinforcement bars;
(16) placing 450,000 lbs. reinforcement bars;
(17) 140 cu. yds. concrete in pumping plant and valve house superstructures;
(18) 620 cu. yds. concrete in pumping plant substructure, valve house substructures and sump;
(19) 170 cu. yds. second-stage concrete in pumping plant;
(20) 2800 cu. yds. concrete in pipeline and wasteway structures;
(21) 85 cu. yds. concrete in tunnel lining;
(22) constructing 100 lin. ft. control joints;
(23) furnishing and placing 10 sq. ft. elastic joint filler;
(24) furnishing and placing 150 lin. ft. metal seals;
(25) placing 480 lin. ft. rubber water stops;
(26) furnishing and placing 950 sq. ft. celluated-glass roof insulation;
(27) furnishing and placing 1300 sq. ft. coal tar-saturated-felt roofing;
(28) furnishing and applying 20 sq. yds. dampproofing;
(29) installing 19,000 lbs. gate valve, check valve, bypass valve and bypass valves with energy absorbers;
(30) installing 7600 lbs. hollow-jet valves;
(31) installing 620 lbs. slide gate and hoist;
(32) installing 51,000 lbs. pumping unit;
(33) installing 3500 lbs. miscellaneous equipment;
(34) installing 4000 lbs. crane;
(35) installing 5000 lbs. crane rails, appurtenant parts and beams;
(36) installing 4000 lbs. trashrack sections;
(37) installing 5000 lbs. standard pipe, fittings and valves less than 5 inches in diameter;
(38) installing 7700 lbs. standard pipe, fittings and valves 5 inches and larger in diameter;
(39) installing 690,000 lbs. of welded plate steel siphon, penstock and discharge pipes;
(40) furnishing and laying 1200 lin. ft. 36-inch diameter concrete pipe;
(41) installing 900 lbs. pipe handrails;
(42) installing 19,000 lbs. embedded metal frames for openings in floors, roof and walls;
(43) furnishing and installing metal accordion door, lump sum;
(44) furnishing and installing metal swinging doors, lump sum;
(45) furnishing and installing metal sash windows, lump sum;
(46) furnishing and installing metal louvers, lump sum;
(47) installing 800 lbs. miscellaneous metalwork;
(48) installing 750 lin. ft. electrical metal conduits;
(49) installing 370 lbs. electrical conductors, ground wires and ground rods;
(50) installing 400 lbs. miscellaneous electrical equipment.
Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Customs House, Denver 2, Colo.; E. O. Larsen, regional director, 32 Exchange Place, P. O. Box 360, Salt Lake City 8, Utah; L. R. Dunkley, project engineer, 303 Knight Block, P. O. Box 77, Provo, Utah, and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the project engineer.

33— BRIDGES

6/18/47 33
Owner Taking Bids—Due June 23, 11 A. M.—Bridge

Official Proposal

Constructing Project Calif. F.D. 2422-A—Quincy-Hurleton, Plumas National Forest, Butte and Yuba Cos.

FEDERAL WORKS AGENCY, PUBLIC ROADS ADMINISTRATION, San Francisco, California, June 16, 1947. Sealed bids will be received at the office of the Public Roads Administration, 720 Phelan Building, San Francisco, California, until 2:00 p. m. on June 26, 1947, and then publicly opened for furnishing the materials and performing the work for constructing Project California F.D. 2422-A, Quincy-Hurleton, Plumas National Forest, Butte and Yuba Counties, Calif. The length of the project is 3.504 miles and the principal items of work are approximately as follows: 12,000 cu. yds. unclassified excavation; 400 cu. yds. unclassified excavation for structures; 6,000 sta. yds. overhaul; 800 M. gals. watering; lump sum providing and maintaining water piant or plants; 14,000 cu. yds. selected borrow base course; 500 cu. yds. blotter material for bituminous treatment; 152 tons cutback asphalt; 12 lin. ft. reinforced concrete culvert pipe; 1,030 lin. ft. metal culvert pipe; 50 lin. ft. removing, cleaning and relaying salvaged culvert pipe. The minimum wage rate labor employed on this project shall be in accordance with the classified labor rates set forth in the Special Provisions. Plans and specifications may be examined by prospective bidders at the Public Roads Administration offices, 723 Phelan Building, San Francisco, and 515 Forum Building, Sacramento, and at Associated General Contractors' offices, 785 Market Street, San Francisco, 707 Architects' Building, Los Angeles, and Hotel Golden, Reno. Where copies of plans and specifications are requested a deposit of $10 will be required to insure their return. If these aer not returned within 15 days after opening of bids the deposit will be forfeited to the Government. Checks should be certified and made payable to the Treasurer of the United States. Plans, specifications and proposals may be obtained at the office of the Public Roads Administration, 720 Phelan Building, San Francisco 2, California. CHAS. C. MORRIS, Division Engineer.

Low and Only Bidder
Sewer Services Cost $29,715.06
MADERA, Calif., Madera County. 21st Agriculture Association.
Owner—State of California, Division of Architecture, Public Works Bldg., Sacramento, Calif.
State Architect—Anson Boyd, Public Works Bldg., Sacramento, Calif.
Only Bidder—Kovick Bros. Construction Co., 145 W. Shields Ave., Fresno, Calif., $29,715.06.

6/18/47 39
Owner Taking Bids—Due July 11, 10 A. M.
Prefabricated Houses, Water, Sewerage, Streets, Etc.; Spec. R-5-10
TRACY, San Joaquin County, and ANTIOCH, Contra Costa County, Calif.
Owner—Department of the Interior, Bureau of Reclamation, Antioch, Calif.
Work involves erecting prefabricated houses and constructing water distribution and sererage systems and bituminous surfaced streets, driveways and sidewalks for government housing at Tracy and Antioch, Calif.
The prefabricated houses to be erected will be furnished by the government under contract with Green Lumber Co., Laurel, Miss.
The principal items of work and the estimated quantities involved are as follows:
Schedule No. 1
Erecting prefabricated houses at Tracy Government Camp, Tracy, Calif.
Erecting 32 two-bedroom prefabricated houses;
Erecting 10 three-bedroom prefabricated houses;
Placing 170 yds. of concrete.
Schedule No. 2
Erecting prefabricated houses at Antioch Government Camp, Antioch, Calif.
Erecting 6 two-bedroom prefabricated houses;
Erecting 2 three-bedroom prefabricated houses;
Placing 55 yds. of concrete.
Schedule No. 3
Water supply and sewerage systems, streets and walks at Tracy Government Camp.
Excavating and backfilling 4640 ft. of water pipe trenches not more than 3 ft. deep;
Excavating and backfilling 480 ft. of sewer pipe trenches not more than 4 ft. deep;
Excavating and backfilling 1640 ft. of sewer pipe trenches over 4 ft. deep and not more than 7 ft. deep;
Excavating and backfilling 1090 ft. of sewer pipe trenches over 7 ft. deep and not more than 10 ft. deep;
Furnishing and laying 1750 ft. of 6-in. diameter vitrified clay sewer pipe and fittings;
Furnishing and laying 1360 ft. of 8-in. diameter vitrified clay sewer pipe and fittings;
Constructing 3 sewer manholes;
Constructing 6 lampholes;
Furnishing and laying 1125 ft. of 4-in. diameter pipe for water main;
Furnishing and laying 1370 ft. of 3-in. diameter galvanized stee lservice piping;
Furnishing and laying 400 ft. of 2-in. diameter galvanized steel service piping;
Furnishing and laying 50 ft. of 1-in. diameter galvanized steel service piping;
Furnishing and laying 1900 ft. of ¾-in. diameter galvanized steel service piping;
Furnishing and installing two 2-in. gate valve and vitrified clay valve box assemblies;
Furnishing and installing four 3-in. gate valve and vitrified clay valve box assemblies;
Furnishing and installing one 4-in. gate valve and cast iron valve box assembly;
Furnishing and installing 3 fire hydrants;
Furnishing and installing 2 water meters;
Placing 12,500 ft. timber curb boards;
Constructing 4200 sq. yds. base course for streets;
Constructing 7000 sq. yds. bituminous surface streets and driveways;
Constructing 1440 sq. yds. bituminous surface sidewalks;
Grading. Schedule No. 4
Water supply and sewerage systems, driveways and sidewalks at Antioch Government Camp.
Excavating and backfilling 410 ft. of water pipe trenches not more than 3 ft. deep;
Excavating and backfilling 335 ft. of sewer pipe trenches not more than 3 ft. deep;
Furnishing and laying 335 ft. of 6-in. diameter vitrified clay sewer pipe and fittings;
Furnishing and laying 10 ft. of ¾-in. diameter galvanized stel service piping;
Furnishing and laying 410 ft. of 1-in. diameter galvanized steel service piping;
Constructing 2800 ft. of timber curb boards;
Constructing 480 sq. yds. bituminous surface driveways;
Constructing 190 sq. yds. bituminous surface sidewalks;
800 cu. yds. imported fill;
Grading camp areas.
Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: R. L. Boke, regional director, Old Post Office Bldg., 7th and K Sts., Sacramento 14, Calif.; O. G. Boden, construction engineer, Antioch, Calif., and Jack W. Rodner, district manager, P. O. Box 1270, Merced, Calif.
Prospective bidders desiring to visit the site of the work should communicate with the construction engineer, Antioch, and/or the resident engineer, Tracy, Calif.

6/18/47 39
Hearing of Protests Set for July 9, 8 P. M.
Sanitary Sewers Cost $28,076.08
WALNUT CREEK, Calif., Contra Costa County, Buena Vista Ave., Pringle Ave., Hillside Ave., and Parkside Dr.
Owner—City of Walnut Creek, Victor, Jan Veckl, City Clerk, 1376 Main St., Walnut Creek, Calif.,
City Engr.—James Bronson, City Hall, Walnut Creek, Calif.

40— STREETS AND HIGHWAYS

6/18/47 40
Owner Taking Bids—Due July 7, 8 P. M. (Unit Quantities)
Street Improvement; Res. No. 46-25
SAN MATEO, Calif., San Mateo Co.
Flores St., between 28th Ave. and the northwest boundary of Anthony Subdivision; Edison St., between the northwest boundary of San Mateo Terrace No. 4 and Lot 1 of C.W. Diehl Subdivision, and the southeast half of Edison St. opposite Lot 35 of Anthony Subdivision, and 24th Ave. between Hacienda St. and Alameda de las Pulgas.
Owner—City of San Mateo, William J. O'Farrell, city clerk; Arthur Sullivan, city engineer, City Hall, San Mateo, Calif.
Consulting Engineer—W. D. Soule, 318 B St., San Mateo, Calif.
Includes grading crusher run waterbound rock macadam base pavement with asphalt concrete wearing surface, portland cement concrete curbs, gutters, sidewalks and electroliters, sanitary sewer house laterals.
Unit quantities are:
(1) 6867 cu. yds. grading (all classes of material), including removal of trees, etc.;
(2) 105,348 sq. ft. 6-in. crusher run base, 2-in. asphaltic concrete wearing surface, including prime coat in place, complete;
(3) 952 lin. ft. type A concrete curb and 3-in. gutter, including 3-in. cushion in place, complete;
(4) 8179 lin. ft. type B concrete curb and 3-in. gutter, including 3-in. cushion in place, complete;
(5) 36,796 sq. ft. concrete sidewalk, including 3-in. cushion in place, complete;
(6) 1146 sq. ft. concrete driveways and sidewalk extensions, 4-in. thick, in place, complete;
(7) 90 lin. ft. type A concrete curb only, including 3-in. cushion in place, complete;
(8) 1260 lin. ft. 4-in. tvirified clay pipe sewer laterals in place, complete;
(9) 30 lin. ft. 8-in. concrete pipe storm sewer encased in concrete in place, complete;
(10) 506 lin. ft. 12-in. concrete pipe storm sewer in place, complete;
(11) 51 cu. yds. 4x3-ft. reinforced concrete culvert in place, complete;
(12) 400 sq. ft. concrete valley gutter (6-in. thick), in place, complete;
(13) 5 each catchbasins with cast iron frames and covers in place, complete;
(14) 2 each manholes with cast iron frames and covers in place, complete;
(15) 1 each rebuild manhole and install cast iron frame and cover in place, complete;
(16) 40 lin. ft 2x6-in. redwood header board in place, complete;
(17) 2 cu. yds. replace concrete pavement 6-in. thick;
(18) 14 tons asphaltic concrete 6-in. thick in place, complete;
(19) 22 each electrolier standards standards complete with concrete base and glassware;
(20) 2550 lin. ft. 1-in. electroller conduit in place, complete;
(21) 3075 lin. ft. 1½-in. electroller conduit in place, complete;
(22) 10,015 lin. ft. single conductor cable in place, complete.
Specifications obtainable from the office of the city engineer upon deposit of $10, refundable.

(2) 205,900 cu. yds. benching, rock, for pipeline construction;
(3) 4000 cu. yds. excavation, common, for river channel change;
(4) 1300 cu. yds. excavation, rock, for river channel change;
(5) 71,200 cu. yds. excavation, common, for pipe trench;
(6) 81,200 cu. yds. excavation, rock, for pipe trench;
(7) 12,000 cu. yds. excavation, common, for structures;
(8) 5500 cu. yds. excavation, rock, for structures;
(9) 7200 cu. yds. excavation, all classes, in tunnels;
(10) 500 cu. yds. compacted embankments;
(11) 40,000 sta. cu. yds. overhaul;
(12) 106,700 cu. yds. backfill;
(13) furnishing and placing 65,000 lbs. permanent steel tunnel support;
(19) furnishing and erecting 28 M bm. of permanent timbering in tunnels;
(20) furnishing and installing 10,000 lbs. of plate steel tunnel-liner plates;
(21) 30 cu. yds. washed gravel or spalls outside of plate steel tunnel-liner plates;
(22) constructing 2200 lin. ft. 6-in. diameter tunnel drains;
(23) laying 450 lin. ft. 6-in. diameter sewer pipe with cemented joints;
(24) drilling 200 lin. ft. grout holes not more than 10 ft. deep;
(25) placing 200 lbs. grout pipe and connections;
(26) 400 cu. ft. pressure groutings;
(27) 1300 cu. yds. concrete in structures;
(28) 2000 cu. yds. concrete in tunnel lining;
(29) 1890 cu. yds. concrete in foundation for concrete pipe;
(30) furnishing and handling 24,840 lbs. cement;
(31) placing 250,000 lbs. reinforcement bars in structures;
(32) placing 150 sq. ft. elastic filler material in joints;
(33) placing 540 lin. ft. rubber water stops in joints;
(34) dampproofing 175 sq. yds. of walls;
(35) furnishing and placing 155 sq. ft. of insulation and sheeting;
(36) furnishing and installing 200 lin. ft. embedded electrical conduit, 1¼-in. and less in diameter;
(37) furnishing and installing 250 lin. ft. buried conduit, 2-in. in diameter;
(38) furnishing and installing 25 lbs. conduit boxes, junction boxes and cabinets;
(39) furnishing and installing 25 lbs. of embedded ground wires;
(40) furnishing and placing 3300 lbs. of metal thimbles in precast concrete pipe;
(41) laying 100 lin. ft. 24-in. diameter corrugated metal pipe;
(42) laying 100 lin. ft. 30-in. diameter corrugated metal pipe;
(43) installing 2300 lbs. frame and guides for fixed-wheel gate;
(44) installing 2500 lbs. fixed-wheel gate;
(45) installing 1200 lbs. fixed-wheel gate hoist;
(46) installing 7500 lbs. trashrack metal work;
(47) installing 8000 lbs. of standard metal pipes;
(48) furnishin gand installing control-house metal work, lump sum;
(49) installing 40,000 lbs. miscellaneous metal work;
(50) transporting and placing 110 pipe sections now in storage;
(51) manufacturing and laying 12,-540 lin. ft. of 69-in. diameter precast concrete pipe, symbol A-50;
(52) manufacturing and laying 1460 lin. ft. 69-in. diameter precast concrete pipe, symbol A-75;
(53) manufacturing and laying 40 lin. ft. 69-in. diameter precast concrete pipe, symbol A-100;
(54) manufacturing and laying 4880 lin. ft. 69-in. diameter precast concrete pipe, symbol B-50;
(55) manufacturing and laying 560 lin. ft. 69-in. diameter precast concrete pipe, symbol B-75;
(56) manufacturing and laying 40 lin. ft. 69-in. diameter precast concrete pipe, symbol B-100;
(57) manufacturing and laying 4300 lin. ft. 69-in. diameter precast concrete pipe, symbols C-50 and D-50;
(58) manufacturing and laying 640 lin. ft. 69-in. diameter precast concrete pipe, symbols C-75 and D-75;
(59) manufacturing and laying 40 lin. ft. 69-in. diameter precast concrete pipe, symbols C-100 and D-100.

Schedule No. 2

Station 1784+68.7 to Station 1875+50, Station 1907+00 to Station 1992+10, and Station 2012+40 to Station 2301+74.5, and Slowoff at Station 1743+90, and Wasteway at Station 1749+85.

(60) 185,500 cu. yds. benching, common, for pipeline construction;
(61) 47,600 cu. yds. benching, rock, for pipeline construction;
(62) 155,000 cu. yds. excavation, common, for pipe trench;
(63) 11,900 cu. yds. excavation, rock, for pipe trench;
(64) 8900 cu. yds. excavation, common, for structures;
(65) 1000 cu. yds. excavation, rock, for structures;
(66) 6300 cu. yds. compacted embankment;
(67) 30,000 sta. cu. yds. overhaul;
(68) 119,800 cu. yds. backfill;
(69) compacting 14,000 cu. yds. backfill;
(70) 175 sq. yds. dry-rock paving;
(71) 665 cu. yds. riprap;
(72) 900 cu. yds. concrete in structures;
(73) 850 cu. yds. concrete in foundation for concrete pipe;
(74) furnishing and handling 30,950 bbls. cement;
(75) placing 121,000 lbs. reinforcement bars in structures;
(76) placing 25 sq. ft. elastic filler material in joints;
(77) placing 415 lin. ft. rubber water stops in joints;
(78) dampproofing 70 sq. yds. of walls;
(79) removing 60 cu. yds. existing concrete paving in Sam Park Reservoir;
(80) furnishing and laying 1760 lin. ft. 4-in. diameter concrete pipe;
(81) furnishing and laying 80 lin. ft. 24-in. diameter concrete pipe;
(82) furnishing and laying 740 lin. ft. 42-in. diameter concrete pipe;
(83) furnishing and placing 8600 lbs. metal thimbles in precast concrete pipe;
(84) installing 1610 lbs. flap gate;
(85) installing 66,600 lbs. standard metal pipes;
(86) furnishing 34,100 lbs. miscellaneous metal work;
(87) manufacturing and laying 5630 lin. ft. 69-in. diameter precast concrete pipe, symbol A-50;
(88) manufacturing and laying 2920 lin. ft. 69-in. diameter precast concrete pipe, symbol A-75;
(89) manufacturing and laying 5540 lin. ft. 69-in. diameter precast concrete pipe, symbol A-100;
(90) manufacturing and laying 1680 lin. ft. 69-in. diameter precast concrete pipe, symbol A-125;
(91) manufacturing and laying 1900 lin. ft. 69-in. diameter precast concrete pipe, symbol A-150;
(92) manufacturing and laying 80 lin. ft. 69-in. diameter precast concrete pipe, symbol A-165;
(93) manufacturing and laying 8560 lin. ft. 69-in. diameter precast concrete pipe, symbol B-50;
(94) manufacturing and laying 2160 lin. ft. 69-in. diameter precast concrete pipe, symbol B-75;
(95) manufacturing and laying 1720 lin. ft. 69-in. diameter precast concrete pipe, symbol B-100;
(96) manufacturing and laying 1420 lin. ft. 69-in. diameter precast concrete pipe, symbol B-125;
(97) manufacturing and laying 2900 lin. ft. 69-in. diameter precast concrete pipe, symbol B-150;
(98) manufacturing and laying 80 lin. ft. 69-in. diameter precast concrete pipe, symbol B-165;
(99) manufacturing and laying 2200 lin. ft. 69-in. diameter precast concrete pipe, symbols C-50 and D-50;
(100) manufacturing and laying 300 lin. ft. 69-in. diameter precast concrete pipe, symbols C-75 and D-75;
(101) manufacturing and laying 160 lin. ft. 69-in. diameter precast concrete pipe, symbols C-75 and D-75;
(102) manufacturing and laying 100 lin. ft. 69-in. diameter precast concrete pipe, symbols C-125 and D-125;
(103) manufacturing and laying 160 lin. ft. 69-in. diameter precast concrete pipe, symbols C-150 and D-150;
(104) manufacturing and laying 40 lin. ft. 69-in. diameter precast concrete pipe, symbols C-165 and D-165.

Total bids submitted May 28 were:

(A) United Concrete Pipe Corp., Sched. 1, $2,221,742.60; Sched. 2, $1,-620,884; total, $3,842,626. If awarded Schedules 1 and 2 together, deduct $1 per lin.f. on Items (51) to (59) incl. or $24,520 form Sched. 1, and on Items (87) to (104), incl., or $37,580 from Schedule 2, making a total of $3,780,526.60.

(B) Carl B. Warren, Pleasant Grove, Utah, Sched. 1, $2,260,171.65; Sched. 2, $1,700,084.51; total, $3,960,-225.80.

(C) Utah Constr. Co., Salt Lake City, Utah, and San Francisco, Cal., Sched. 2, $1,666,977.50.

(D) Artukovich Bros., Hynes, Cal., Sched. 2, $1,835,653.

6/18/47 41
Contract Awarded
Water Pipe Line Cost $428,188.85
SAN DIEGO, Calif., San Diego, Co.
Commercial St. from Imperial Ave. and Churchward St. to Harbor Dr.
Owner — City of San Diego, City Clerk, Civic Center, San Diego, Calif.
Includes 3700 ft. of 36-, 10,200 ft. of 30- and 8300 ft. of 24-in. reinforced concrete cylinder pipe, concrete structures and misc. items.
Contractor — Arvanp Pipe & Constr. Co., 4635 Firestone Blvd., South Gate, Calif.

6/18/47 43
Contract Awarded
Water Supply Line (Install) Cost $1,468
SAN FRANCISCO, Calif., Golden Gate Park.
Owner — Park Commision of the City and County of San Francisco, Julius L. Girod, superintendent, McLaren Lodge, Golden Gate Park, Feil, and Stanyan Sts., San Francisco, Calif.
Plans by owner.
Installation of water supply line to the Oriental Tea Garden.
Contractor — J. Treacy, 452 Dewey Blvd., San Francisco, Calif.

6/18/47 41
Owner Taking Bids—Due July 1, 10 A. M.
Earthwork, Pipelines and Structures; Spec. 1856
YAKIMA PROJECT, Wash. Roza Division. Area 2, located north of Moxee City; Areas 5 and 6, about nine miles northwest of Zillah, and area 7, about three miles northeast of Zillah, Wash.
Owner—U. S. Bureau of Reclamation, 7½ N. 2nd St., Yakima, Wash.
Plans by engineering department of owner.
Lateral distribution systems Pump Areas 2, 5, 6 and 7; 240 days completion time.
The work involves:

Schedule No. 1

Lateral System, Pump Area 2

(1) 25,200 cu. yds. excavation, common, for laterals;
(2) 500 cu. yds. excavation, rock, for laterals;
(3) 5000 sta. cu. yds. overhaul;
(4) compacting 2700 cu. yds. embankments;
(5) 9500 cu. yds. excavation, common, for pipe trench;
(6) 450 cu. yds. excavation, rock, for pipe trench;
(7) 9950 cu. yds. backfill of pipe trench;
(8) 2100 cu. yds. excavation, common, for structures;
(9) 50 cu. yds. excavation, rock, for structures;
(10) 1900 cu. yds. backfill about structures;
(11) compacting 760 cu. yds. backfill about structures;
(12) placing 600 cu. yds. earth lining in laterals;
(13) 310 sq. yds. dry-rock paving;
(14) 430 cu. yds. concrete in structures;
(15) furnishing and placing 26,000 lbs. reinforcement bars;
(16) furnishing and erecting 4.5 M bm. timber in structures;
(17) installing 6400 lbs. gates and miscellaneous metalwork;
(18) furnishing and laying 29,100 lin. ft. 6-in. diameter standard concrete irrigation pipe;
(19) furnishing and laying 9300 lin. ft. 8-in. diameter standard concrete irrigation pipe;
(20) furnishing and laying 250 lin. ft. 10-in. diameter standard concrete irrigation pipe;
(21) furnishing and laying 190 lin. ft. 12-in. diameter standard concrete irrigation pipe;
(22) furnishing and laying 70 lin. ft. 15-in. diameter standard concrete irrigation pipe;
(23) furnishing and laying 230 lin. ft. 18-in. diameter standard concrete irrigation pipe;
(24) furnishing and laying 120 lin. ft. 24-in. diameter standard concrete irrigation pipe;
(25) furnishing and laying 980 lin. ft. 6-in. diameter extra strength concrete irrigation pipe;
(26) furnishing and laying 440 lin. ft. 8-in. diameter extra strength concrete irrigation pipe;
(27) furnishing and laying 490 lin. ft. 10-in. diameter extra strength concrete irrigation pipe;
(28) furnishing and laying 120 lin. ft. 12-in. diameter extra strength concrete irrigation pipe;
(29) furnishing and laying 170 lin. ft. 15-in. diameter extra strength concrete irrigation pipe;
(30) furnishing and laying 120 lin. ft. 18-in. diameter extra strength concrete irrigation pipe;
(31) furnishing and laying 200 lin. ft. 21-in. diameter extra strength concrete irrigation pipe;
(32) furnishing and laying 360 lin. ft. 24-in. diameter extra strength concrete irrigation pipe;
(33) furnishing and laying 120 lin. ft. 30-in. diameter reinforced concrete culvert pipe;
(34) furnishing and laying 110 lin. ft. 36-in. diameter reinforced concrete culvert pipe;
(35) erecting 50 lin. ft. No. 60 metal flume;
(36) erecting 50 lin. ft. No. 72 metal flume;
(37) erecting 90 lin. ft. No. 84 metal flume;
(38) installing 30 lin. ft. 30-in. diameter steel pipe.

Schedule No. 2

Lateral Systems, Pump Areas 5, 6, 7

(39) 17,600 cu. yds. excavation, common, for laterals;
(40) 400 cu. yds. excavation, rock, for laterals;
(41) 3000 sta. cu. yds. overhaul;
(42) compacting 2350 cu. yds. embankment;
(43) 3450 cu. yds. excavation, common, for pipe trench;
(44) 200 cu. yds. excavation, rock, for pipe trench;
(45) 3600 cu. yds. backfill of pipe trench;
(46) 1100 cu. yds. excavation, common, for structures;
(47) 70 cu. yds. excavation, rock, for structures;
(48) 1000 cu. yds. backfill about structures;
(49) compacting 400 cu. yds. backfill about structures;
(50) placing 600 cu. yds. earth lining in laterals;
(51) 385 sq. yds. dry-rock paving;
(52) 300 cu. yds. concrete in structures;
(53) furnishing and placing 12,000 lbs. reinforcement bars;
(54) installing 4500 lbs. gates and miscellaneous metalwork;
(55) furnishing and laying 10,575 lin. ft. 6-in. diameter standard concrete irrigation pipe;
(56) furnishing and laying 3195 lin. ft. 8-in. diameter standard concrete irrigation pipe;
(57) furnishing and laying 580 lin. ft. 10-in. diameter standard concrete irrigation pipe;
(58) furnishing and laying 480 lin. ft. 12-in. diameter standard concrete irrigation pipe;
(59) furnishing and laying 540 lin. ft. 15-in. diameter standard concrete irrigation pipe;
(60) furnishing and laying 320 lin. ft. 18-in. diameter standard concrete irrigation pipe;
(61) furnishing and laying 80 lin. ft. 24-in. diameter standard concrete irrigation pipe;
(62) furnishing and laying 195 lin. ft. 6-in. diameter extra strength concrete irrigation pipe;
(63) furnishing and laying 120 lin. ft. 8-in. diameter extra strength concrete irrigation pipe;
(64) furnishing and laying 130 lin. ft. 10-in. diameter extra strength concrete irrigation pipe;
(65) furnishing and laying 60 lin. ft. 15-in. diameter extra strength concrete irrigation pipe;
(66) installing 60 lin. ft. 12-in. diameter steel pipe.

Specifications obtainable from the above office; no charge to prospective bidders; to others, $2.50, not refundable.

6/18/47 41
Owner Will Ask Bids About July 1
Pipelins and Storage Tanks
BOULDER CITY, Boulder Canyon Project, Nevada. Clark County.
Owner—U. S. Bureau of Reclamation, Customs House, Denver, Colo.
Plans by engineering department of owner.
Includes laying six miles of 12-in. and 14-in. diameter high-pressure steel pipe and erection of 50,000 and 2,000,000-gallon storage tanks.
Specifications obtainable from the above office.

6/18/47 41
Contract Awarded
Water Pipe (Replace)
SAN FRANCISCO, Calif. Fleishhacker swimming pool.
Owner — Park Commision of the City and County of San Francisco, Gerald J. Linarcy, Secretary, Mc-Laren Lodge, Golden Gate Park, San Francisco, Calif.
Plans by owner.
Replacing 2-inch water pipes.
Contractor — Associated Engineers, 761 Folsom St., San Francisco, Cal. (1) $3092; (2) $2883.

Supplies, Equipment Sub-Contract Information

42—MISC. SUPPLIES AND MATERIALS

6/18/47 42
Chain-Link Fence & Lighting Standards
Bids Wanted
YAKIMA PROJECT, Wash.—Until July 8, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1871, for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Yakima and Sunnyside, Washington, chain-link fence and lighting standards for areas 1 to 4, inclusive, Main Canal Pumping Plants; chain-link fence and lighting standards for areas 5 to 9, inclusive, 9A, 10, 12 and 15 to 17, inclusive Main Canal Pumping Plants, Roza Divisdion, Yakima Proj., Wash. Materials will be installed by the government.

No charge for copies of the specifications to prospective bidders; to others $0.50, not returnable.

6/18/47 42
Stubs and Anchor Bolts
Bids Wanted
CENTRAL VALLEY PROJECT, Calif.—Until July 7, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Cupstomhouse, Denver, Colo., under Spec. 1870, for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Coram, California, structural-steel stubs and anchor bolts, for the 230-kv switchyard extension, Shasta Power Plant, Central Valley Project, California. The materials will be installed by the Government.

No charge for copies of the specifications to prospective bidders; to others $0.50, not returnable.

6/18/47 42
Structural Steel
Contract Awarded
SHOSHONE PROJECT, Wyo. — Independent Iron Works, Inc., 821 Pine Street, San Francisco, Calif., at $1581 awarded contract by the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1761 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Cody, Wyo., at the option of the bidder, miscellaneous structural steel for the Heart Mountain power plant, Shoshone Project, Wyoming. The materials will be installed by the government.

6/18/47 42
Conduciter, Etc.—Bids Wanted
CENTRAL VALLEY PROJ., Calif. —Until June 25, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Denver, Colo., under Inv. E-33,345-A for 1,228,000 l.f. conductor, etc., for Shasta-Tracy, Tracy, Calif., and for intermediate points.
Specifications obtainable from the above office.

6/18/47 41
Contract Awarded
Water Pipe (Replace)
SAN FRANCISCO, Calif. Fleishhacker swimming pool.
Owner — Park Commision of the City and County of San Francisco, Gerald J. Linarcy, Secretary, Mc-Laren Lodge, Golden Gate Park, San Francisco, Calif.
Plans by owner.
Replacing 2-inch water pipes.
Contractor — Associated Engineers, 761 Folsom St., San Francisco, Cal. (1) $3092; (2) $2883.

6/18/47 42
Structural Steel
Low and Only Bidders
COLUMBIA BASIN PROJECT, Washington.—The following submitted bids June 10 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1832 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Quincy, Wash., structural steel for glass-block windows for machine shop at Grand Coulee Power Plant, Columbia Basin Project, Washington. The material will be installed by the government:

Schmidt Steel Co., Portland, Ore., $19885; ship 180 days; 2800 lbs.; f.o.b. Portland; ½% 20 days; no equalization is offered.

Independent Iron Works, Inc., Oakland, Calif., $2216; ship 180 days; 13,-000 lbs.; f.o.b. Oakland; terms net; no equalization is offered.

L. Schaffer Co., San Francisco, Calif., $2371.20; ship 180 days; 2600 lbs.; f.o.b. San Francisco; ½ of 1% 20 days; no equalization is offered.

George T. Gerhardt Co., f.o.b. San Francisco, Calif., $2870.75; 11,000 lbs.; ½% 20 days; no equalization offered.

Rockwell Engineering Co., Chicago, Ill., f.o.b. Blue Island, Ill., $2825; 2600 lbs.; terms net; no equalization is offered.

6/18/47 42
Portland Cement
Bids Rejected—To Be Readvertised as Inv. 4563-A-2 to Open June 24
MISSOURI BASIN PROJECT, South Dakota.—Bid submitted Apr. 18 was rejected by the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Inv. 4563-A-2, 150,000 bbls. portland cement in bulk f.o.b. shipping point and/or Oral, South Dakota.

6/18/47 42
Portland Cement
Contract Awarded
COLORADO-BIG THOMPSON PROJECT, Colorado.—Colorado Portland Cement Co., Denver, Colo., at $146,112 awarded contract by the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Inv. No. F-46-410-A-1 for 40,000 bbls. of portland cement in bulk, f.o.b. (a) cars at shipping point, (b) f.o.b. trucks at shipping point ,(c) f.o.b. cars at Loveland, Colo., and (d) in a ground-level unloading hopper at east portola of Ramshorn tunnel and/or south portal of Prospect tunnel, approximately three miles south of Estes Park, Colo.

6/18/47 42
Welded Steel Pipe, Etc.
Contract Awarded
OAKLAND, Calif., Alameda Co.—Armco Drainage & Metal Products, Inc., 7th and Parker Sts., Berkeley, Calif., at $5097.75, awarded contract by the East Bay Municipal Utility District, Room 312, 512 16th St., Oakland, Calif., under Spec. 1836 for welded steel pipe.

6/18/47 42
Cast Iron Pipe—Call for Bids Scheduled to Open June 11 Cancelled
OAKLAND, Calif., Alameda Co.—The East Bay Municipal Utility District, Room 312, 512 16th St., Oakland 4, Calif., cancelled the call for bids under Pro. 1838 for furnishing class 150 bell and spigot cast iron pipe, 16-inch internal diameter.

6/18/47 42
Lumber—Bids Wanted
SAN FRANCISCO, Calif. — Until June 23, 3 P. M., bids will be received by Purchaser of Supplies M. H. Gerry, 270 City Hall, San Francisco, Calif., under Bid No. 3976 for furnishing and delivering lumber for the Recreation Department.
Specifications obtainable from the above office.

6/18/47 42
Structural Steel
Bids Wanted
SHOSHONE PROJECT, Wyo. — Until June 26, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1869, for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Cody, Wyoming, miscellaneous structural steel for power plant and switchyard, Heart Mountain Power Plant, Shoshone Project, Wyoming. The materials will be installed by the Government.

No charge for copies of the specifications to prospective bidders; to others $0.75, not returnable.

6/18/47 42
Paint, Enamel, Etc.
Bids Wanted
SAN FRANCISCO, Calif. — Until June 23, 2 P. M., bids will be received by the U. S. Treasury Department, 100 McAllister St., San Francisco, Calif., under Inv. SF-4020-47 for enamel, paint, oil, f.o.b. San Francisco, Calif.
Specifications obtainable from the above office.

6/18/47 42
Supplies and Equipment
Bids Wanted
SAN FRANCISCO, Calif.—Bids will be received by the U. S. Forest Service, 447 Commons St., San Francisco, Calif., for supplies and equipment as follows:

June 24, 2 P. M.

Bid No. 897—Motor-driven pumping unit, f.o.b. Sonora, Calif.

Bid No. 899—Coils and wire, f.o.b. Mt. Shasta, Calif.

June 25, 2 P. M.

Bid No. 901—Nails, barbed wire and gate, f.o.b. Mt. Shasta, Calif.

Bid No. 902—2 electric sirens, f.o.b. Eureka, Calif.

Specifications obtainable from the above office.

6/18/47 42
Portland Cement—Bids Wanted
MISSOURI BASIN PROJECT, South Dakota.—Until June 24, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Inv. 4563-A-2 for 130,000 bbls. portland cement in bulk, f.o.b. shipping point and/or Oral, S. D.

Specifications obtainable from the above office.

6/18/47 42
Corrugated Pipe and Gates
Bids Wanted
SAN FRANCISCO, Calif. — Until June 27, 3 P. M., bids will be received by Purchaser of Supplies M. H. Gerry, 270 City Hall, San Francisco, Calif., under Bid No. 3973 for furnishing and delivering 60-inch corrugated pipe and drainage gates for San Francisco Airport.

Specifications obtainable from the above office.

6/18/47 42
Cast Iron Fittings
Low and Only Bidder
OAKLAND, Calif., Alameda County.—Until June 25, 5:30 P. M., bids will be received by the East Bay Municipal Utility District, Room 406, 512 16th Street, Oakland, Calif., under Spec. 1840 for 160 ons of cast iron bell and spigot and flanged water pipe fittings of 4- to 12-inch diameter.

Specifications obtainable from the above office.

6/18/47 42
Liquid Chlorine—Bids Wanted
OAKLAND, Calif., Alameda County.—Until June 25, 5:30 P. M., bids will be received by the East Bay Municipal Utility District, Room 406, 512 16th Street, Oakland, Calif., under Spec. 1840 for 160 ons of liquid chlorine.

Bids will be taken as follows:

(1) 90 tons liquid chlorine in 2000-lb. containers, delivered in carload lots of 15 tons fob Valley Springs, Calif.
(2) 50 tons liquid chlorine in 2000-lb. containers fob District trucks at contractor's plant;
(3) 10 tons liquid chlorine in 150-lb. containers fob District trucks at contractor's plant.

Specifications obtainable from the above office.

43—MACHINERY AND EQUIPMENT

6/18/47 43
Motor Generator Set
Low and Only Bidders
COLUMBIA BASIN PROJECT, Washington.—The following submitted bids May 20 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1782 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Almira, Wash., one (1) motor generator set consisting of a 125-volt, direct-current motor, a 240/120-volt, single-phase, 90-cycle generator with accessories and control equipment mounted in a steel cabinet for Grand Coulee power plant, Columbia Basin Project, Washington. The apparatus will be installed by the government:

General Electric Corp., Denver, Colo., $2583.54; ship 420 days; 13,000 lbs. West Lynn, Mass.; 500 lbs. Schenectady, N. Y.; f.o.b. destination; terms net; firm bid. Equalization is offered (awarded).

Westinghouse Electric Co., East Pittsburgh, Pa., $2873.77; ship 350 days; 15,000 lbs. Buffalo, N. Y.; 400 lbs. St. Louis, Mo.; f.o.b. destination; terms net; firm bid. Equalization is offered.

6/18/47 43
Compressors, Etc.
Low and Only Bidders
COLORADO-BIG THOMPSON PROJECT, Colorado.—The following submitted bids May 26 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1798 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Wilds Siding, west of Loveland, Colo., three motor-driven air compressors; three air receivers; three after-coolers and three motor-driven deep-well turbine type drainage pumps for the Estes and Marys Lake power plants, Colorado-Big Thompson Project, Colorado. The apparatus will be installed by the government:

Joy Manufacturing Co., Denver, Colo., Job. Michigan City, Ind., Sch. 1 (1) $2014, 2900 lbs.; (2) $3554, 5600 lbs.; total, $5568; terms net; Sch. 2, f.o.b. East Stroudsberg, Pa., (3) $826, 4800 lbs.; Sch. 3, (f.o.b. Michigan City, Ind.) (2) 2463, 600 lbs.; f.o.b. Buffalo, N. Y.; (5) $364, 360 lbs.; total, $627. No equalization.

Ingersoll-Rand Co., Denver, Colo., f.o.b. Phillipsburgh, N. J., Sch. 1 (1) $2690, 3400 lbs.; (2) $2590, 2100 lbs.; total, $4596; net; Sch. 2 (3) $540, 1450 lbs.; Sch. 3 (4) $382, 395 lbs.; (5) $554, 630 lbs.; total, $936. Combination bid, Schedules 1, 2 and 3, $6372. No equalization.

F. H. Whiting Co., Denver, Colo., f.o.b. Lawrenceburg, Ind., full freight allowed; Sch. 4 (6) $2300 lbs., 1900 lbs.; (7) $1708, 1300 lbs., 1450 lbs.; total, $4448; net. No equalization.

Thompson Pipe & Steel Co., f.o.b. Denver, Colo., Sch. 2 (3) $1102, 4650 lbs.; net. No equalization.

Pennsylvania Pump & Compressor Co., f.o.b. Easton, Pa.; full freight allowed destination; Sch. 1 (1) $2050, 1400 lbs.; (2) $2650, 4000 lbs.; total, $4700; net. Sch. 2 (3) $831, 4350 lbs. Sch. 3 (4) $252, 500 lbs.

Stearns-Rogers Manufacturing Co., Denver, Colo., f.o.b. Franklin, Pa., Sch. 1 (1) $2185, 4500 lbs.; (2) $2650, 5500 lbs.; total, $4835; net. Sch. 2 (3) $840, 2150 lbs. Sch. 3 (4) $377; (5) $564; total, $941. No equalization.

★

REDEVELOPMENT BILL HAS COMMITTEE OKAY

SACRAMENTO. — Senator Gerald J. O'Gara's bill setting up a state redevelopment agency to operate on a $77,000 fund has been passed by an assembly committee.

Principal functions of the five-man apointive agency would be the stimulation of community planning and redevelopment, and making a study of methods of financing housing for sale or rental to families of moderate and low income groups may be produced."

The committee's interim report would be filed as soon as possible and final report and recommendations no later than Jan. 3, 1948.

Javits Asks House Probe of Housing On National Scale

WASHINGTON. — Weekend developments in the nation's capitol focused attention on the country-wide housing problem and drew the fire of one congressman, Jacob K. Javits of New York, who plans to do something about it.

Not only was Congressman Javits' ire turned on the housing situation; a Washington clergyman, Rev. Thomas Keehn, announced detailed plans for a "Fight for Housing" Day to be held here in Washington June 25, a week from tomorrow.

Action on the Hill has taken the form of a resolution introduced by Javits calling for an exhaustive investigation of the housing program's reputed failure. This is the first tangible evidence that congress would delve deeply and exhaustively into the shortage of homes. (The senate earlier this year investigated the shortage of building items and attempted to determine how small business was affected.)

The resolution asks for a committee of nine house members to be named by the speaker. It would conduct a study and investigation of housing shortages in the continental United States. Also, it would delve into reasons for these shortages, and, Javits hopes, find answers to the question of alleged failures in making adequate preparations to house veterans of World War II. He seeks to learn "the means by which an adequate supply of decent housing for all income groups may be produced."

The committee's interim report would be filed as soon as possible and final report and recommendations no later than Jan. 3, 1948.

FWA Administrator Fleming Favors Stream Pollution Control, With Construction Delayed

WASHINGTON.—The federal works agency favors inauguration of a comprehensive stream pollution control program right now, but it feels that the larger portion of construction in connection with it should be postponed.

Undertaking the construction phase of the program at this time would add to the already high construction costs, FWA believes.

This was brought out in testimony given by Major General Philip B. Fleming, federal works administrator, before the house public works committee which is holding exhaustive hearings on three stream pollution bills now before it.

Only projects of high urgency should be started at this time, Fleming told the congressmen.

Planning Needed

"But we believe that we should be preparing now," he added, "for the time when construction can be pushed. This is the time to prepare detailed working drawings and specifications for projects certified as needed, and which are part of comprehensive programs approved by the surgeon general. I believe, therefore, it would be desirable for the federal government to provide repayable advances for this planning. The bill should be amended to that purpose."

The FWA head explained that long delays occur between project approvals and start of construction. Advance plan preparation, he said, assures that work can be started at the most propitious time.

The committeemen are trying to work out a suitable bill comparable to S-418, the senate's pollution legislation.

These bills would set up a water pollution control advisory board. Fleming urged that it include a representative from the federal works agency and that it be appointed by the President.

His statement concluded:

"In summary, I favor enactment now of a program to bring federal aid to the cleaning up of the nation's streams.

"I propose changes in pending legislation that would confer adequate authority to get the job done, changes that would place in the principal health authority of the government—the public health service — responsibility for the health aspects of the program, and in the principal construction agency—the federal works — responsibility for the engineering and construction aspects of the program. Working together in harmony we can move forward expeditiously to accomplish the task."

After the senate subcommittee took up the legislation a few weeks ago, Fleming was instructed to present his own bill draft which would give FWA the engineering and construction duties in connection with the program. This he did after conferring with Dr. Thos. Parran, surgeon general of the U. S. Public Health Service. They are now agreed, he said, on dividing the responsibilities under the measure as outlined.

Plans Go Forward

In his testimony the FWA chief revealed that his agency has approved more than 6,700 applications for repayable advances to be used for the preparation of plans, working drawings, and specifications for state, and local, public works projects estimated to cost more than $2 billion.

More than half the advances approved, he asserted, are for the preparation of plans for sewer, water and sanitation facilities estimated to cost more than $912 million. More than 1,300 are to plan construction involving sewage disposal and treatment works to cost $360 million.

GROOVER AND I

ONE THOUSAND YEARS . . . OR 15 MONTHS

When this Republic was founded it was planned that the Congress should approve expenditures and at the same time assess taxes to provide the payments.

☆ ☆ ☆

This was too slow. It prevented the expenditure of any money not approved by the elected representatives of the people.

☆ ☆ ☆

Today, various groups from the State Department to subsidy blocs make committments running into unlimited totals—all of which is charged to you.

☆ ☆ ☆

This is felt to be all right, as you are given anything from 100 to 1,000 years in which to make the payments.

☆ ☆ ☆

But it is different should you want to buy a washing machine, stove, refrigerator or automobile for your own use.

☆ ☆ ☆

The government insists you shall make a heavy down payment and sets a short time for clearing the balance — generally one-third and 15 months.

☆ ☆ ☆

You must not go too far in debt for personal things in order that you be able to meet your foreign commitments.

President Truman Praises Postwar Record Of Lumbermen; 400 Attend National Congress

CHICAGO.—President Truman said in a telegram to nearly 400 delegates attending the American Lumber Congress convention here that the lumber industry's progress since V-J Day has been "very gratifying". The message described the materials situation, production standards and distribution problems to be "most difficult" problems, and expressed the desire of the government to cooperate with the industry in the future.

"Six months have produced a market change in our production at market situations," C. Arthur Bruce, president of the National Lumber Manufacturers' Association told the convention. "The lumber industry has evidenced that it is prepared today to meet any reasonable needs for its products, and, if being an industry which is highly sensitive to the old law of supply and demand, prices are rapidly declining to a basis of cost plus a reasonable profit."

Two steps may be taken at the convention to save the industry from demoralized market conditions which are impending, Bruce said. The first is a return to grade and quality which OPA almost destroyed in setting up its grading structure during the war.

The second step he described as to produce at the lowest possible cost consistent with quality. "We have been sucked into this time of easy money and have gotten soft on this fundamental requirement for continued service in a competitive economy."

Deploring any movement toward restrictive legislation relative to timber resources, Rep. Harris Ellsworth of Oregon, stated that an educational program for conservation and development by the Department of Agriculture similar to that set up for farming would solve the forestry problem.

"Today we can teach practical forestry by telling landowners truthfully that here is an opportunity for them," Ellsworth said. "There is money to be made by growing a tree crop. Today there is this motive that will give purpose to mass education in forest practices."

Abundant Supply

America's forests are abundant enough to more than supply all the lumber needed for a record-breaking construction period, R. A. Colgan, Jr., executive president of the association, stated. Of the eight billion feet of southern pine cut last year, 90 per cent was grown in the lives of the men who cut the trees, Colgan said.

As the first location of a lumber operation in this country, Maine has been producing timber for 300 years and is still using the same forests, according to Colgan.

With drain being replaced by growth, America's forest inventory shows a favorable balance for the first time, Corydon Wagner, chairman of the joint committee on forest conservation representing west coast lumber associations, told the congress.

Citing a steady improvement in the forest situation, Wagner said that the total area of devastated timberland was reduced by 6,000,000 acres between 1920 and 1944 despite the fact that 150,000,000 acres were cut during the course of normal logging operations.

Ever since 1810 there have been predictions of timber famines but they have never materialized because the steady year - to - year growth of new forests had not been taken into account, he asserted.

"We urge that federal forest officials and spokesmen of other groups put an end to the famine talk and join the forest industries in an expanding program of education and example to bring into the fullest possible realization the tremendous potential growing power of our forest lands," Wagner said.

SURPLUS BUILDINGS SOLD

Five surplus buildings and some shipyard equipment owned by the government but located on the Consolidated Steel Corp. property in Maywood have been sold to CSC for $65,278.

House Plans Turning War Housing Disposal Over to Works Agency

WASHINGTON (Exclusive)—A sizeable chunk of business is involved in the war housing disposal program as congress considers the advisability of transferring responsibility from the federal public housing authority over to the federal works agency.

Under a privileged resolution, the house last week set aside two hours of debate on H. R. 2492. Representative Jesse P. Wolcott's bill providing for the expeditious disposition of "certain war housing". But the lower body did not complete its consideration of this measure and turned to other legislation after some debate.

Here is exactly what is involved, according to FPHA estimates:

Under active management as of March 31, 1947, there was housing of a permanent nature built under the Lanham Act and known as "war housing" valued at $417,989,000.

Housing of the type referred to as "demountable" accounts for another $315,365,000 worth. These two categories constitute the permanent war-housing dwellings that congress is talking about in the Wolcott bill.

Additional re - use types under FPHA management March 31 included:

Temporaries, $576,120,000; dormitories, $22,159,000, and stop-gap or portable shelter types including trailers, $26,752,000. These are the re-use types that the Wolcott bill would not affect.

This all adds up to $1,458,385,000 worth of business for the agency. These figures are based on estimated value; FPHA says that it would be difficult to arrive at the sales value of this property because is must be appraised at the time it is disposed of, not before. This procedure reflects in wide variance from place to place, depending on the market values at any given time, the agency explained.

As the Wolcott measure now stands, it calls for transfer of the disposition responsibilities for the Lanham Act housing to FWA from the public housing agency. Federal works has had considerable experience in the transfer of surplus war housing to the colleges and university campuses for uses other than housing.

Along these lines it is interesting that an amendment offered on the house floor last week by Representative Spence of Kentucky to eliminate the provision for the transfer was rejected by a vote of 63 to 144. This would indicate a strong favor in the house for the switch of responsibility to be made.

ISSUE NEW STUDY OF INDIVIDUAL SYSTEMS

WASHINGTON. — Information on construction of individual sewage disposal systems, including septic tanks, on undeveloped land in outlying sections beyond the reach of municipal sewer lines and in rural areas is set forth in a bulletin printed and distributed by the office of the housing expediter and the national housing agency in collaboration with the U. S. Public Health Service.

Entitled "Individual Sewage Disposal Systems", the publication is a revision of an earlier bulletin incorporating the recommendations of the joint committee on rural sanitation.

Official Proposals

Highway Imp.—Modoc County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, Redding, California, until 2 o'clock P. M. on June 24, 1947, at which time and place they will be publicly opened and read, for performing work as follows:

Modoc County, about 1½ miles northwest of Adin Summit (11-Mod-28-A), mineral aggregate to be furnished and stockpiled.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Flagman	$1.15
Laborer	1.15
Oiler power shovels or cranes	1.50
Operator of power shovel or other excavating equipment, shovel type controls (up to and including 1 cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over 1 cubic yard)	2.25
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Any classification omitted herein not less than	1.15

Overtime: one and one-half (1½) times the above rates.

Sundays and holidays: one and one-half (1½) times the above rates.

State Highway Engineer's Estimate

Item 1. 700 tons mineral aggregate, 2-inch maximum.

Item 2. 4,000 tons mineral aggregate, ½-inch maximum.

FUNERAL FOR FARR, PIONEER ARCHITECT, TO BE WEDNESDAY

Funeral services for Albert Farr, 75, pioneer San Francisco architect, will be held at 11 a. m., Wednesday in the Piedmont Community Church. He died Saturday at his home, 339 San Carlos Avenue, Piedmont.

Surviving are his widow, Margaret; and a daughter, Mrs. Russell P. Andrews, of Chevy Chase, Md.

He was a member of the American Institute of Architects and Piedmont Lodge No. 521, F. & A. M.

#

DECRY AUTO TAXES

WASHINGTON.— More than 400 national and state organizations of highway users, representing a combined membership running into the millions Tuesday, petitioned congress to end all special federal automotive taxation as an unjust burden on the highway user.

Senate Makes Partial Restoration of Funds For West Reclamation

WASHINGTON— The huge Interior Department appropriations bill moved one step nearer passage last week when Senator Magnuson said the senate and house conferees had reached tentative agreement on recommendations that the house accept most of the senate changes. These changes added approximately $60 million over the house figures.

The lower body voted about $161 million for Interior's operations during this fiscal year. This was considerably under the budget of $296 million.

Of particular interest to contractors is Magnuson's statement that the conferees intend to recommend restoration to bureau of reclamation work "much of the money eliminated by the house". He added, however, that the money for power projects might be cut by the senate figures.

Some idea of the magnitude of the legislative task involved in this by conference action on more than 100 amendments. The senate changes were said to have prevailed in most of these cases.

Senator Magnuson's statement included this comment of reclamation—

"That will give the Columbia Basin approximately $1,326,000 for operation and maintenance and increase the house figure for the Columbia Basin construction from $11,435,000 to $21,438,000, the senate figure.

"While this is $6 million under the budget estimate and will cause some curtailment, it will permit continued progress on the project."

If the conference report is adopted and enacted, other western construction projects to benefit include **Colorado's Big Thompson** project, **Davis Dam** in Arizona and California, **Central Valley** in California, and **Hungry Horse Dam** in Montana.

The **Bonneville Power Administration** appropriation, cut by the house to $6,907,800 from a budget estimate of $29,278,000, was restored to $16,222,000 by the senate, plus contract authorization for $6 million more.

#

CALIFORNIA AVIATION COMMISSION CREATED

SACRAMPNTO.—The governor has signed biils creating a California aeronautics commission and appropriating $108,750 for its operation.

The legislation establishes ac ommission of five members and authorizes a full time $12,000-a-year director of aeronautics. The commission is authorized to establish general and special rules of procedure and to set up minimum standards within the scope of federal regulations.

#

HAYDEN LAKE UNIT CONSTRUCTION WINS REC BUREAU OKAY

WASHINGTON— Construction of irrigation works to preserve the improvements and increase crop production on 1,050 acres of land constituting the Hayden Lake unit in northern Idaho has been authorized, Under Secretary of the Interior Oscar L. Chapman announced Wednesday.

The plan provides for replacement of 8,600 feet of the woodstave discharge line, and for overhaul of the pumping equipment, at an estimated cost of $90,650.

#

APPLICATION PEAK

WASHINGTON.— The federal housing administration in June received more applications for mortgage insurance than in any previous month in its experience, Commissioner Raymond M. Foley announced Wednesday.

Personnel Board Takes Positive Action on Contractors' Board Inspectors Standards

By PHILIP G. BRADY

SACRAMENTO—The Daily Pacific Builder campaign to secure competent contractors state license board inspectors finally bore fruit last Friday when the state personell board moved to reestablish specificatrons calling for actual construction industry experience for future investigators.

All present inspectors will be retained, it was indicated, and public pledges were given to re-examine the salary scale with the objective of upward revision.

The issue was raised one year ago when in an admittedly "hasty" action, state officials "guessed" that men with a police background would better protect the public and industry than would men with building experience. Because these officials acted in semi-secrecy without consulting any industry representatives, their arbitrary action remained undetected for almost six months.

After a series of Daily Pacific Builder articles exposed the bureaucratic error, and at the request of this newspaper, the personnel board conducted a fact-finding survey to determine actual job requirements of license board investigators.

This survey, completed last January, upheld the industry protests and the new job requirements are designed to obtain fully qualified men. Hereafter only high school graduates with at least four years construction industry experience will be eligible for the posts. Additional work experience may be substituted for schooling.

At a public meeting here Friday Kenneth Byers, personnel board executive, credited this newspaper with spearheading the campaign to correct the error. After sketching the background of the case, Byers declared, "The Daily Pacific Builder assigned a reporter to check into the situation and requested that we reopen the case and make a survey."

The survey, he said, showed conclusively that the investigators "did require construction industry experience. The man who made the survey, Clarence Burger, also testified as to the actual need of on-the-job work experience for license board investigators.

"As I remember it," Robert D. Gray, board president, recalled, "considerable heat was generated by the industry at the time the survey was made." When Byers nodded wryful agreement, Gray continued, "Well, is the heat still on? If it's died down, I'm content to let it lie as is."

At that point, James A. Arnerich, mindful of the presence of a Daily Pacific Builder correspondent, rose quickly to his feet to state that the heat was by no means off. Arnerich, director of the Department of Professional and Vocational Standards, the agency overlording state license boards, added that the industry and license board was sitting back awaiting expected developments. Further inaction, he warned, would bring a resurgence of pressure.

How important a factor industry pressure is became apparent when Dr. Benjamin E. Mallary said that he would vote for the new specifications only because the trade felt it was necessary. He said he still believed, in spite of the survey results, that a policeman could do the job.

Arnerich who became department director after the change of specifications told the board that men obtained under the detective specifications had a good reaction in the field. That proves, he said, that "the guess that was made wasn't such a bad gonc. He neglected to state that four out of five of thee new appointeces had previous construction experience in addition to their police background.

"My conviction still is that investigatory experience is sufficient," Arnerich asserted. When Ford A. Chatters, board member from Lindsay, declared that he felt the contractors investigators should have construction experience, Arnerich conceded that "there are technical questions they have to pass on" and "they must appear in courts as expert witnesses."

After a board member questioned the sufficiency of the salaries ($250 to $310) John Fisher, chief personnel executive, told the board, "It is understood the the wage rates will be reviewed as soon as practicable." Arnerich asserted that he "is not satisfied with the salaries" but wished to establish the new classification before taking up the pay question.

A survey of the industry taken during the Daily Pacific Builder campaign disclosed a feeling that the license board investigators should receive between $350 and $450 a month. It was pointed out that city inspectors already receive upward of $365 and state construction inspectors receive $445. License board investigators, whose work is much more complex, should have comparable wages, it is felt.

The present wages are expected to be boosted to $360 shortly by blanket increases granted all state employees.

In answer to a question by Gray, Arnerich stated it was his intention to retain all men under the new classification.

Because of somebody's neglect to obtain a letter from the attorney-general declaring the undisputed legality of the classification change, the board was unable to take an official vote on the change and the actual vote will be taken at the next meeting in two weeks.

LUMBER EMPLOYMENT GAINS DURING JUNE

Every industry group producing durable goods lost production workers between May and June except lumber, which showed a marked seasonal rise, and stone, clay and glass products, which showed smaller gains. Estimated June employment in durable goods industries as a whole was 4.8 per cent above June, 1946, according to the state Department of Industrial Relations.

#

'UNDERMINED BY STRIKES'

WASHINGTON.—Steel production in the United States would have reached 92 million tons in 1947 instead of the 85 million tons now expected, if it hadn't been for three major strikes earlier this year.

This was stated by Walter S. Tower, president of the American Iron and Steel Institute, before the senate small business subcommittee.

SENATE HOUSING PROBE IS ASKED

WASHINGTON. —A new bill has been introduced in the senate (by McCarthy and Revercomb) calling for a thorough investigation of the housing shortage, specifically, and construction costs.

This proposed law would provide a fourteen-man committee composed of both house and senate members.

The committee would report its findings and recommendations to the full congress by next March 15.

#

GREEN BILL HEARINGS

WASHINGTON.—Despite Congressman Dondero's recent statement that he would discourage any legislative attempt to re-instate bureau of community facility loan funds for preparation of public works plans, the senate public works committee started hearings on Senator T. F. Green's bill to accomplish this purpose Friday.

GROOVER AND I

INFRA-RED

It has required two years for the most hopeful to realize Russia's only purpose in joining United Nations was to prevent the successful working of the United Nations.

☆ ☆ ☆

Since Tehcran and Yalta, Stalin has done nothing but delay and demand. He has never kept one promise he has made.

☆ ☆ ☆

The main point we overlooked is that Stalin never asked us for help. When his former pal Hitler kicked him in the pants we rushed in thinking he would appreciate being saved.

☆ ☆ ☆

Stalin has never admitted to his people that we were one particle of help. Behind the Iron Curtain it is propagandized that Russio won the war alone and unaided.

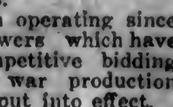
☆ ☆ ☆

Bright pink words have sobbed about Russia's "great sacrifice"—wasn't it something like ten million killed? Oh, yeah? And by whose count? And weren't they fighting their very recent pals?

☆ ☆ ☆

Let's remember we weren't permitted to observe the operation of war equipment which we gave and delivered for free. American fliers fighting on the Eastern Front were not permitted emergency landing fields behind the Russian lines.

☆ ☆ ☆



With one difference, Stalin is doing the same thing today that he and Hitler planned to do in the beginning—

☆ ☆ ☆

The difference: As the Allies have eliminated Hitler, Stalin doesn't have to share Europe with Hitler!

☆ ☆ ☆

Festung Europe mit Stalin Uber Allies!

#

Bill Proposed to Reinstate Service's Competitive Bidding

WASHINGTON.— The senate armed services committee will give further consideration to a bill Tuesday which would return the military to a pre-war method of obtaining supplies and letting construction jobs on an advertised bid basis.

This measure passed the house several weeks ago. It has been given attention in senate committee executive sessions two or three times and may be reported out Tuesday. It is being predicted that the legislation will pass and become law.

It would prohibit the services from negotiating contracts any longer except under specific exceptions named in the bill.

It sets up a uniform practice for placing orders for supplies and most construction on a strictly competitve bid basis. About 90 per cent of such orders and contracts are expected to be affected bp the change.

The proposal to change the wartime system of negotiated contracts now is backed by the armed forces themselves.

They have been operating since 1942 under war powers which have stopped the competitive bidding system since a war production board order was put into effect.

Owner Taking Bids—Due July 23, 10:30 A. M.—Bidders Figuring
Apartment and Store Building
OAKLAND, Calif., Alameda County, 19th and Foothill Blvd.
Owner—David Friedkin, c/o architect.
Architect—Edmund DeMartini, 785 Market St., San Francisco, Calif.
Frame, two-story (36x57 ft.), includes three apartments and one store.
Following contractors have taken out plans:
Harry R. Sherratt, 1231 13th Ave., Oakland, Calif.
Rademann-Guisto, 40 Ringold St., San Francisco, Calif.
Pacific Coast Builders, 2530 18th St., San Francisco, Calif.
Wells Bros. & Watters, 1502 Fir Ave., San Leandro, Calif.
Wellnitz & DeNarde, 314 6th St., San Francisco, Calif.
John Carlson, 1486 Excelsior Ave., Oakland, Calif.

7/15/47 • 26
Preparing Working Drawings
Apartments (22)
Total Estimated Cost $220,000
EDEN TOWNSHIP, Calif., Alameda County.
Owner—C. H. McIntyre, c/o architect.
Architect—J. Lloyd Conrich, 593 Market St., San Francisco, Calif.
Wood frame, wood and stucco exterior, wall frame, composition roof, hardwood floors; each unit consists of five rooms, two-story.

Engineering Section

31-32—WATER SUPPLY & SEWAGE DISPOSAL PLANTS

7/15/47 32
Contract Awarded
Storm Water Disposal System Cost $58,504
ALAMEDA, Calif., Alameda County.
Westerly side of Webster St. north of Tynan Ave. to the San Antonio Estuary.
Owner—City of Alameda, J. P. Clark, city clerk, City Hall, Alameda, Calif.
City Engineer—Carl Froerer, City Hall, Alameda, Calif.
Includes installing approximately 1700 lin. ft. vitrified clay culvert pipe from 15-in. to 24-in. in size, approximately 500 ft. 12-in. vitrified clay pipe for street crossings, and a storm water pumping plant approximately 75 ft. south of estuary.
Contractor—Robert B. McNair, 3746 Rhoda Ave., Oakland, Calif.

7/15/47 • 31
Owner Taking Bids—Due September 2, 8 P. M. (Bond Election in Amount of $450,000 Set for August 19)
Water Treatment Plant
ANTIOCH, Calif., Contra Costa Co.
Owner—City of Antioch, Margaret V. Jones, city clerk, City Hall, Antioch, Calif.
Consulting Engineer—John S. Bates, 3134 Eton Ave., Berkeley, Calif.
Water treatment plant with connections to the existing system.
Unit quantities will be given soon. Specifications obtainable from the offices of the city clerk and the consulting engineer upon deposit of $25, refundable.

33— BRIDGES

7/15/47 33
Contract Awarded
Girder Bridge Cost $178,493
SANTA MARIA RIVER, Arizona.
Across the Santa Maria River on the Wicken-burg-Kingman Highway various, 40 miles northwest of Wickenburg.
Owner — Arizona State Highway Commission, 17th Ave. and Jackson St., Phoenix, Ariz.
Plans by Engrg. Dept. of owner.
7 - span continuous girder bridge (steel girder or alternate, concrete box girder).
Contractor—H. L. Royden, P. O. Box 3707, Phoenix, Ariz., $178,493.
Total bids submitted were:
H. L. Royden, $178,493.
Vinson Construction Co., $188,226.-75 (steel girder); $206,787.75 (concr. box girder).
Carney Construction Co., $188,797.-08 (steel girder).
R. E. Bruce Construction Co., $201,093.25, (steel girder), $229,216.30 (concr. box girder).
Bowen and McLaughlin, $239,763.-97 (steel girder) $254,587.20 (concr. box girder).

7/15/47
Owner Taking Bids—Due August 15, 2 P. M. 26
Bridge
MONTEREY COUNTY, Calif. Across Big Sur River in Pfeiffer Big Sur State Park.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Structural steel bridge with timber deck.
The work involves:
(1) rem

(11) cleaning and painting structural steel;
(12) 10,000 lbs. bar reinforcing steel;
(13) engineer's office.

All materials required for use in connection with item 4 and item 10 will be furnished free of cost to the contractor.

Specifications obtainable from the above office.

34— DAMS, RESERVOIRS & DREDGING

7/15/47 34
Bids Rejected
Dredging; Serial 04-203-47-88
Cost $141,128
BODEGA HARBOR, Calif., Sonoma County.
Owner—San Francisco District Corps of Engineers, War Department, 74 New Montgomery St., San Francisco, Calif.
Plans by owner.
Includes 236,000 cu. yds. dredging and disposing of material.
As previously reported, San Francisco Bridge Co., 503 Market St., San Francisco, Calif., at $141,128, submitted the low bid June 24.

7/15/47 34
Contract Awarded
Dredging Cost $24,915.63
MOLATE POINT, Richmond, Calif., Contra Costa Co. U. S. Naval Fuel Annex.
Owner—War Department, Corps of Engineers, San Francisco District, 74 New Montgomery St., San Francisco, Calif.
Plans by engineering department of owner.
Includes approximately 38,500 cu. yds. of dredging under Serial No. 04-203-47-127.
Contractor—Olympian Dredging Co., 525 Market St., San Francisco, Calif.

7/15/47 34
Preparation of Concrete Aggregates; Spec. 1817 Cost $191,550
FRIANT-KERN CANAL, Central Valley Project, California, Along the San Joaquin River near Friant, Calif.
Owner—U. S. Bureau of Reclamation, Friant, Calif.
180 days completion time.
Contractor—George Pollock Co., Box 903, Sacramento, Calif.

7/15/47 • 34
Owner Taking Bids—Due Aug. 1, 2 P. M.
Sutter-Butte Canal Headgates; Spec. 1259
SUTTER & BUTTE COS., Calif. West Levee of Feather River.
Owner—Sacramento District Corps of Engineers, War Dept. ,Wright Bldg., Sacramento, Calif.
Plans by engineering department of owner.
(1) 28,000 cu. yds. common excav.;
(2) 1,000 cu. yds. struct. excav.;
(3) 21,000 cu. yds. borrow excav.;
(4) 800 M. gallons water for compaction;
(5) 2o roller hrs. addnl. compaction 1 tractor 5 ft. tamping roller;
(6) 210 cu. yds. gravel blanket in place;
(7) 75o tons rock paving;
(8) 110 cu. yds. filter mtl.;
(9) 2100 bbls. port. cement at mixing plant;
(10) 1400 cu. yds. struct. conc. in place;
(11) 200,000 lbs. reinf. steel in place;
(12) 6 each slide gate 6x8 ft. with manual hoist;
(13) 8500 lbs. misc. metal work;
(14) 1 job head gate shelter;
(15) 70 yds. remove conc. from exist headgate station.
Specifications obtainable from the above office.

37— RAILROADS, SUBWAYS & TUNNELS

7/15/47 • 37
Owner Taking Bids—Due August 5
Tunnel
TOKETEE FALLS, Ore., Douglas Co. North Umpqua River about 40 miles east of Roseburg.
Owner—California-Oregon Power Co. John C. Boyle, Vice-president and General Mgr., 216 So. Main St., Medford, Ore.
Plans by Public Engineering Service Corp., 231 La Salle St., Chicago, Ill.
5600 to 6000-ft. reinf. concrete tunnel of 12-ft. diameter with concrete lining as 1st major phase of the company's originally estimated $4,000,000 hydro-electric program. Tunnel will have an inside diameter of 32-feet and lining with 2-inch concrete and reinforced with 1-inch hoop bars and ¾-inch long bars, will be timber framed and have gravel or rock aprawl packing. Paralleling the length of the tube at its base will be constructed a drain with 8 in. sewer pipe, open joint in gravel filter and tar paper cover. The diameter of the unlined tunnel will be 16-ft. 6-in. Major items will include common open cut excavation, open cut rock excavation, tunnel excavation in earth, installing permanent timbering, gravel or rock sprawl back packing, excav., for tunnel drain in rock, installation of tile drain pipe and gravel filter for tunnel drain.
Contractors should request plans and specifications of the owner prior to July 20.
A copy of the plans is on file for examination at the office of the Associated General Contractors, Multnomah Hotel, Portland, Ore.

38— ELECTRIC LIGHTING TRANSMISSION LINES

7/15/47 38
Contract Awarded
Traffic Signal Systems, Lighting Curbs Cost $53,945
DEL MAR, SOLANO BEACH, ENCINITAS, CARLSBAD and EL CAJON, Calif., San Diego County.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Furnish and install traffic actuated signal systems at six locations, furnishing and installing highway lighting at five of the locations and constructing curbs at three of the locations.
Contractor — Tri Cities Electrical Service, 1920 Moreno St., Oceanside, Calif.
The work includes:
(1) 110 cu. yds. remove concrete;
(2) 260 cu. yds. roadway excavation;
(3) 30 cu. yds. imported borrow;
(4) 155 tons plant mix surfacing;
(5) 32 cu. yds. portland cement concrete curbs;
(6) traffic actuated signal control system and highway lighting at intersection of Main St. and Magnolia Ave. in El Cajon;
(7) traffic actuated signal control system at intersection of Route 2 and 10th St. in Del Mar;
(8) traffic actuated signal control system and highway lighting at intersection of Route 2 and Plaza St. in Solana Beach;
(9) traffic actuated signal control system and highway lighting at intersection of Route 2 and E St. in Encinitas;
(10) traffic actuated signal control system and highway lighting at intersection of Route 2 and Elm St. in Carlsbad;
(11) traffic actuated signal control system and highway lighting at intersection of Route 2 and Grand Ave. in Carlsbad.
Total bids were:
(A) Tri-Cities Electric Service, $53,845.
(B) C. D. Draucker Co., $72,850.25.
(C) California Electric Works, $72,939.80.

Unit bids were:	(A)	(B)	(C)
(1).....	$29.00	$35.00	$42.00
(2).....	2.00	4.00	10.50

(11).....	7,670.00	10,900.00	10,541.00

7/15/47 38
Contract Awarded
Traffic Signal System Cost $20,825
LAGUNA BEACH, Calif., Orange Co. Coast Blvd. from Diamond St., to Myrtle St.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Furnish and install fixed time traffic signals at five intersections and reconstruct fixed time traffic signals at six intersections.
Contractor — Tri Cities Electrical Service, 1920 Morena St., Oceanside, Calif.
Other bidders were:
Electric & Machinery Service, Inc., $22,615.
R. E. Ziebarth, $24,950.
C. D. Draucker Co., $27,770.

7/15/47 38
Contract Awarded
Traffic Signal Systems Cost $44,770
POMONA, Calif., Los Angeles Co. 5th Ave. and Holt Ave. from Hamilton Blvd. to Reservoir St.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Furnish and install traffic signal system at 13 intersections and furnish and install modifications to existing traffic signal systems at three intersections.
Contractor — Prescott Electric & Mfg. Co., 4389 Radium Drive, Los Angeles, Calif.
Other bidders were:
H. B. Nicholson, $48,639.
Econolite Corp., $52,908.
C. D. Draucker, $53,450.

39— SEWERS

7/15/47 39
Hearing Set for Aug. 4, 8 P. M. on Tract Drainage, Etc.; Res. 47-8
SAN MATEO, Calif., San Mateo Co. Alley running parallel to El Camino Real between El Camino Real and Palm Ave. from Bell St. to a point approx. 830 ft. north of city limits.
Owner—City of San Mateo, Wm. J. O'Farrell, City Clerk, City Hall, San Mateo, Calif.
City Engineer—Arthur B. Sullivan, City Hall, San Mateo, Calif.
Includes grading, paving, reinf. concrete double box culvert 3 ft. x 4½ in. for drainage purposes, storm sewer pipe and appurtenant catch basins.

7/15/47 39
Contract Awarded
Irrigation System Cost $5,525
SAN FRANCISCO, Calif. Dolores St. center strip.
Owner—Park Commission of the City and County of San Francisco, Gerald J. Linarez, secretary, McLaren Lodge, Golden Gate Park, San Francisco, Calif.
Contractor — George Paulsen, 2922 25th Ave., San Francisco, Calif.

7/15/47 39
Preliminary Plans Submitted to City Council
Culverts
RENO, Nev., Washoe County.
Owner—City of Reno, T. L. Taylor, city clerk, City Hall, Reno, Nev.
City Engineer—E. C. Frisch, City Hall, Reno, Nev.
Reinforced concrete box culverts with some reinforced concrete pipe, including 800 ft. of culvert at Sullivan-Kelly ditch, $24,000; 240 ft. of culvert, Orr ditch, $7200, and 1025 ft. culvert at Cochran ditch, $30,750.

7/15/47 39
Contract Awarded
Trunk Line Sewer Cost $31,680.10
SACRAMENTO, Calif., Sacramento County. Along proposed 41st St. and Meister Way.
Owner—City of Sacramento, H. G. Denton, city clerk, City Hall, Sacramento, Calif.
City Engineer—Fred Klaus, City Hall, Sacramento, Calif.
Contractor—A. Teichert & Son, Box 1133, Sacramento, Calif.

7/15/47 39
Contract Awarded
Culvert (Contract)
ALAMEDA, Calif., Alameda County.
Owner—City of Alameda, J. P. Clark, city clerk, City Hall, Alameda, Calif.
City Engineer—Carl Froerer, City Hall, Alameda, Calif.
Construct culverts during fiscal year.
Contractor—Gallegher & Burk, 900 73rd Ave., Oakland, Calif.

7/15/47 39
Contract Awarded
Sanitary Sewers Cost $35,102
RENO, Nev., Washoe Co. Hill View Terrace Improvement District.
Owner—City of Reno, T. L. Taylor, City Clerk, City Hall, Reno, Nev.
City Engineer—E. C. Frisch, City Hall, Reno, Nev.
Contractor—George E. Schilling Engineering & Construction Co., 1227 D St., Sparks, Nev.

7/15/47 39
Contract Awarded
Sanitary Sewers Cost $16,754
RENO, Nev., Washoe County, Improvement District No. 1.
Owner—City of Reno, T. L. Taylor, city clerk, City Hall, Reno, Nev.
City Engineer—E. C. Frisch, City Hall, Reno, Nev.
Contractor—George E. Schilling Engineering & Construction Co., 1227 D St., Sparks, Nev.

7/15/47 39
Low and Only Bidders (Unit Prices) Sewers Cost $10,769.72
FRESNO, Calif., Fresno Co. Blackstone Ave. Tract No. 1 and Princeton Heights.
Owner—City of Fresno, D. E. Roughton, city clerk, City Hall, Fresno, Calif.
City Engineer—A. Segal, City Hall, Fresno, Calif.
Sanitary sewers.
Low Bidder—Kovick Bros., 145 W. Shields Ave., Fresno, Calif., $10,769.72.
The work involves:
(1) 3022 lin. ft. 8-in. concrete pipe;
(2) 2760 lin. ft. 6-in. concrete pipe;
(3) 12 masonry manholes with cast iron frames and covers;
(4) 9 lampholes and metal frames and covers;
(5) 148 lin. ft. 4-in. on 8-in. wye branches;
(6) 138 lin. ft. 4-in. on 6-in. wye branches;
The bids submitted July 10 were:
Kovick Bros., (1) $1.56, (2) $1.39, $2, (4) $1, (5) $130, (6) $25; total $10,709.72.
W. M. Lyles, (1) $1.65, (2) $1.50, (3) $2.50, (4) $2, (5) $145, (6) $35; total $11,827.30.
R. Goold & Son, (1) $2.32, (2) $2.16, (3) $2.86, (4) $1.82, (5) $201.50, (6) $35.75; total $16,386.63.
Engineer's estimate, $14,238

7/15/47 • 39
Contract Awarded
Storm Drain Cost $49,188.90
SANTA CLARA COUNTY, Calif. White Road and Hyland Ave., Road District No. 3.
Owner—County of Santa Clara, county clerk, Courthouse, San Jose, Calif.
County Surveyor—Robert D. Chandler, Courthouse, San Jose, Calif.
Contractors—A. J. Peters & Son, 410 N. 10th St., San Jose, Calif.
Total bids July 14 were:
A. J. Peters & Son, San Jose, Calif., $49,188.90.
McGuire & Hester, Oakland, Calif., $54,218.20.
Louis L. Ettinghoff, San Jose, Calif., $57,165.40.
Dan Caputo, San Jose, Calif., $61,228.75.
Surveyor's estimate, $54,956.
Unit prices will be given soon.

40— STREETS AND HIGHWAYS

7/15/47 40
Contract Awarded
Resurfacing Cost $15,015
ORANGE COUNTY, Calif. Between one mile south of Gilivan and 1.4 miles north of El Toro Road.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 6.1 miles gross lengths including 1 mile resurfacing existing pavement with plant mix surfacing, placing imported borrow on shoulders and applying bituminous surface treatment thereto and about 2.4 miles net length placing imported borrow on shoulders and applying bituminous surface treatment thereto.
Contractor —Jesse S. Smith, 444 E. Rose St., Glendale, Calif.
The work involves:
(1) 2000 tons imported borrow;
(2) 130 tons liquid asphalt SC-3 bituminous surface treatment;
(3) 24,000 sq. yds. prepare, mix and shape surface bituminous surface treatment;
(4) 950 tons plant mix surface;
(5) 5 tons asphalt paint binder.
Total bids were:
Jesse S. Smith (1) $2.80, (2) $15.50, (3) $.10, (4) $5, (5) $50; total $15,015.
Cox Bros. Construction Co., (1) $2.35, (2) $18, (3) $.17, (4) $5.80, (5) $55; total $16,905.
Sully-Miller Construction Co., (1) $1.80, (2) $25, (3) $.24, (4) $5.70, (5) $30; total $15,222.50.

7/15/47 40
Contract Awarded
Disassembly Plant and Storage Tank Access Roads; Spec. 1292
Cost $54,723
NEAR HERLONG, Calif., Lassen Co. Sierra Ordnance Depot.
Owner—U. S. Army Engineers, Wright Bldg., Sacramento, Calif.
Plans by engineering department of owner.
Contractor—H. W. Robertson, 2917 T St., Sacramento, Calif.

7/15/47 40
Low and Only Bidders (Unit Prices) Resurfacing Cost $247,143.70
LOS ANGELES, Calif., Los Angeles County. Arroyo Seco Parkway, between Bernard St. and Avenue 22.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 1.3 miles resurfacing with plant mix surfacing and widening portions with portlnad cement concrete and plant mix surfacing on portland cement concrete base.
Low Bidder—J. E. Haddock, Ltd., 3535 E. Foothill Blvd., Pasadena, Calif., $247,143.70.
Work involves:
(1) 650 c.y. remove concrete;
(2) clear and grubb;
(3) 35,000 c.y. rdwy. excav.;
(4) 2,500 c.y. struc. excav.;
(5) 4,000 c.y. imported top soil;
(6) 54,000 s.y. preparatory landscape treatment;
(7) 1,800 s.y. prepare Class C subgrade;
(8) develop water supply and furnish water equipment;
(9) 190 M. gals. apply water;
(10) finish rdwy.;
(11) 2 tons liq. asph. SC-2 prime coat
(12) 3,200 tons plant mix surf.;
(13) 30 tons asph. emulsion paint binder and curing seal;
(14) 400 c.y. Class B portland cement concrete pave. and base;
(15) 770 c.y. Class A oPrtland cement conc. struc.;
(16) 20 c.y. Class C portland cement conc. pipe reinf.;
(17) 230 c.y. Class A portland cement conc., surf. drain lining;
(18) 260 c.y. Class A portland cement conc. curbs, gutters and sidewalks;
(19) 450 each curb dowels;
(20) 10 c.y. rubble masonry;
(21) 270 lf. pipe handrail;
(22) 11,500 l.f. chain link fence;
(23) 8 each walk gates;
(24) 1 each drive gate;
(25) 6,500 l.f. remove and salvage exist. property fences;
(26) 500 l.f. reconstruct prop. fences;
(27) 30 l.f. 12-in. plain concrete pipe;
(28) 220 l.f. 15-in. plain do;
(29) 150 l.f. 6-in. standard strength vit. clay pipe sanitary sewer;
(30) 170 l.f. 8-inch do;
(31) 1 ea. manhole B sanitary sewer
(32) 1 each drop manhole F do;
(33) 15 each adjust manholes to gd;
(34) 8,500 lbs. bar reinf steel;
(35) 14,000 lbs. misc. iron and steel;
(36) 35 each sprinkler connections, sprinkling system;
(37) 130 each control assemblies, sprinkling system;
(38) 9,700 l.f. 3.4-in. galv. pipe nozzle line;
(39) 7,900 l.f. 1-inch do;
(40) 100 l.f. 1¼-inch do;
(41) 280 l.f. ¾-in. galv. ppie sprinkling system;
(42) 1,900 l.f. 1-inch do;
(43) 900 l.f. 1¼-inch do;
(44) 2,500 l.f. 1½-inch do;
(45) 5,300 l.f. 2-inch do;
(46) 2,800 l.f. 2½-inch do;
(47) 1,800 l.f. 3-inch do;
(48) 1,400 l.f. 4-inch do.
Total bids submitted July 10 were:
(A) J. E. Haddock, Ltd., $247,143.70.
(B) MacDonald & Kruse and Hensler Construction Corp., $288,996.
(C) Dimmitt & Taylor, $310,949.

FROZEN FOODS
put up at home
ARE DELICIOUS

BEST BUYS IN JULY AND AUGUST
• Figs
• Pears
• Apricots
• Peaches
• Plums
• Berries

IMAGINE eating fresh strawberries, or fresh peaches, or firm, fresh golden corn any time you wish during the blustery days of winter! You can do more than imagine. You can have them and many more out of season foods. That wonderful convenience of frozen foods has made this possible. You can buy them ready frozen. You can buy fresh fruits and vegetables when they are at their best and prices are lowest, and freeze and store them in your home for winter use. With the new home freezers, either the chest or upright type, freezing food is as simple as canning. Or you can pack and take foods to a freezing plant in your community for quick freezing. Frozen foods, when properly prepared, wrapped and sealed will keep fresh in appearance, flavor and food value from season to season. Right now, your dealer is displaying Home Freezers as a desirable home companion to the dependable refrigerator. Place your order now for early delivery.

There are two types of Home Freezers that both freeze and Store 1. UPRIGHT FREEZERS which open from the side, so that you reach into them as you do your refrigerator. 2. CHEST-TYPE FREEZERS are like a trunk and have either one compartment or several compartments so you can sort or file foods.

'War Housing Sale Would Add to Slum Conditions of Cities'

WASHINGTON— Raymond M. Foley, head of the national housing agency, has placed his objections to new legislation to force disposition of war housing by December 31, 1948, before the senate banking and currency committee.

The senate committee is considering the legislation which would order the sale of 400,000 public housing units during the next eighteen months. The house already has passed such a measure, introduced by Congressman James P. Wolcott of Michigan. Senators Harry P. Cain of Washington, and Richard B. Russell of Georgia are sponsoring the bill in the senate.

Foley based his objections principally on the "deadline" for sale of these units which he said was an unworkable arrangement. It would mean the sale of such housing at the rate of about 5,000 units per week, he said, objection also to the mandate in view of future market conditions.

He asked the senate committee to reject the measure which also establishes veterans' preference in the purchase of the war-built dwellings.

Telling the committee men that the market may not absorb this housing at the prices developing in the required time limit, Foley also stressed the temporary nature of much of this type of building.

He described these dwelling types as "completely unsatisfactory" as permanent additions to communities in which they are located. He reminded the senators that they were built with the understanding that they would be torn down, not left to add to slum conditions. Many, he said, are not even up to minimum building code requirements.

On the question or veteran preference, Foley feels that the present policy of offering the units to occupants first—veteran or non-veteran—is superior to the congressional plan to place all veterans in a preferential position whether they are occupants or not. The change, Foley said, would increase the number of evictions dangerously.

Veterans pressures on congress are for the change in policy as carried in the Wolcott and Cain bills.

#

CONGRESS EXTENDS EXPORT CONTROLS

WASHINGTON.— Senate and house conferees have agreed on and passed a war powers extension bill which continues controls over some scarce commodities until March 1, 1948. Export controls are retained on 307 different items including steel mill products. Allocation controls apply to in anc antimony.

The Secretary of Commerce will which government is given priority controls over the export of materials.

#

NAREB, BPI FAVOR CAIN-RUSSELL BILL

WASHINGTON—The National Association of Real Estate Boards and the Building Products Institute have both endorsed the Cain-Russell bill in statements filed with the senate banking and currency committee, which is holding hearings on the legislation.

The Cain-Russell bill (S-1459) provides that war housing shall be sold through federal works agency, with occupying veterans having first chance and non-occupying veterans second priority.

ROCKWELL REC BILL OKAYED IN HOUSE

WASHINGTON. — The public lands committee of the house has approved a modified version of H. R. 2873, the Rockwell measure on reclamation.

As approved by the committee, the bill provides for the collection of two and one-half per cent interest on power investments, instead of the present three per cent. Of the new amount, two per cent will be handled as interest and one-half of one per cent as fiscal aid to irrigatinn projects.

The bill also extends the repayment period for reclamation projects to 78 years from the present 50 years.

(61) 900 cu yds concr in tailrace training wall;
(62) 30 cu yds concr in blockouts;
(63) 420 cu yds concr in parapet and curb;
(64) 180 sq yds chipping and roughening concrete surfaces;
(65) 1750 sq yds placing bonded concrete floor finish;
(66) 300 lin ft placing cement cove wall base;
(67) 97,000 lbs furnishing reinforcement bars, 1-in diameter and larger;
(68) 134,000 lbs furnishing reinforcement bars, 5/8-in diam to 7/8-in diam, inclusive.
(69) 6000 lbs same, ½-in diam and smaller;
(70) 2,230,000 lbs placing reinforcement bars, 1-in diam and larger;
(71) 1,027,000 lbs place reinf. bars, 5/8-in diam to 7/8-in diam, inclusive;
(72) 94,000 lbs place reinf bars, ½-in diam and smaller;
(73) insulating 300 intersections of reinforcement bars and electrical metal conduit intersections;
(74) 4700 sq ft furn and place joint filler;
(75) 150 sq ft placing rubber water stops;
(76) 2450 lbs furn and place metal sealing strips;
(77) 400 lin ft constructing control joints;
(78) finishing 5 lighting recesses;
(79) 4500 sq ft furn and place membrane waterproofing;
(80) 4200 sq yds furn and apply bituminous dampproofing;
(81) 5300 sq yds furn and apply clear dampproofing;
(82) 9800 sq ft furnish and place roofing;
(83) 1260 sq ft furnish and install glass block panels;
(84) 1700 ft bm furnish and install wood framing for partitions;
(85) 300 sq yds furnish and install metal lath and plaster for partitions;
(86) 85 sq yds furnish and install suspended metal lath and plaster ceilings;
(87) 1100 sq ft furnish and install suspended acoustical unit ceiling;
(88) 3000 lbs install metal inserts;
(89) 1100 lbs install metal louvers;
(90) 900 sq ft install metal accordion doors;
(91) 720 sq ft install metal swinging doors;
(92) 90 sq ft install metal fire doors;
(93) 1100 sq ft furnish and install metal sash windows;
(94) 92,400 lbs install bulkhead gate tracks and guides;
(95) 30,000 lbs install bulkhead gates;
(96) 140,000 lbs install cranes and hoists;
(97) 173,000 lbs install radial gates;
(98) 240,000 lbs install radial gate hoists;
(99) 260,000 lbs install trashrack metal work;
(100) 514,600 lbs install ring seal and ring follower gates;
(101) 4000 lbs install control apparatus and piping for ring seal and ring follower gates;
(102) 56,000 lbs install hollow jet valves;
(103) 467,300 lbs install penstocks and steel pipes;
(104) 440,000 lbs install surge tanks;
(105) 2100 cubic feet structural steel in power plant and outlet works bridge;
(106) 26,000 lbs install pipe handrails;
(107) 82,000 lbs install metal pipes, fittings, and valves, less than 6 in in diam;
(108) 87,000 lbs install metal pipes, fittings, and valves, 6 in in diam and larger;
(109) 5600 lbs install metal stairs;
(110) 15,000 lbs install oil storage tanks;
(111) 15,000 lbs install water storage tanks;
(112) 25,000 lbs crane install crane runway and transformer track rails on concrete;
(113) 8000 lbs install pumps and eductors;
(114) 4400 lbs install embedded metal frames for openings in dam and walls;
(115) 15,000 lbs install misc metalwork;
(116) 2000 lbs install ice prevention air system;
(117) 3000 lbs install ventilating system;
(118) 2200 lbs plumbing fixtures and appurtenances and heaters;
(119) 460 lin ft install embedded electrical nonmetallic conduit;
(120) 17,650 lin ft install embedded electrical conduit, 1-1/4-in or less in diam;
(121) 7300 lin ft install embedded electrical conduit, 1½ in or more in diam;
(122) 2700 lbs install embedded ground wire and ground rods;
(123) 500 tons transporting of freight of all kinds for the government or its agents, other than the contractor, between the railroad and the dam site.

SCHEDULE—PART 2
Relocation of Chicago, Burlington, and Quincy Railroad
(124) 2,305,100 cu yds excav, all classes, for roadway;
(125) 35,802,000 sta cu yds overhaul;
(126) 5550 M gallons watering;
(127) 1350 roller hours of embankment;
(128) 44,010 cu yds excav, all classes, for structures;
(129) 106,265 cu yds backfill;
(130) 100,395 cu yds compacting backfill;
(131) 48,690 cu yds riprap;
(132) 320 sq yds dry-rock paving;
(133) 285 sq yds grouted paving;
(134) 140,000 cu yds excav, all classes, in tunnel and shaft;
(135) 724,300 lbs furnish and install permanent steel tunnel supports;
(136) 21 M bm furnish and erect permanent timbering in tunnel;
(137) 3230 lin ft drill holes for anchor bars and grouting bars in place;
(138) 159,500 lbs furnish and place grout pipe and fittings;
(139) 100,900 lin ft drill grout holes 12 ft deep;
(140) 150,700 cu ft pressure grouting;
(141) 60 lin ft lay 12-in diam concr pipe;
(142) 462 lin ft 24-in same;
(143) 470 lin ft 36-in same;
(144) 238 lin ft 48-in same;
(145) 353 lin ft 60-in same;
(146) 16 lin ft 72-in same;
(147) 702 lin ft 30-in diam corrugated metal pipe;
(148) 1168 lin ft lay 36-in diam cast iron pipe;
(149) 70 lin ft 30-in same;
(150) 90 lin ft 42-in same;
(151) 1062 lin ft 48-in same;
(152) 324 lin ft 60-in same;
(153) 31,510 cu yds concrete in tunnel and shaft;
(154) 3140 cu yds concr in tunnel invert;
(155) 740 cu yds concr in tunnel portals;
(156) 5100 cu yds concr in tunnel cutand-cover section;
(157) 560 cu yds concr in tunnel cutand-cover section substructures;
(158) 520 cu yds concr in tunnel ventilating fanhouses;
(159) 5630 cu yds concr in bridge abutments and piers;
(160) 1550 cu yds concr in culverts;
(161) 1,928,800 lbs furnish reinforcement bars, 1-in diam and larger;
(162) 783,200 lbs furnish reinf bars, 5/8-in diam to 7/8-in diam, inclusive;
(163) 92,700 lbs furnish reinf bars, ½-in diam and smaller;
(164) 3,957,600 lbs place reinf bars, 1-in diam and larger;
(165) 1,470,000 lbs placing reinf bars, 5/8-in diam to 7/8-in diam, inclusive;
(166) 165,400 lbs place reinf bars, ½-in diam and smaller;
(167) 181,460 lbs furnish and install metal stops in joints;
(168) 1360 sq yds special finishing of concrete surfaces;
(169) 38,300 sq ft furnish and place membrane waterproofing (2-ply);
(170) 17,700 sq ft furnish and place membrane waterproofing (4-ply);
(171) 70,300 sq ft furnish and place asphalt plank protective cover;
(172) 8400 lin ft drive steel piles;
(173) 15,720 lin ft manufacturing and driving concrete piles;
(174) 2250 lin ft furnish and install cast iron pipe;
(175) 21.83 miles construct right-of-way fence;
(176) 4 metal fence gates, install;
(177) 6 scrap angle cattle guards, construct;
(178) 10 M bm furnish and construct highway crossing and motor car setoffs;
(179) 1570 lin ft install electrical metal conduits, 1-1/4 in or less in diam;
(180) 29,160 lin ft install electrical metal conduits, 1½ in or more in diam;
(181) 2800 lbs install electrical ground wires;
(182) 1720 lbs install frames for openings in walls and floors;
(183) 2500 lin ft erect wire cable guard fence;
(184) 2000 tons crusher run base;
(185) 16 tons furnish and apply liquid-asphalt prime coat;
(186) 1908 tons gravel for oil-treated gravel surfacing;
(187) 63 tons furnish and apply liquid asphalt for oil treated gravel surf;
(188) 16 tons furnish and apply liquid asphalt for seal coat;
(189) 135 tons stone chips for seal coat;
(200) 73 stations finish 100 ft of roadway of highway.

Plans and specifications available at the Bureau of Reclamation offices without charge to prospective bidders. A charge of $7 is required of all others.

7/15/47 34
Owner Taking Bids—Due July 18, 1 P. M.—Bidders Figuring Repair North Breakwater; Serial 47-76
MORRO BAY, Calif., San Luis Obispo County.
Owner—Los Angeles District Corps of Engineers, War Department, 751 S. Figueroa St., Los Angeles, Calif.
Plans by engineering department of owner.
Specifications obtainable from the above office.
Following contractors have taken out plans:
Guy F. Atkinson Co., 22233 S. Santa Fe Ave., P. O. Box 259, Long Beach, Calif.
Connelly-Case-Kiewit, P. O. Box 1251, Long Beach, Calif.
Construction Engineering Corp., 2801 W. Mission Rd., Alhambra, Calif.
General Construction Co., Box 900, Watsonville, Calif.
A. Teichert & Son, Box 1133, Sacramento, Calif.
Columbia Construction Co., Route 1, Box 650, Fontana, Calif.
Dinsmore & McCoy, 909 Carpenteria St., Santa Barbara, Calif.
Plombo Construction Co., 1571 Turk St., San Francisco, Calif.
Healy & Tibbitts Construction Co., 411 Brannan St., San Francisco, Calif.

7/15/47 34
Low and Only Bidders Dredging Cost $183,825
COOS BAY, Ore.
Owner—Portland District Corps of Engineers, War Department, Portland, Ore.
Plans by engineering department of owner.
Dredging a 300-ft. wide channel, including (1) 570,000 cu. yds. dredging and disposal of material; (2) 150,000 cu. yds. dredging and disposing of material in overdepth.
Low Bidder—General Construction Co., 4850 NW. Front St., Portland, Ore., $183,825.
Complete bids were:
General Construction Co., (1) $0.285; (2) $0.315; total, $183,825.
Port of Astoria, (1) $0.30; (2) $0.15; total, $193,500.
Puget Sound Bridge & Engineering Co., (1) $0.42; (2) $0.21; total, $270,900.

7/15/47 34
Preliminary Surveys in Progress Water Storage Reservoir
MARIN COUNTY, Calif. Bon Tempe Dam, between Alpine and Lagunitas Canyons.
Owner—Marin Municipal Water District, James S. Peters, general manager; Lloyd Lucks, chief engineer; B. J. Bruzatori, secretary, 874 4th St., San Rafael, Calif.
Plans by engineering department of owner.
300 ft. wide at the base, between 60 and 70 ft. in height and 900 ft. long at the crest; slope from 2 or 2½ to 1.

7/15/47 34
Bids Rejected Dredger Sand Fill
OAKLAND, Calif., Alameda County
At the San Francisco-Oakland Bay Bridge Toll Plaza.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 0.6 mile constructing dredger sand fill.
As previously reported, San Francisco Bridge Co., 503 Market St., San Francisco, Calif., at $587,206 submitted the low bid June 25.

7/15/47 34
Final Engineering Report Completed —Bond Election in Amount of $400,000 Set for Aug. 6
Llagas Creek Dam
SANTA CLARA COUNTY, Calif.
Llagas Creek near Morgan Hill about 2 miles west of Highway 101 and 300 yards north of the Lane Cut-Off Road.
Owner—South Santa Clara Valley Water Conservation District, Dr. Elmer L. Cheebro, president, 64 5th St., Gilroy, Calif.; Phil Cox, secretary, Thomas Hunter, Odilla D. Knepper, Mark Smith and George Wolfe, members of board.
District Engineer—Blackie & Wood, 544 Market St., San Francisco, Cal.
Dirt fill with upstream side faced with 4 inches of concrete; approximately 65 ft. high, 550 ft. long and 300 ft. thick, with reservoir, behind it covering 238 acres, with capacity to store approximately 4000 acreage feet of water.

7/15/47 34
Bids Rejected
Dredging; Serial No. 04-203-47-80
MOSS LANDING, Calif., Monterey County, Moss Landing Harbor.
Owner—San Francisco District Corps of Engineers, 74 New Monigomery St., San Francisco, Calif.
Plans by owner.
Dredging the entrance channel to a depth of 15 feet below mean lower low water (plus 1 foot allowable overdepth); channel is 200 feet wide on the bottom and the area to be dredged is approximately 1800 feet long.
Work involves 117,300 cu. yds. dredging and disposing of material.
As previously reported, Johnson-Western Co., Box 416, Alameda, Cal. at $54,784, submitted the low bid May 20.

35— DOCKS, PIERS & HARBORS

7/15/47 35
Dredging Application Approved By Board of Supervisors
Yacht Harbor Cost $100,000
NEAR PORT CHICAGO, Calif., Contra Costa County. 99-acre site at McAvoy.
Owners—Russell S. Harris, 323 Ramona Ave., Piedmont; Marshall C. Harris, 1401 Willard, San Francisco, and Rolland and Warren Harris.
Harbor having a berthing capacity of 1000 boats including dredging to a 100-foot-wide access channel 10-ft. in depth at mean low tide and dredging two slip areas to have capacity of 150 boats with final plans calling for 9 slips.
Contractor (Dredging) — American Dredging Co., 1419 Broadway, Oakland, Calif.

36— PARKS, AIRPORTS & PLAYGROUNDS

7/15/47 36
Owner Taking Bids—Due July 28, 1:30 P. M.
Light Runways; Pro. 6-47-670
MILFORD, Utah.
Owner—Civil Aeronautics Admin., 5651 W. Manchester Ave., L. A., Calif.
Plans by owner.
Light runway, rewire beacon, install engine generator, etc.
Specs. obtainable from above office after July 14.

7/15/47 36
Contract Awarded
Park Improvements Cost $41,260.30
MONTEREY COUNTY, Calif. Pfeiffer Big Sur State Park.
Owner—State of California, Division of Water Resources, Room 401, Public Works Bldg., Sacramento, Calif.
State Engineer—Edward Hyatt, Public Works Bldg., Sacramento, Calif.
Contractor—Granite Construction Co., Box 900, Watsonville, Calif.

7/15/47 36
Master Plan on File
Buchanan Field Development Cost $1,177,640
MARTINEZ, Calif., Contra Costa Co.
Owner — County of Contra Costa, county clerk, Hall of Records, Martinez, Calif.
Engineer — Western Engineers, Inc., 70 Post St., San Francisco, Calif.
Includes construction of a third east-west runway, 60-acre recreation area to contain a swimming pool, tennis courts, picnic grounds and parking area, administration headquarters and one or more auxiliary landing strips.

7/15/47 36
Low and Only Bidders Tennis Court Surfacing Cost $6,999.31
STOCKTON, Calif., San Joaquin Co.
Oak Park tennis courts.
Owner—City of Stockton, B. L. Trahern, city clerk, City Hall, Stockton, Calif.
City Engineer — Lyle Payton, City Hall, Stockton, Calif.
Portland cement concrete surface.
Low Bidder — Stockton Construction Co., Box 2087, Stockton, Calif., $6999.21.
Donald S. Johnson, Stockton, Calif., at $7422.80, submitted only other bid July 7.

7/15/47 36
Contemplated Swimming Pool Cost $40,000
ELKO, Nev., Elko County. City Park.
Owner—City of Elko, Mayor David Dotta; City Manager Allen Carter, City Hall, Elko, Nev.

37— RAILROADS, SUBWAYS & TUNNELS

7/15/47 37
Owner Will Ask Bids About Sept. 15
Tunnel, Canal and Lateral
RIVERTON PROJECT, Wyo. Wyoming Canal in Central Wyoming.
Owner—U. S. Bureau of Reclamation, Denver, Colo.
Plans by engrg. dept. of owner.
Muddy Ridge tunnel on Wyoming Canal and extensions and sections of Canal from Station 1000 to south portal of tunnel and construction of one lateral.

7/15/47 37
Low and Only Bidders (Unit Prices)
Duchesne Tunnel; Spec. 1809
PROVO RIVER PROJECT, Utah. 24 miles east of Heber.
Owner—U. S. Bureau of Reclamation, Provo, Utah.
Plans by owner.
Station 5 plus 10 to station 199 plus 48; 750 days completion time.
Low Bidder—Utah Construction Co., 57 E. 4th St., Salt Lake City, Utah, $2,539,250.

The work involves:
(1) 140 cu. yds. excavation, common, in open cut;
(2) 840 cu. yds. excavation, rock, in open cut;
(3) 77,000 cu. yds. excavation, all classes, in tunnel;
(4) furnishing and installing 945,000 lbs. of permanent steel-rib tunnel supports;
(5) furnishing and erecting 500 M bm. of permanent timbering in tunnel;
(6) drilling 1000 lin. ft. of grout holes not more than 10 ft. deep;
(7) placing 500 lbs. of grout pipes and connections;
(8) 2000 cu. ft. of pressure grouting.

Total bids June 26 were:
(A) Utah Construction Co., $2,539,250.
(B) Arundel Corp. and L. E. Dixon Co., Baltimore, Md., $2,684,710.

Unit bids were:

	(A)	(B)
(1)	$ 5.00	$ 3.00
(2)	5.00	6.00
(3)	28.80	32.50
(4)	.20	.10
(5)	240.00	150.00
(6)	1.50	2.00
(7)	.50	.50
(8)	3.00	2.50

38— ELECTRIC LIGHTING TRANSMISSION LINES

7/15/47 33
Owner Will Ask Bids This Month—To Be Opened in August
Reconstruct Bridge
TACOMA, Wash. Tacoma Narrows bridge.
Owner—State of Washington, Washington Toll Bridge Authority, 2210 6th Ave., Tacoma, Wash.
Principal Engineer—Charles E. Andrews, Washington Toll Bridge Authority, Tacoma, Wash.
Center span 500 ft. long, flanked by end spans each 100 ft. long; structural steel towers 40 ft. higher in elevation than towers on original bridge to carry suspension cable of 21-in. diameter (old structure 19-in. diameter), cables to be 60 ft. apart instead of 38 ft., and support deck, which is 46 ft. between curbs with 5-ft. 10-in. sidewalk on each side, providing for four lanes of traffic, separated by roadway slots made of open grid floor.

7/15/47 38
Owner Will Ask Bids About Aug. 1
Transmission Lines
DAVIS DAM PROJECT, Ariz.-Nev. From Davis Dam to Parker Dam.
Owner—U. S. Bureau of Reclamation, Denver, Colo.
Plans by engrg. dept. of owner.
33 miles of 230 kv. transmission lines including steel structures and towers.

7/15/47 38
Owner Will Ask Bids About August 1
Transmission Lines
CENTRAL VALLEY PROJECT, Calif.
Owner—U. S. Bureau of Reclamation, Denver, Colo.
Plans by engrg. dept. of owner.
Delta-Contra Costa-Clayton and Ygnacio 60-kv. transmission lines including 38 miles of single wood pole and 9 miles of 2.3 kv. underbuild.

7/15/47 38
Owner Will Ask Bids About Aug. 15
Transmission Line
DAVIS DAM PROJECT, Ariz.-Nev. From Coolidge Dam to Substation BDS near Eloy, Ariz.
Owner—U. S. Bureau of Reclamation, Denver, Colo.
Plans by engrg. dept. of owner.
Includes construction of 115-kv. transmission, wood poles, overhead ground wires.

7/15/47 38
Owner Will Ask Bids About Aug. 1
Transmission Lines
CENTRAL VALLEY PROJECT, Ariz.-Nev. Vicinity of Yuma, Ariz.
Owner—U. S. Bureau of Reclamation, Denver, Colo.
Plans by engrg. dept. of owner.
25 miles of line, transmission lines, 34.5 kv., wood poles

7/15/47 38
Contract Awarded
Flagpole and Appurtenances Cost $12,447
SAN MATEO COUNTY, Calif. San Francisco Airport; Contract No. 97.
Owner—City and County of San Francisco, Public Utilities Commission, 207 City Hall, San Francisco, Calif.
Plans by engineering department of owner.
Includes (a) earth fill from ground level to steps, using surplus excavation; backfill; (c) concrete foundation, steps, dais and backing for cast stone; (d) cast stone facing; (e) flagpole and accessories; (f) bronze frame and doors; (g) painting of metal.
Contractor—Adam Arras & Sons, 116 New Montgomery St., San Francisco, Calif.

7/15/47 38
Contract Awarded
Street Lighting System; Spec. 32 Cost $15,726
SAN FRANCISCO, Calif. Lyon St. from Lombard St. to Bay St.; Baker St. from Lombard St. to Marina Blvd., and Lombard St. from Lyon St. to Broderick St.
Owner—City and County of San Francisco, Public Utilities Commission, Room 297 City Hall, San Francisco, Calif.
Plans by owner.
Contractor—H. C. Reid Co., 389 Clementina St., San Francisco.

7/15/47 38
Contract Awarded
Underground Electric Ducts, Etc. Cost, $29,854
BERKELEY, Calif., Alameda County.
Vicinity of Agriculture Hall, Berkeley Campus.
Owner—Regents of the University of California, Berkeley, Calif.
Plans by owner.
Approximately 1950 ft. underground electric ducts and manholes.
Contractor—T. L. Rosenberg Co., 372 5th St., Oakland, Calif.

7/15/47 38
Survey in Progress—Owner Will Ask Bids in Two or Three Months
Electric Lines Cost $600,000
WHITE SALMON, Wash., Klickitat Wash.
Owner—Public Utilities District No. 1, Emmet E. Clouse, manager, White Salmon, Wash.
Engineer—Howard Zenler & Associates, Box 576, White Salmon, Wash.
350 miles of lines of which 60 miles will be 33-kv. transmission.

7/15/47 38
Bond Election Contemplated Bail Park Lighting Cost $25,000
REDDING, Calif., Shasta County.
Owner—City of Redding, Mayor Roscoe J. Anderson, City Manager Phil Storm, City Hall, Redding, Calif.
City Engineer—William Green, City Hall, Redding, Calif.

7/15/47
Contemplated Hydroelectric Power Plants, Etc.
OWENS RIVER GORGE, Calif., Los Angeles County.
Owner—Los Angeles Board of Water & Power Commissioners, 207 S. Broadway, Los Angeles, Calif.
Plans by engineering department of owner.
Includes three hydroelectric power plants, each to contain a single turbo-generator unit rated at 7500-kilowatt capacity; cost, $27,362,000; and 230,000-volt transmission line, etc., $13,164,000.

7/15/47 38
Owner Taking Bids—Due July 23, 10 a. M. (Postponed From July 15)
RIO GRANDE PROJECT, New Mexico-Texas Elephant Butte-Caballo 115-kilovolt transmission line, Sierra and Socorro Counties.
OwnerU. S. Bureau of Reclamation, Customs House, Denver, Colo.
Plans by engineering department of owner.
115,000-volt, 3-phase, 60-cycle single-circuit wood-pole H-frame type transmission line; 326 days completion time.
Specifications, obtainable from the above office; no charge to prospective bidders; to others, $2.25, not returnable.

7/15/47 38
Owner Will Ask Bids About July 21 Transmission Line
MISSOURI BASIN PROJECT, Nebr. Gering to Sidney in Southwest Nebraska.
Owner—U. S. Bureau of Reclamation, Denver, Colo.
Plans by engrg. dept. of owner.
80 miles of 115-kv. transmission line; wood poles, 3-phase single-circuit 400 days completion time.

7/15/47 38
Low and Only Bidders Instrument Landing System and Light Lane; Pro. 6-47-583 Cost $25,186
FRESNO, Calif., Fresno County, Municipal Airport (Hammer Field).
Owner—Department of Commerce, Aeronautics Administration, 5651 W. Manchester Ave., Los Angeles 45, Calif.
Plans by owner.
Low Bidder—Kashner-Bender, Inc., 704 S. Spring St., Los Angeles, Calif.
Complete bids submitted (June 26 were:
Kashner - Bender, (1) $21,

Walnut Creek, Calif.
City Engineer—Joseph Bronson, City Hall, Walnut Creek, Calif.
Specifications obtainable from the office of the city engineer.

7/15/47 39
No Bids Submitted July 9—Owner Will Ask New Bids Soon
Elm Court Sewers Cost $40,000
ROSEVILLE, Calif., Placer County.
Owner—City of Roseville, Acting Mayor Charles Cope; R. W. Terry, city clerk, City Hall, Roseville, Calif.
Civil Engineer—Frank Packard, 312 Lincoln St., Roseville, Calif.

7/15/47 39
Plans in Progress
Sewer Lines, Booster Pump and Outfall Lines Cost $140,800
VISALIA, Calif., Tulare County.
Owner—City of Visalia, E. A. Dunn, city manager, City Hall, Visalia, Calif.
City Engineer—N. A. Huth, City Hall, Visalia, Calif.
Consulting Engineer—Quinton Engineers, Ltd., 816 S. Figueroa St., Los Angeles, Calif.
Includes Divisadero and Tulare Ave. relief lines, $54,500; booster pump, $9000, and 8000-ft. long outfall line, $86,000.

7/15/47 39
Low and Only Bidders
Long Beach Interceptor Trunk Sewer, Unit 2, Etc.
LONG BEACH, Calif., Los Angeles County. From east side of Los Angeles River at 16th St. to Loma Vista Dr.
Owner—Los Angeles County Sanitation District No. 3, 3rd floor, 1206 Maple Ave., Los Angeles, Calif.
Plans by engineering department of owner.
Interceptor trunk sewer and pump district No. 5 connection trunk sewer.
Low Bidder—Tom L. Gogo, 10,024 S. Figueroa St., Los Angeles, Calif., $177,114 (centrifugal pipe) and $176,510.60 (precast pipe).
Other bids July 9 were:
Martin Construction Co., $176,543.60 (precast pipe).
Artukovich Bros., $185,472.66 (centrifugal pipe), and $184,872.26 (precast pipe).
Steve Rados, $201,582 (centrifugal pipe), and $198,580 (precast).
Raymond Concrete Pipe Co., $275,751.16 (centrifugal pipe).

7/15/47 39
Contract Awarded
Trunk Sewer Cost $268,967.15
LOS ANGELES, Calif., Los Angeles County. Unit No. 1, Section 4, of joint outfall "B" trunk sewer.
Owner—Los Angeles County Sanitation District No. 2, 3rd floor, 1206 Maple Ave., Los Angeles, Calif.
Plans by engineering department of owner.
Contractor—P. & J. Artukovich, 13305 S. San Pedro St., Los Angeles, Calif.

7/15/47 40
Plans in Progress
Hill Ave. Improvement; Res. 3749
WATSONVILLE, Calif., Santa Cruz Co. Hill Ave. between Tuttle Ave. and Palm Ave., etc.
Owner—City of Watsonville, F. J. O'Brien, City Clerk, City Hall, Watsonville, Calif.
City Engineer—H. B. Kitchen, City Hall, Watsonville, Calif.
Includes grading, cement concrete curbs and gutters, waterbound rock macadam base pavement with asphaltic concrete wearing surface.

7/15/47 40
Contract Awarded Cost $36,158
Grading
COLUSA, Calif., Colusa Co. 44th Agricultural District.
Owner—State of California, Division of Architecture, Public Works Bldg., Sacramento, Calif.
State Architect—Anson Boyd, Public Works Bldg., Sacramento, Calif.
Contractor—Tyson & Watters, 1201 10th Ave., Sacramento, Calif.

7/15/47 40
Contract Awarded and Box Culvert Grading, Surfacing and Box Culvert Cost, $243,377.40
TRINITY COUNTY, Calif. Between Route 20 in Weaverville and Browns Mountain and at East Weaver Creek.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 6.3 miles grading and surfacing with crusher run base (II-Tri-1089) and about 0.2 mile grading and surfacing with road-mix surfacing on crusher run base and constructing a reinforced concrete box culvert (II-Tri-20A).
Contractor—N. M. Ball & Sons, P. O. Box 430, Berkeley, Calif.

7/15/47 40
Contract Awarded Cost $235,857
Grading and Surfacing
SAN MATEO COUNTY, Calif. At Canada Road between 2.5 miles north of Woodside and Ralston Avenue.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engr.—G. T. McCoy, Public Works Bldg., Sacramento.
About 4.7 miles grading and surfacing with crusher run base and applying armor coat.
Contractor—Edward Keeble, Route 4, Box 361, Tully Rd., San Jose, Calif.

7/15/47 40
Contract Awarded
Grading and Surfacing Cost, $106,379.95
SACRAMENTO COUNTY, Calif. Marconi Ave. between Howe Ave. and Fair Oaks Blvd.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 4.7 miles grading and constructing crusher run base and applying plant-mix surfacing, armor coat and penetration oil treatment.
Contractor—McGillivray Constr. Co., Box 573, Sacramento, Calif.

7/15/47 40
Contract Awarded
Seal Coat Cost $35,760
TEHAMA, PLUMAS and LASSEN COUNTIES, Calif. Between south boundary of Lassen National Park and Westwood.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 29.9 miles applying seal coat.
Contractor—Clemente & Co., P. O. Box 277, Hayward, Calif.

7/15/47 40
Contract Awarded
Seal Coat Cost $44,788
NEVADA, PLACER and EL DORADO COUNTIES, Calif. Various locations in District III.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Net distance of 42.4 mile applying seal coat.
Contractor—Granite Construction Co., Box 900, Watsonville, Calif.

7/15/47 40
Contract Awarded
Paving; Spec. 954 Cost $58,055
SAN FRANCISCO, Calif.
Owner—City and County of San Francisco, Public Utilities Commission, Room 287, City Hall, San Francisco, Calif.
Plans by engineering department of owner.
Repaving of street or sidewalk openings where paving has been removed by the San Francisco Water Dept. for fiscal year ending June 30.
Contractor—Pacific Pavements Co., Ltd., 85 Barstow St., San Francisco, Calif.

7/15/47 40
Award Recommended to Low Bidder Rerouting Fremont Street
Cost $10,687.24
STOCKTON, Calif., San Joaquin Co. From Commerce to El Dorado St., across McLeod's Lake fill.
Owner—City of Stockton, B. L. Trahern, city clerk, City Hall, Stockton, Calif.
City Engineer—Lyle Payton, City Hall, Stockton, Calif.
Low Bidder—M. J. B. Construction Co., 322 Elks' Bldg., Stockton, Calif.

7/15/47 40
Hearing Set for July 25, 8 P. M.
Alley Improvement; Res. 2629
SACRAMENTO, Calif., Sacramento County. Alley between X St. and Broadway from 73th to 14th St.
Owner—City of Sacramento, H. G. Denton, city clerk, City Hall, Sacramento, Calif.
City Engineer—Fred Klaus, City Hall, Sacramento, Calif.
Includes sewer line, grading, a hydraulic concrete pavement 6 inches thick.

7/15/47 40
Owner Will Ask Bids This Month—To Be Opened in August
Paving
RENO, Nev., Washoe County.
Owner—City of Reno, T. L. Taylor, city clerk, City Hall, Reno, Nev.
City Engineer—Edward C. Frisch, City Hall, Reno, Nev.
Asphalt street paving.

Owner Will Ask Bids This Month—To Be Opened in August
Curbs, Gutters, Etc.
RENO, Nev., Washoe County.
Owner—City of Reno, T. L. Taylor, city clerk, City Hall, Reno, Nev.
City Engineer—Edward C. Frisch, City Hall, Reno, Nev.
Installation of concrete curbs, gutters and alley surfaces.

7/15/47 40
Owner Taking Bids—Due July 29, 10 A. M.
Grading, Surfacing, Bridge
STATE OF WASHINGTON.
Owner—State of Washington, Clarence B. Shain, director of highways, Olympia, Wash.
Plans by engineering department of owner.
Projects include:

California Tramrail Co.
1922 Addison Street
Berkeley 4, Calif.
Phone ASherry 5238
Complete Installations
Cranes, Hoists, Monorails, Jib Cranes, Gantry Cranes, Electric Cranes, Enclosed Safety Conductors, Trolleys

(1) Clearing, grubbing, grading, draining and surfacing 0.335 miles of S.S.H. No. 1-T, Vancouver Lake vicinity, F.A.S. Nos. S-35 (3 and SG-35 (2), Unit 1, in Clark County, involving about 2.4 acres of clearing, 1.9 acres of grubbing, 24,600 cu. yds. of common excavation, 90,970 cu. yds. of borrow for roadway embankments, 500 cu. yds. of gravel backfill, 880 cu. yds. of crushed stone surfacing, 2020 cu. yds. of ballast, 115 cu. yds. of concrete, 19,920 lbs. of steel reinforcing bars, 1478 lin. ft. of beam guard rail, lump sum removing existing highway bridge, 608 lin. ft. of culvert pipe and other items.
(2) Clearing, grubbing and grading on 0.633 mile of Kitsap County road project, Point White-Pleasant Beach Road, F.A.S. No. S-94 (1), involving about 0.5 acre of clearing, 0.5 acre of grubbing, 8576 cu. yds. of unclassified excavation, 3890 cu. yds. of loose riprap, 564 lin. ft. of culvert pipe and other items.
(3) Constructing reinforced concrete flat slab bridge, Corbett Creek bridge on S.S.H. No. 4-C, F.A.S. No. S-39 (1), in Lincoln County, involving about 410 cu. yds. of bridge structure excavation, 234 cu. yds. of concrete, 29,000 lbs. of reinforcing steel bars, 194 lin. ft. of beam guard rail and other items.
(4) Producing and stockpiling of crushed stone surfacing, sand and mineral aggregates, P.S.H. No. 2, Hyak vicinity, and P.S.H. No. 3, Walla Walla vicinity and Alpowa, Asotin, Kittitas, Walla Walla and Garfield counties, a state project, involving about 1000 cu. yds. of crushed stone surfacing, 500 cu. yds. of sand, 1st, 300 cu. yds. of crushed mineral aggregate for non-skid single seal and 3000 cu. yds. of crushed mineral aggregate for asphaltic concrete pavement.
(5) Cleaning ditches, reshaping of shoulders, surfacing and stockpiling on 9.27 miles of P.S.H. No. 3, Field Springs Park to Grande Ronde River in Asotin County, a state project, involving about 3.34 miles of removal of roadbed to subgrade, 10,360 cu. yds. of ballast, 9.27 miles cleaning ditches and reshaping shoulders, 5700 cu. yds. of crushed stone surfacing on roadway, 1000 cu. yds. of crushed stone surfacing in stockpile, 2860 M gallons of water and 2900 cu. yds. of crushed mineral aggregate in stockpile.
(6) Surfacing and stockpiling and constructing light bituminous surface treatment on 2.1 miles of P.S.H. No. 8, Kennewick West in Benton County, a state project involving about 1.6 miles of scarifying existing oil surface and shaping roadway, 6900 cu. yds. of ballast, 2500 cu. yds. crushed stone surfacing on roadway, 2000 cu. yds. of crushed stone surfacing in stockpile, 440 cu. yds. crushed cover stone, 46 tons of bituminous cement and other items.
Specifications obtainable from the above office upon payment of $2 each.

7/15/47 40
Owner Taking Bids—Due July 21, 2 P. M.
Curbs and Gutters
KINGSBURG, Calif., Fresno County. South side of Tulare St. from 16th to 18th Ave. and on east side of 16th Ave. to Sierra St. and on north side of Sierra St. from 16th Ave. to Draper St.
Owner—City of Kingsburg, F. O. Rosander, city clerk, City Hall, Kingsburg, Calif.
Plans by engineering department of owner.
Specifications obtainable from the office of the city clerk.

7/15/47 40
Contract Awarded
Seal Coating Cost $7750
SAN BRUNO, Calif., San Mateo Co.
Owner—City of San Bruno, Ralph E. Woodman, city clerk, City Hall, San Bruno, Calif.
City Engineer—C. L. White, City Hall, San Bruno, Calif.
Seal coating certain streets.
Contractor — T. M. Blomquist, 36 Placitas Ave., Atherton, Menlo Park, Calif.

7/15/47 40
Low and Only Bidders
Highway Improvement Cost $187,654.55
PHOENIX, Arizona. Winslow-Long Valley highway, 10 miles southwest of Winslow southwesterly for a distance of about 15½ miles; Non-FAS (1947).
Owner — Arizona State Highway Commission, 17th Ave. and Jackson son St., Phoenix, Ariz.
Work involves grading, draining and aggregate base.
Low Bidder—Bowen & McLoughlin, Box 4037, 733 19th Ave., North, Phoenix, Ariz., $187,654.55.
Other bids July 8 were:
D. A. Flickinger & S. L. Stewart, $211,032.08.
Packard Contracting Co., $215,172.
L. G. Lynch, $228,126.50.
W. R. Skousen, $236,027.

7/15/47 40
Bids Rejected
Grading and Surfacing
LASSEN COUNTY, Calif., Baxter Creek, about two miles north of Janesville.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 1.1 mile grading and surfacing with road-mixed surfacing on cement-treated subgrade.
As previously reported, Isbell Constr. Co., Box 2351, Reno, Nev., at $100,998.50 submitted the low bid June 18.

41—GAS, WATER AND OIL PIPE LINES

7/15/47 41
Contemplated
Fire Alarm System Cost $230,000
RENO, Nevada, Washoe County.
Owner—City of Reno, Mayor Francis R. Smith; T. L. Taylor, City Clerk; E. C. Frisch, city engr., City Hall, Reno, Nevada.

7/15/47 41
Contemplated—Bond Election in August of $60,000 Set for August 5
Water Works
ST. HELENA, Calif., Napa Co.
Owner—City of St. Helena, R. R. Palmer, City Clerk, City Hall, St. Helena, Calif.
City Engr.—John A. Mitchell, 1735 Spring St., St. Helena, Calif.
Including installation of the St. Helena-Rutherford pipeline and extension of laterals and mains within the city limits.

7/15/47 41
Contract Awarded
Water Mains; Spec. 426 Cost $22,337.90
SAN FRANCISCO, Calif. Miraloma Park Subdivision.
Owner—City and County of San Francisco, Public Utilities Commission, Room 287, City Hall, San Francisco, Calif.
Plans by owner.
Laying 6-, 8-, and 12-in. cast iron mains.
Contractor—Carl T. Rairey, 1874 25th Avenue, San Francisco.

7/15/47 41
Contract Awarded
Concrete Pipeline Cost $1,074,973.20
SAN DIEGO COUNTY, Calif. From San Jacinto-San Vicente Aqueduct, about one mile westerly of San Vicente Reservoir southerly to a point on north shore of Seventeen Mile Reservoir.
Owner—San Diego County Water Authority, 314 Union Bldg., San Diego, Calif.
48-inch, 42-inch and 39-inch pipe.
The work has been divided into three schedules: Schedule 1 including all work from the San Jacinto-San Vicente aqueduct to the north side of San Diego River Valley; Schedule 2 including all work from the end of Schedule 1 to the south side of the San Diego River Valley, including construction of the Lakeside control station; Schedule 3, including all work from the end of Schedule 2 to the Sweetwater reservoir.
Contractor—American Pipe & Construction Co., 4635 Firestone Blvd., South Gate, Calif.

7/15/47 41
Bond Election Contemplated
Water Improvements Cost $63,867.50
REDDING, Calif., Shasta County.
Owner—City of Redding, Mayor Rosco J. Anderson, City Manager Phil Storm, City Hall, Redding, Calif.
City Engineer—William Green, City Hall, Redding, Calif.
The work involves:
(1) installation of an 18-in. pipeline from the pumping plant to tanks, and a similar line from tanks to main line tie-in at Willis and Shasta Sts.;
(2) excavation and enlargement of the old reservoir; bottom and sides to be lined with concrete;
(3) installation of a 6-in. pipeline from Railroad Ave. to Elmwood St. and from there to Market St. (650 feet);
(4) installation of 6-in. pipeline from Continental St. east on Butte St. (1000 feet);
(5) installation of 6-in. pipeline from Shasta St. north on Almond Ave. (1000 feet);

THEY'RE PRACTICAL! THEY'RE BEAUTIFUL! CECO STEEL WINDOWS

For every Home or Industrial Need

Every building man knows that steel windows are preferred in nearly any type of commercial, industrial and institutional building. And Ceco steel windows, now ready for immediate delivery from Pacific Coast Aggregates, mean economy and additional safety for the largest or smallest structure.

Years of construction experience have given Ceco engineers a sure grasp of all window problems. Ceco casements provide a tight weather seal, easy opening and closing without fear of warp, beauty of design, and every window is "Bonderized" for protection against rust.

CECO STEEL WINDOWS ARE THE MODERN WINDOWS FOR THE MODERN BUILDING

GROOVER AND I

RANCHO MESQUITE

When this column fails to appear it is an even money bet I am down on the edge of the desert taking the sun on my Rancho Mesquite and trying to forget an upside-down world.

☆ ☆ ☆

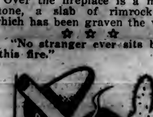
Several readers have speculated about this desert hideaway with its adobe hut, isolation, greasewood fire and high-powered radio.

☆ ☆ ☆

Fortunately the radio is not high powered. It frequently goes "pau" and leaves me with the tranquil silence I am seeking. Dr. T. A. Milindian, my nearest neighbor, has a fence post telephone, but he lives nine miles away.

☆ ☆ ☆

Architecturally, my hogan might be described as "early mojave." It is located where the desert meets the hills. It is complete with one thick-walled room, one end of which is a large stone fireplace.



☆ ☆ ☆

The fire is not greasewood, but good scrub oak which Joe Two Eagle Eagle cuts from the hills. I once complained about the length of the wood. Joe, in a very civilized approach to the problem, stated: "Okay, me tellum squaw."

☆ ☆ ☆

Over the fireplace is a mantlestone, a slab of rimrock, into which has been graven the words:

"No stranger ever sits beside this fire."

Representatives Due to Consider Purification Bill Projecting $400 Million in Construction

WASHINGTON.—With the senate public works committee reporting out a stream pollution control bill earlier this week, contractors turned to the house to learn if any immediate action was planned on pollution legislation there.

There is no chance for the house public works committee to give attention to the four stream pollution control bills now confronting it before next week at the earliest. The committee's time this coming week will be taken up with the St. Lawrence waterway measure.

Therefore, the possibility was developing that the senate bill, S. 418, known as the Barkley-Taft stream pollution control measure —might come to the house in the meantime. In the event the senate gives S. 418 early consideration, the house committee is expected to hasten it through to the house floor.

A house committee spokesman said today that in light of these developments there is a good chance some stream control bill will be put through at this session.

Plans, Specs Loans

Here is why this is important to contractors:

With the federal government loaning out $100 million a year to both governmental and private industry units for construction of pollution control buildings and equipment, a whole new field of this type of work would be opened to constructors.

As the senate bill came out of committee and now awaits floor consideration, it provides for just that—the authorization of $100, million a year in federal aid to states, their subdivisions and certain private industry groups for stream pollution control. Amounts of the loans could run as high as one-third the estimated cost of individual projects contemplated.

In addition to this figure the measure provides for the loaning of another $12 million each year for expenses in connection with preparation of plans and specifications for sewage treatment plants and any other buildings needed to purify the country's streams and rivers.

Any money being loaned to private industries for this work would come from the larger figure of $100 million per year which covers all loans for construction work. None of the advance planning money would go for building activity, only for preparing plans and specifications.

Loans of the construction funds would be repaid at two per cent interest. Loans for planning would be repaid, interest-free, at the time actual construction is undertaken.

FSA Originates

In these respects the new bill follows closely the lines of recommendations made by Major General Philip B. Fleming, administrator of the federal works agency. He was called on by congress to present an alternate plan when he objected to an original proposal to place the administration of the act in the hands of the federal security agency.

As the measure now stands, FSA, through its agency the U. S. public health service, would be charged with the responsibility of determining need for stream purification.

FSA would actually initiate the various projects by going before a newly-created five-man board,

Justice Department Slow in Prosecuting OPA Violation Cases

WASHINGTON.— The Justice department is still sitting tight on most of the 5,400 office of price administration violation cases it inherited from OPA six weeks ago.

These cases involve lumber and assorted building materials in addition to a host of other commodities on which overcharges totaling some $75 million are claimed by the government.

Some individual suits are said to amount to as much as $1 million.

But time is on the side of the defendant in these matters. Many private attorneys have advised their clients to adopt a "sit tight and wait" attitude.

This great number of OPA violation cases was dumped on Justice June 1; but Justice did not take over a single OPA attorney. This complicated the situation because many of the suits involve technical OPA conditions with which Justice personnel is not familiar.

What is more, witnesses in the cases now are scattered from original points and presumably would be hard to gather in for procecutions.

Under the law, government can require a three-fold payment in penalties three times, that is, the amount of the alleged overcharge.

RAIL IMPROVEMENTS COST $20 BILLION

WASHINGTON—Frank Knight, executive secretary of the American Equipment Dealers, predicted Thursday that modernization of railroad beds will total more than $20 billion in expenditures for improvements before 1960.

Durable Goods Wage Rate Soars Despite Work Week Trimming

WASHINGTON.—At least a partial answer to the burning question of why construction costs are so high is contained in a weekly earnings report for the durable goods industries issued recently by the bureau of labor statistics of the department of commerce.

This survey indicates that labor costs in the lumber and building materials industry have been creeping up gradually since the first of 1947. The advance in wages paid out by the building materials manufacturers is not great but the important thing about it is the trend so clearly indicated for the three months covered by the BLS report.

Average 43 Hours

In February, this year, average weekly earnings for workers in lumber and building materials production was $44.73. In March this was up to $44.91 and in April had climbed to $45.36.

An average of 43 hours per week was the working time for employes in February and this remained nearly constant, rising to 43.3 hours per week for both March and April, 1947. This leaves the average hourly earnings for the three months at $1.061 for February, $1.067 for March and $1.074 for April.

For lumber and timber basic products alone labor reported average weekly earnings of $41.28 for April. This was 1.6 per cent above March and 17 per cent over April a year ago. At the same time the average weekly hours worked in this industry group was 41.5 in April, only one per cent more than March and seven-tenths of one per cent more than April, 1946.

Metals Wages Soar

The average hourly earnings of 99.3 cents in April represented a raise of six-tenths of one per cent over the previous month and 16.2 per cent over April the year before.

The iron and steel products group also showed increases all along the line. The average weekly wage of $51.80 for April was 1.1 per cent over March and 9.6 per cent in advance of April, 1946. Significantly, the electrical machinery industry showed a 2.4 per cent decline in its average weekly wage of $47.99 in April from March though well over April, 1946.

Labor's comment on the overall picture showed the important influence of these construction items on wage—and therefore cost—trends:

Near War Peak

"The durable goods industries have come within one dollar of their wartime high, despite a drop of about six hours in the work week, as hourly earnings have risen 12 per cent since January, 1945. The bureau's consumer's price index, however, has increased by more than 22 per cent since the wartime earnings peak."

COMMERCE REESTIMATES ITS VOLUME FORECAST

WASHINGTON— The Department of Commerce soon will issue another revision of construction figures for 1947—this time predicting that the total for Calendar, 1947, will be appropriately one billion dollars higher than the last D of C figure indicated.

The Department's report covering the month of May shows value of new construction put in place during the month totaled $942, million, an increase of 11 per cent over April.

Rec Bureau Due to Ask Bids on Huge Dam Facilities, Central Valley Project, Early Fall

WASHINGTON. — Bid invitations on construction of earthwork, lining and structures for 10 miles of the Horsetooth feeder canal to the Colorado-Big Thompson Project are expected about September 1. The work will include a diversion dam on the Big Thompson river, a one-mile tunnnel and 12 concrete siphons; one steel siphon and other structures near Loveland, Colo.

The impending bids focus interest on a storp being told in Washington concerning a saving of approximately $11 million on the job of boring a nine-foot hole through solid rock of the Great Divide for 13.06 miles.

The account runs this way:

In spite of the fact that the government assumed all financial risk in connection with the project, only one contractor's bid was received on this huge reclamation job.

This single bid called for total expenditure of $18 million.

Job Goes to Subs

For one reason or another the one and only estimate was rejected (the bidding was supposed to be competitive) and the bureau of reclamation of the Department of the interior, started looking around for other ways of getting the job done.

The proposed tunneling was broken down into several specialized divisions. Each division or specialty was opened for bids by subcontractors.

The result was an amazing saving over originally estimated cost. This part of the Big Thompson project was completed at a total cost of less than $100 per linear foot; that dropped the overall cost to less than $7 million. Thus government saved itself $1.4 million by breaking into component parts the Colorado-Big Thompson project.

One editorial comment on this arrangement states:

We can't tell from here whether the single contractor figured eleven million dollars profit but it certainly wasn't bad going for the reclamation bureau.

"However, we can understand why some of the members of the eightieth congress are sharpening their chisels to cut its budget. Contractors have lobbies too."

Other western reclamation projects on which bids are due immediately or in the near future include:

Transmission lines, Davis Dam project, San Bernardino, Riverside and imperial Counties, Calif.

Pumping plants for Klamath project, in northern California..

Davis Dam project, Arizona-Nevada, cableway gauging station near Kingman, Ariz.

Boulder City, Boulder Canyon Project, southern Nev., pipe line and storage tanks.

Transmission lines, Central Valley Project, Calif.

Transmission lines, Davis Dam, Arizona-Nevada.

Steel penstocks, Davis Dam.

Pumping station, Boise project, Ida.

Pumping plant, canals, laterals, Missouri Basin project, near Savage, Mont.

Switchyard excavation, footing, servacing, Central Valley, Calif.

Pump House, Boulder Canyon project, Nev.

Lateral system and wasteways at Deschutes project, Ore; Owyhee project, Ore; Payette Division, Boise Project, Ida.

Nationwide Flood Control Program Up for Discussion

WASHINGTON.—A nationwide program for river valley development will be formulated here Thursday and Friday when representatives of interested organizations convene to see what can be done about flood control.

The session will be designated as a Valley Authority Conference.

If the nebulous plans for a country-wide consideration of flood control by river valley development materialize, some of the most extensive large-scale construction the country has ever seen may be in prospect.

The forthcoming meeting was called by Morris Llewellyn Cooke of Philadelphia, first administrator of the rural electrification administration.

Some congressional support for the move is indicated by the fact that James E. Murray of Montana, William Langer of North Dakota, both senators, and representative George P. Miller of California, all have joined in the invitation for the Washington meeting. A group of farm and labor organization officials also have expressed interest.

One function of the session will be to survey flood damage already done and formulate and propose a river valley development program of national scope.

President Truman has said that he favors a flood control plan for the entire Mississippi valley and that at the same time he would endorse the Missouri Valley Authority.

MVA, he told reporters, is the best way to control the Missouri river but such an authority would not be extensive enough in his estimation.

Mr. Truman revealed that the administration is trying to work out a plan for the whole Mississippi valley, including the big river's tributaries. He has told Congressman Murray to push his bill providing for the smaller valley authority.

The recent widespread floods throughout that section of the country have focused government and private industry attention on the need for exhaustive survey and construction work to keep the streams in check. Congress has been making emergency appropriations to meet the present conditions but next week's conference and the administration proposals are looking farther ahead.

RFC ACTION 'DEATH BLOW' TO PROGRAM

WASHINGTON — The GOP housing stand and the attitude of congress toward eliminating RFC as a secondary market for housing loans took on a political tingle as some sources predicted the republican-sponsored elimination of this loan market would act as a boomerang in the 1948 elections.

Representative Paul Brown of Georgia, called the move a "death blow" to the housing program, particularly in the smaller towns.

"The veterans," Brown said, "will just have to suffer."

ALTER RUBBER ORDER

WASHINGTON— Revision of rubber order R-1, effective immediately, was anounced Thursday by the office of materials distribution, Department of Commerce. Changes deal with simplification of controls, procedures and reports, with no substantial changes in tho ratio of natural and synthetic rubber consumption.

1-8—COMMERCIAL BLDGS.

7/17/47 2
Low and Only Bidders
Motor Sales Building Cost $48,880
VISALIA, Calif., Tulare County.
Owner—Bertram Motor Sales Co., 324 E. Main St., Visalia, Calif.
Architect — Horn & Mortland, 608 Rowell Bldg., Fresno, Calif.
Brick and steel.
Contractor—Franceschi Construction Co., Box 528, Fresno, Calif., $48,880.
Other bids were:
Trewhitt, Shields & Fisher, Fresno, Calif., $55,481.
Harris Construction Co., Fresno, Calif., $56,865.
Larsen - Ratto Construction Co., Fresno, Calif., $59,177.
Ty Taylor Wheeler, Commercial, Fresno, Calif., $59,875.
L. H. Hansen & Sons, Fresno, Calif., $60,200.
R. H. Hougham, Hanford, Calif., $75,438.

7/17/47 8
Contract Awarded—Preliminary Work Begun
Farm Implement Salesroom Cost $100,000
WOODLAND, Calif., Yolo County. Knights Landing Highway.
Owner—Ray D. Henderson Co., 2nd St., Woodland, Calif.
Reinforced concrete construction, 205x 230 ft.; to contain display room, parts room and repair shop.
Contractor — Stolte, Inc., 8451 San Leandro, Oakland, Calif.

9-10—EDUCATIONAL BUILDINGS

7/17/47 9
Owner Taking Bids—Due July 24, 7:30 P. M.
Gymnasium (Alterations)
MONTEREY, Calif., Monterey Co. Monterey Union High School.
Owner—Board of Trustees, Monterey Union High School District, Glen T. Goodwill, secretary, Monterey, Calif.
Architect—Robert Stanton, Pebble Beach, Calif.
Plans obtainable at the offices of the board and architect upon deposit of $15 per set.
All bids must be accompanied by cashier's or certified check in amount of 10% of the bid, made payable to the board.

7/17/47 9
Plans in Progress .....
School Cost $30,000
BRENTWOOD, Calif., Contra Costa County.
Owner — Brentwood Unified School District, Joseph Mendez, superintendent, Brentwood, Calif.
Architect—Thomson & Evans, 1308 E. 38th St. at Park Blvd., Oakland, Calif.
Work involves construction of building containing two classrooms and toilet room.

7/17/47 44
Moving Building—Bids Wanted
FARMERSVILLE, Calif., Tulare Co.—Until July 24, 2 P. M., bids will be received by the board of trustees, Farmersville School District, George L. Snowden, 937 N. Conyer St., Visalia, Calif., for moving building No. T-496 from Lemoore Army Air Field to the Farmersville School District grounds at Farmersville, Calif.

OHE Draws Up New Formula for Handling Recreational Permits

WASHINGTON—Isn't going to be as easy to obtain a permit for a recreational or amusement type building under the new regulations as it was under the old.

This became apparent as the office of the housing expediter mapped new plans for administering the rent and construction control bill signed by the President the last day of June.

From all that could be learned at this time it appeared that material scarcity would be the principal factor in guiding the reviewers of these applications, all of which now come to Washington. Impact on the supply of building materials is to determine largely how much of the so-called non-essential work is permitted to start.

The reason for this lies in the fact that OHE looks for an entirely new listing of building items to enter the "scarce" column now that controls are off most types of non-housing. construction—estimates range from two billion to three billion dollars—gold underway. No one would place a date on this.

Generally, it is expected the greatest effects will be felt next spring but large chunks of the new and renovating work held up during the fourteen or fifteen months of strict government regulation now is getting underway. OHE officials are concerned about supplies of cast iron pipe and fittings, soil pipe, electrical wiring devices, sheesteel, gypsum board and lath, hardwood flooring, millwork, nails and plywood.

Anticipating new shortages in these lines when the commercial and industrial work starts in greater volume, the housing moguls have promised a strict scrutiny of the amusement and recreation applications—only field on which controls remain.

The reviewing process is being setup in such a way that denials will be easy and approvals hard. The analysists no longer will be guided to any extent by the veteran status of the applicant and the word "essential" probably will take on a new meaning.

(It has been estimated that more than 1,000 theaters were approved as essential to community development under the old standards.)

While the housing officials are tightening the rules for appraising the amusement and recreation applications, a large backlog of these requests is accumulating in the Washington office. No permits have been issued, OHE said Friday, pending final drawing of the rules and regulations. In the meantime applications are arriving at the rate of between 50 and 60 every day—about 300 a week.

Between March 26, 1946, and July 1, 1947, the period that construction controls were on all nonhousing, government authorized non-residential work valued at $3, 800 million; but only about three percent of this was considered to be of a nature comparable to buildings on which permits are required now.

In a few days OHE is expected to issue a description of the new organization for handling the permit applications in Washington—one thing is certain, the screening process will be tighter than it was before.

#

DRAFT NEW RFC BILL

WASHINGTON.— Senator C. Douglas Buck, acting chairman of the upper body's banking and currency committee, announced that group is writing a new bill to re-constitute the reconstruction finance corporation as a mortgage buying agency for veterans home loans.

Airport Allocations Will Be Submitted To Congress Soon

WASHINGTON. — This civil aeronautics administration this week will issue a revised list of airport projects on submission to congress—a new listing revised in the light of a 50 percent appropriation cut in funds for the federal airport construction program.

In an act signed a few days ago by President Truman, the CAA request for funds for grants to states and cities for airport work was cut from $65 million to $32,500,000.

This cut eliminates approximately one-half of the Class IV and larger airports from this agency's planned program for fiscal year 1948.

CAA is paying up to 50 percent of the cost of smaller fields with runways under 4,500 feet. Expenditures for the larger ports must receive congressional approval. Federal participation in the Class IV and over construction projects is expected to constitute a small percentage of the entire cost.

CAA still is urging cities to allow plenty of room for airport activities in their urban plans. For aviation program to be maintained, the special needs of airfields must be considered in the overall urban and suburban planning.

The agency said: "Even if there were no master plan showing the place of the airport in the community, the principal purposes of zoning—protection of the airport as well as the lives and property of the flying public and residents near the siteare proper objectives of city or county planning or zoning."

#

Export-Import Act Continues Lumber, Steel, Tin Quotas

WASHINGTON—Lumber is included in the wide variety of commodities covered by the export-import control act signed by the President yesterday. It continues until February 28 the authorization for the Department of Commerce to administer export quotas on lumber and steel mill products.

Also contained in the new measure is extension of allocation of tin in the government stockpile. Nearly 400 commodities are covered in all.

Lumber also was discussed on Capitol Hill wher the house passed and sent to the senate a bill permitting the Agriculture Department to sell timber from lands in the Tongas National Forest, Alaska. The bill also validates timber sale contracte previously made by government with lumbermen.

Review Rio Vista Bridge August 19,

SACRAMENTO.— The application of the state division of highways for approval of plans for a new basculel span and approaches over the Sacramento River at Rio Vista will be considered by the Sacramento district corps of engineers here August 19.

It will be held in Room 311, of the Wright Building, 1209 Eighth Stree, at 10 a. m., according to Colonel Lester F. Rhodes.

#

STEEL PICKING UP

WASHINGTON—The operating rate of steel companies having 94 percent of the steel capacity of the industry will 91.5 percent of capacity for the week beginning July 14, compared with 78.9 percent one week ago, 95.8 percent one month ago and 87.9 percent one year ago.

GROOVER AND I

95 "LOST" SHIPS

During the late war on a "lone deal" we delivered to Russia 95 of our merchant ships including tankers, cargo ships and troop carriers.

☆ ☆ ☆

We have wasted a lot of twenty-four pound bond letter paper suggesting to the Russians that, as the war has been over for more than two years, they might consider returning those ships. We forget that Russia never returns anything!

☆ ☆ ☆

Some nosey newspaperman found tankers in Pacific coast ports flying the Russian flag and loading oil for Russia. This guy had just heard of a U. S. oil shortage so he began asking questions.

☆ ☆ ☆

These were your own tankers being loaded with your short oil for Russia. The nosey guy talked. There was a quick cover-up—an embargo was slapped on export oil.

☆ ☆ ☆

That embargo lasted exactly 3 hours, 25 minutes. Then it was found that these shipments were "in order." The pumps again started and as you read this, your oil is again in your ships going to your little pals of the Soviet.

☆ ☆ ☆

Oil is sold for gold, not love and kisses or lend-lease BUT's. As to the gold paying for the oil, are you optimistic enough to say that it is not your money coming from the export-import bank or some other such lending agency?

☆ ☆ ☆

Of the money we are "lending" Turkey, that nation will "purchase" ten U. S. ships. Is this a subtle hint to Russia that she should recognize her obligation of 95 ships belonging to us?

☆ ☆ ☆

To be subtle with Russia you should use the delicate shove of a Mallet-compound mountain locomotive.

#

Truman Asks Funds For Mississippi River Flood Control Work

WASHINGTON. — President Truman recommended Friday that congress pass a multi-billion dollar flood control program to prevent future destructive floods in the Missouri and upper Mississippi River valleys. He urged appropriation of $320 million to start the program.

That amount would break down into $237 million for the army engineers; $10 million for the reclamation bureau; and $3 million for the soil conservation service. The President's request has been assigned the senate public works committee for action.

#

MONTEREY SCHOOL SITE 'UNLIKELY'

WASHINGTON. — The house rules committee has declined to send to the house floor a bill authorizing the navy to acquire the Del Monte Hotel at Monterey, for use as a post-graduate training school.

What's more, Representative Leo E. Allen of Illinois, committee chairman, said that in his opinion the bill is dead for this session.

The committee decision was announced in spite of another appeal on the part of Congressman Jack Z. Anderson, California—his third —to the committee.

Capitol Survey Reveals Federal Agencies Allow Either Bid Bond or Certified Check

By ERNEST J. MICKEL

WASHINGTON (Exclusive).—A survey of government agencies, including the military branches, Friday indicated that in virtually all instances of contract construction they accept either bid bonds or certified checks with submission of estimates.

Still able to operate under provisions of the Second War Powers Act—the broad wartime law—if they desire, these agencies have chosen to return voluntarily to the peacetime practice of receiving certified checks or bid bonds, one in lieu of the other, and requiring performance bonds under stipulated conditions. (The Miller Act is the peacetime legislative authority.)

On the other hand, under the Second War Powers Act, these agencies are given broad leaway in administration of their construction activities. For example, they are permitted to waive all bonds and change contracts. There is virtually no evidence, however, of the large construction branches of government restoring to these wartime expedience.

Require 20% Bond

Army and navy, the two heaviest operators in the contracting field, have given great autonomy to their field offices in the matter of handling bids. Officers locally set the percentages of bid bonds and establish general procedure.

The War Department requires a bid bond of 20 percent of the contract price where that cost exceeds $2,500. But certified checks are taken in lieu of these bonds. When contracts are awarded, army requires payment bonds of 50 percent on projects costing over $2,000 and up to $1 million. On jobs between $1 million and $4 million, payment bonds of 40 percent are required; Performance bonds, of course, are an added requirement.

Standard navy procedure likewise gives the option of certified check or bid bonds accompanying estimates. When contracts are awarded, navy calls for a performance bond of 50 percent of the job and a payment bond of 50 percent.

Secures Performance

In addition to army and navy, public buildings administration, Agriculture, Interior, maritime commission and other agencies engaged in construction work, generally follow this bid-taking outline, an authorized spokesman said.

There are two aspects to the bid bonding picture from the standpoint of the surety companies.

First, if a company secures a bid bond, it automatically has the right to execute the following performance bond. One reason the surety concerns offer bid bonds is to corral the performance bonds.

Cuts Bonder's Risks

Second, where performance bids alone are allowed, the bonding firm takes a risk of a contractor's estimate error, and might be bound for the amount. On the other hand, if the bid bond is in the picture, the firm usually is tied up to the performance bond as well.

The bid bonds carry a five dollar premium.

Certified checks accompanying bids may be received in lieu of bid bonds.

#

St. Lawrence Job Will Be Nation's Biggest in Years

WASHINGTON.—The largest single construction job in terms of money expenditures and project work stood one step closer to realization this week with subcommittee approval of the vast St. Lawrence Seaway undertaking.

The senate's foreign relations sub group approved legislation authorizing the waterway and power construction program after listening to Lt. Gen. R. A. Wheeler, chief of the army engineering corps, detail cost items involved.

Aside from its importance to the a potential defense project for North America, the proposal to make the St. Lawrence a deepwater river into the Great Lakes area to accommodate heavy shipping portends an astounding volume of construction work of the large variety.

The announced estimated costs relate the magnitude of the two-nation attempt to open the midwest to ocean traffic and at the same time provide power plant construction estimated to produce, when completed, approximately 12,600 billion kilowatt hours of electricity every year.

Lt. Gen. Wheeler said the cost of the St. Lawrence job, overall, to U. S. and Canada together, would be $674,707,000. And this is based on the May, 1947, cost index, which rose 2.5 percent this month.

Of this outlay, the U. S. would assume $491,609,000 as its share and Canada another $183,098,000.

AEC gives this further cost breakdown:

Great Lakes Section—New lock at Sault Ste. Marie with approaching channels, $14,636,000; connecting channels, $92,591,000.

St. Lawrence River—Thousand Island section, $1,283,000; International Rapids section:

1—For navigation only, $66,079,000.

2—Power, $166,184,000.

3—Common to navigation and power, $182,577,000.

This totals to $523,351,000 for the U. S. share of construction and equipment cost but $31,742,000 worth of work already has been done, leaving $491,609,000 as the estimated cost for completion.

#

ARMY ENGINEER DIES NEAR PINE FLAT DAM

SACRAMENTO. — Vernon L. Glaze, chief of exploration work in the Sacramento army engineer district for two years, died suddenly Saturday of a heart attack near the Pine Flat Dam site.

He was stricken as he was returning to Fresno after checking over work on the Pine Flat project. During the war he served as civilian engineer in charge of military construction in the Sacramento area and directed construction at McClellan and Mather Fields and Camps Stoneman and Kohler.

Surviving are his widow, Mrs. Eva Glaze, of Sacramento; three daughters, Virginia, Betty Ann and Evelyn; and three sons, Robert, Richard and Jack.

HOUSE LANDS OKAYS GILA REC PROJECT

WASHINGTON. — The public lands committee of the house has given its approval to a bill creating the Wellton-Mohawk division of the Gila reclamation project in Arizona.

The senate has passed an identical bill, which virtually assures its reaching the White House. Presidential approval is expected.

31-32—WATER SUPPLY & SEWAGE DISPOSAL PLANTS

7/18/47 32
Plans in Progress—Acquiring Rights-of-Way
Sewage Disposal Plant Cost $23,500,000
ALAMEDA and CONTRA COSTA COUNTIES, Calif.
Owner—East Bay Municipal Utility District, Special District No. 1, 512 16th St., Oakland, Calif.
Engineer — John S. Longwell, chief engineer, East Bay Municipal Utility District, 512 16th St., Oakland, Calif.
In general, project centers on a treatment plant at 34th St. to which sewage will be brought by interceptor mains more than 20 miles in length, extending from Albany to San Leandro, with a lateral into Alameda. From the plant, effluent will be pumped more than a mile out in the bay.
As previously reported, the approved plans were selected by a board of consulting engineers—Samuel A. Greeley, N. T. Veach and Clyde C. Kennedy, 604 Mission St., San Francisco—as the most feasible of four proposals designed by East Bay Municipal Utility District engineers.

34—DAMS, RESERVOIRS & DREDGING

7/18/47 34
Owner Taking Bids—Due July 29, 3 P. M.
Dredging; Spec. 98
SAN MATEO COUNTY, Calif. San Francisco Airport.
Owner—City and County of San Francisco, Public Utilities Commission, Room 287, City Hall, San Francisco, Calif.
Plans by owner.
Dredging channel and installing south drainage gates.
The work involves:
(1) lump sum, moving dredger equipment into site and out of site;
(2) 350 hours dredging, including rental, labor and materials;
(3) lump sum, installing drainage pipe and gates.
Specifications obtainable from the cashier's office, 6th floor, 425 Mason St., San Francisco, Calif., upon deposit of $10, refundable.

EXbrook 4764

It's mighty good to know . . .
. . . that here on the West Coast is a new, modern, stable source of *cast iron pipe and pipe fittings*. NOW you can rely on quality, delivery, re-order uniformity. Pacific International Pipe & Steel Co. ("PIPSCO") offers good pipe, centrifugally cast, and good fittings—for western contractors, plumbers and builders.
For a sure, reliable source of supply, for uniformly textured, sturdy soil pipe and fittings, look for the brand "PIPSCO" stamped on every piece. **Rely on "PIPSCO."**

DEFEAT SUMMER HEAT INSIDE HOMES with KIMSUL★

The Modern Insulation for New and Existing Homes
★
Available From Pacific Coast Aggregates
"Everybody talks about the weather but nobody does anything about it" isn't true any longer. Now you can do something about summer heat inside the home . . . insulate the walls and ceilings with a snug, permanent blanket of many-layer KIMSUL and keep interiors as much as 15 degrees cooler on the hottest days. Prefabricated KIMSUL offers uniform, effective insulation coverage in both summer and winter. Greatly reduces fuel bills, too. And KIMSUL is enduring . . . won't sag or settle . . . resists fire, moisture, fungus and termites. KIMSUL is easy to install. If you can handle a hammer, you can install KIMSUL.

LARGEST CONSTRUCTION DAILY IN THE WEST

SECTION TWO FRIDAY, JULY 18, 1947 PAGE 9

Virgil E. Gray to Head Bay Cities Equipment Firm

Virgil E. Gray has assumed active management of Bay Cities Equipment Inc., in Oakland. General-manager for the past year, Gray became president on July 1, succeeding Stanley S. Moore.

Virgil E. Gray

Al Mason, Jr., has been appointed secretary-treasurer in charge of sales promotion. He was formerly assistant manager of the Medford Branch of the Howard Cooper Corp., International dealer for the state of Oregon and western Washington.

Bay Cities Equipment, Inc., will soon launch an extensive sales program on power and industrial equipment thruout the bay area. Plans are now in progress for a

Al Mason, Jr.

$75,000 addition to the parts and service departments at 2792 Cypress Street, Oakland, on the eastern approach to the San Francisco Bay Bridge.

All present franchises will be retained and several new distributorships added in the expansion program now under way, according to President Gray. The company now features International industrial tractors and power units, Koehring shovels and cranes, Parson's trench diggers, Kwik-Mix concrete mixers, Ingersoll-Rand air compressors, Bucyrus-Erie allied tractor equipment, J. D. Adams grading equipment and kindred lines.

#

ILL-ADVISED ROADS SAVINGS ARE COSTLY

WASHINGTON— Expenditures for repair and maintenance of highways, roads, and streets have been excessive in the past because of ill-advised attempts to build at minimum cost when the pavements originally were constructed, Claude C. Blair, president of the Paving Brick Institute, state Wednesday.

"In the twenty-year period preceding the war, more than one-third of all expenditures were used to improve and repair existing pavements, thus greatly reducing the funds which could be used to expand the nation's road system," Blair said.

PLANS and Speculations

WAA has turned over all power, water and sewage facilities at the war surplus magnesium plant at Henderson, Nev., to the state of Nevada. Relinquishment of the entire $4 million plant to the state is a possibility.

oOo

Governor Warren has signed a bill appropriating $500,000 to buy surplus housing for resale to farmers and labor groups for housing agricultural workers.

oOo

Final appoval has been given a state appropriation of $50,000 for acquisition of a state office building site in Stockton.

oOo

Harry R. Carskadon, Burlingame realtor, this week urged that the entire Peninsula be reserved for exclusive white residence. He deplored activities of the Redwood City Council for Civic Unity in seeking low-cost housing for negro, Chinese and other racial minorities on the Peninsula.

oOo

Alcatraz is the nation's most expensive to operate, Federal Prison Director James V. Bennett told a congressional appropriations committee this week.

oOo

Coal miners' and steelworkers' wage increases are expected to boost steel prices about $5 a ton, according to the trade organ Steel.

Official Proposals

FIRST PUBLISHED TODAY

Highway Improvements—Monterey County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION of HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **August 13, 1947**, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing Highway in accordance with the Specifications therefor, to which special reference is made, as follows:

Monterey County, across Big Sur River, in Pfeiffer-Big Sur State Park (V-Mon-Pfeiffer-Big Sur State Park), a structural steel bridge with timber deck to be constructed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per Hour
Carpenter	$2.00
Cement finisher	2.025
Concrete mixer operator (one cubic yard capacity or less)	1.75
Concrete mixer operator (over one cubic yard capacity and paving type)	2.05
Concrete vibrator operator	1.525
Derrick operator	2.25
Flagman	1.30
Jackhammer operator	1.525
Laborer	1.30
Oiler, power shovels or cranes	1.65
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.40
Pile driver man	2.025
Reinforcing steel worker	2.00
Roller operator	2.10
Structural steel worker	2.25
Tractor driver	2.10
Truck driver (18 cubic yards water level capacity or more)	1.8625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.7375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.675
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.4875
Truck driver (less than 4 cubic yards water level capacity)	1.40
Any classification omitted herein not less than	1.30
Overtime—One and one-half (1½) times the above rates.	
Sundays and holidays—One and one-half (1½) times the above rates.	

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvement
San Mateo County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m., on **August 13, 1947**, at which time they will be publicly opened and read in the Assembly room of said building, for constructing State Highway in accordance with the Specifications therefor, to which special reference is made as follows:

San Mateo County, between North City limits of South San Francisco and 0.35 mile south of Colusa Creek (IV-SM-82-SSF), about two and one-tenth (2.1) miles in length to be graded and paved with Portland cement concrete, asphalt concrete and plant-mixed surfacing on crusher-run base, and a steel stringer highway overcrossing and reinforced concrete pedestrian overcrossing to be constructed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.75
Asphalt plant mixer operator	1.80
Asphalt spreading machine operator	2.10
Carpenter	2.00
Cement finisher	2.025
Concrete mixer operator (one cubic yard capacity or less)	1.75
Concrete mixer operator (over one cubic yard capacity and paving type)	2.05
Derrick operator	2.25
Electrician	2.00
Mechanical tamper and finisher operator (concrete or asphalt)	2.10
Motor grader operator	2.25
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.40
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.50
Painter (brush)	2.00
Painter (spray)	2.00
Pile driver holstman or operator	2.25
Pile driver man	2.025
Plumber	1.875
Reinforcing steel worker	2.00
Roller operator	2.10
Structural steel worker	2.25
Tractor driver	2.10
Truck driver (8 cubic yards water level capacity or more)	2.025
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.65
Intermediate Grade Labor	
Concrete vibrator operator	1.525
Headerboard man	1.65
Jackhammer operator	1.525
Oil distributor bootman	1.425
Oiler power shovels or cranes	1.75
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.5575
Truck driver (less than 4 cubic yards water level capacity)	1.4325
Unskilled Labor	
Flagman	1.40
Laborer	1.40

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.50 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.40 per hour.

The minimum wage paid to all unskilled labor, for which rates are

(Continued from Page 9)

not shown above, shall be not less than $1.40 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **August 6, 1947**, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Sacramento County, on Howe Avenue, between Arden Way and State Highway Route 3 (III-Sac-.977) about one and nine-tenths (1.9) miles in length, to be graded and surfaced with armor coat and orusher run base on imported borrow.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per Hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.75
Carpenter	2.00
Cement finisher	2.025
Concrete mixer operator (one cubic yard capacity or less)	1.75
Concrete mixer operator (over one cubic yard capacity and paving type)	2.05
Motor grader operator	2.25
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.40
Reinforcing steel worker	2.00
Roller operator	2.10
Tractor driver	2.10
Truck driver (18 cubic yards water level capacity or more)	1.8625
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.7375
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.675
Intermediate Grade Labor	
Concrete vibrator operator	1.525
Oil distributor bootman	1.425
Oiler, power shovels or cranes	1.65
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.4875
Truck driver (less than 4 cubic yards water level capacity)	1.40
Unskilled Labor	
Flagman	1.40
Laborer	1.40

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.50 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.40 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.40 per hour.

Overtime—One and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Two Cattle Exhibit Buildings, 1 A District Agricultural Association, San Francisco, Calif.

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF ARCHITECTURE

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the Division of Architecture, Public Works Building, 12th and "N" Streets, Sacramento, Calif., up to 2:00 P.M., Tuesday, July 29, 1947, said bids thereafter on said day to be publicly opened and read for Erection and Completion of Two Cattle Exhibit Buildings, 1 A District Agricultural Association, San Francisco, California, in accordance with plans and specifications therefor.

The structures are each to be 240x270, approximately, with reinforced concrete walls, wood timber trusses, and protected corrugated metal roof. Certain foundation structure is already in place.

Separate bids will be entertained for the following segregations of the work:

General Work.
Plumbing Work.
Electrical Work.
Alternate bids will be required.

Prevailing Wage Scale: In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

	Hourly Rate
Mason Tenders	$1.60
Bricklayers	2.05
Carpenters	2.00
Cement Finishers	2.025
Cement Mixer Operator (up to one cubic yard)	1.75
Cement Mixer Operator (over one cubic yard)	2.05
Electric Workers	2.00
Iron Workers (Ornamental)	2.10
Iron Workers (Reinforcing)	2.00
Laborers (Building)	1.40
Painters (Brush)	1.75
Plumbers	1.875
Sheet Metal Workers	1.75
Any classification omitted herein not less than	1.25

Overtime—One and one-half times the above rates.

Apprentices may be employed provided they are properly indentured by the Contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Plans and specifications for examination are on file in the office of the Division of Architecture, Public Works Building, Sacramento, and Room 808, State Office Building, Los Angeles, and at the principal California Cities Builders' Exchange offices.

Contractors who are desirous of securing plans, specifications, and proposal forms for the purpose of preparing and submitting a proposal for this work may do so subject to certain conditions hereinafter stated by requesting same in writing from the Division of Architecture, Public Works Building, Sacramento. A deposit of $25.00 will be required to guarantee safe return of plans and specifications.

No bid will be considered unless it is made on a blank form furnished by the Division of Architecture, and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 1 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

M., Tuesday, July 22, 1947, said bids thereafter on said day to be publicly opened and read for Group D Residences and Garages, Division of Beaches and Parks, to be constructed in accordance with plans and specifications therefor.

Group "D" Residences and Garages are to be located at State Parks in the following locations:

McArthur - Burney Falls State Park, Shasta County, 1 house, 1 - 2 Car Garage

Richardson Grove State Park, Humboldt County, 3 houses, 1 - 4 Car Garage, 1 -3 Car Garage.

Williams Grove State Park, Humboldt County, 1 house, 1 - 3 Car Garage and Shop Building.

Van Duzen State Park, Humboldt County, 1 house, 1 - 2 Car Garage.

Patrick's Point, Humboldt County, 1 house, 1 - 2 Car Garage.

Prairie Creek State Park, Humboldt County, 2 houses, 2 - 2 Car Garages.

Bids will be entertained for the entire group of 9 houses with garages or separately for houses and garages at each location. The State reserves the right to award separate contracts at each location or group contracts at 2 or more locations, or a contract for the entire group.

Alternate No. 1

An Alternate Bid is required for omitting 1 house and 1 - 2 Car Garage at Prairie Creek State Park, Humboldt County.

Authority Notice — Approval for this construction was granted by the Federal Public Housing Authority - Serial Numbers FPHA-VI-280 to 284 and 290.

Prevailing Wage Scale: In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

HUMBOLDT COUNTY

	Hourly Rate
Cement Finishers	$2.02½
Carpenters	2.00
Electricians	1.50
Laborers Building	1.30
Painters (Brush)	1.43¾
Plasterers	1.50
Plumbers	1.87½
Concrete Mixer Operators up to One Cu. Yd.	1.60
Sheet Metal Workers	1.50
Any classification omitted herein not less than	1.30

Overtime — One and one-half times above rates.

Apprentices may be employed provided they are properly indentured to the Contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Contractors who are desirous of securing plans, specifications, and proposal forms for the purpose of preparing and submitting a proposal for this work may do so subject to certain conditions hereinafter stated by requesting same, in writing, from the Division of Architecture, Public Works Building, Sacramento.

Applications shall state which of the locations plans are desired for.

No bid will be considered unless it is made on a blank form furnished by the Division of Architecture, and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 1 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law.

The Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

"When We're Working in Close Quarters
We TRAXCAVATE"

says Mr. J. E. Nelson of the firm of Johnson & Nelson, Marin County Contractors. "Our IT4 TRAXCAVATOR is the ONLY RIG for close-in work around foundations and concrete forms, and that's only one of the many jobs it does for us. It's one machine that keeps busy."

TRAXCAVATE for PROFIT

All over the country contractors are calling the Traxcavator "the busiest machine on the job," and here's why: They use it for land-clearing and for leveling; they use it for excavating and for truck loading; they use it for backfilling and for cleanup work. From the time the job is started 'til the earthwork is completed the Traxcavator is busy. That spells *profit* for the contractor because the profitable machine is the one that keeps busy. That's why we say
